(Counter-)Archive: Memorial Practices of the Soviet Underground Klavdia Smola, Ilya Kukulkin, Annelie Bachmaier, 2024-10-04 This book is the first major study exploring archival and memorial practices of the Soviet unofficial culture The creation of counter archives was one of the most important forms of cultural resistance in the Soviet Union Unofficial artists and poets had to reinvent the possibilities of maintaining art and literature that did not exist Against the background of archival theories and memory studies the volume explores how the culture of the Soviet underground has become one of the most striking cases of scholarly and artistic self archiving which although being half isolated from the outer world reflected intellectual and artistic trends characteristic of its time The guiding question of the volume is how Soviet unofficial culture deconstructed social memory by collecting archiving and memorizing tabooed culture of the past and present

Architecture and Fire Stamatis Zografos, 2019-06-12 Architecture and Fire develops a conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of architectural evolution Following the introduction Zografos analyses the archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the

function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London's Grenfell Tower in 2017 Zografos concludes with thoughts on Freud's drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda Architecture and Fire is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines **Art + Archive** Sara Callahan, 2022-01-25 Art Archive provides an in depth analysis of the connection between art and the archive at the turn of the twenty first century The book examines how the archive emerged in art writing in the mid 1990s and how its subsequent ubiquity can be understood in light of wider social technological philosophical and art historical conditions and concerns Deftly combining writing on archives from different disciplines with artistic practices the book clarifies the function and meaning of one of the most persistent artworld buzzwords of recent years shedding light on the conceptual and historical implications of the so called archival turn in contemporary art **Archive Everything** Gabriella Giannachi, 2023-09-19 How the archive evolved to include new technologies practices and media and how it became the apparatus through which we map the everyday In Archive Everything Gabriella Giannachi traces the evolution of the archive into the apparatus through which we map the everyday The archive traditionally a body of documents or a site for the preservation of documents changed over the centuries to encompass often concurrently a broad but interrelated number of practices not traditionally considered as archival Archives now consist of not only documents and sites but also artworks installations museums social media platforms and mediated and mixed reality environments Giannachi tracks the evolution of these diverse archival practices across the centuries Archives today offer a multiplicity of viewing platforms to replay the past capture the present and map our presence Giannachi uses archaeological practices to explore all the layers of the archive analyzing Lynn Herschman Leeson's Women Art Revolution project a digital archive of feminist artists She considers the archive as a memory laboratory with case studies that include visitors encounters with archival materials in the Jewish Museum in Berlin She discusses the importance of participatory archiving examining the multimedia roadshow Digital Diaspora Family Reunion as an example She explores the use of the archive in works that express the relationship between ourselves and our environment citing Andy Warhol and Ant Farm among others And she looks at the transmission of the archive through the body in performance bioart and database artworks closing with a detailed analysis of Lynn Herschman Leeson's Infinity Engine **Arctic Archives** Susi K.
