In the early twentieth century, American photographers who wanted to work in Paris had to find patrons in the United States. The most famous example was a wealthy collector of photography, who was instrumental in getting Alfred Stieglitz and others to Paris in the first years of the century. In fact, Stieglitz's presence in Paris was due to a commission from the French government to make a series of pictures of the city. Image and Enterprise Maureen C. O'Brien, Mary Bergstein, 2000 **Image and enterprise, the photographs of Adolphe Braun** Maureen C. O'Brien, Mary Bergstein, Adolphe Braun, Deborah Bright, Susan Hay, Christian Kempf, Naomi Rosenblum, 2000 *Encyclopedia of Nineteenth-Century Photography* John Hannavy, 2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century. It sets out to be the standard definitive reference work on the subject for years to come. Its coverage is global, an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates, and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool, creative medium, and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics, students, researchers, and libraries worldwide.

Photo Archives and the Place of Photography Geraldine A. Johnson, Deborah Schultz, 2025-02-07 This collection of chapters investigates the effects of mobility and place on a range of photographic archives and explores their potential for cross disciplinary dialogue. The book explores photographic images used in the study of art as well as the implications of placing European images of non European cultures in an archive, album, library, or museum. It also addresses questions of digital space which renders images more visually accessible but further complicates issues relating to location. The contributors consider these issues through case studies based on a variety of archives, institutions, and disciplines. Just as photographs are conceived as unstable objects, so conventional borders between disciplines and locations are challenged and opened up with chapters drawing on a range of disciplinary theories and practices. The focus of the individual chapters is global as seen in contributions not only on Euro American topics but also on Orientalizing approaches to photographing the Ancient Near East, photographic archives of Bedouin subjects, and digital photographic archives in an Iranian context. This book will be of interest to scholars of art history, visual and cultural studies, anthropology, and archaeology, as well as those working on the history and theory of photography and histories and theories of the archive.

Animals in Photographs Arpad Kovacs, 2015-05-26 From the invention of photography up through the internet age, animals have been a frequent subject of the camera's lens, from portraits of beloved pets and exotic creatures to the documentation of human cruelty against them. Drawing on the collection of the J. Paul Getty Museum, this book traces the relationship between animals in photographs and the rapidly advancing technology of photography. From the wild dogs of South Africa to William Wegman's photogenic Weimaraners, from images of Victorian zoos to visions of the heavy toll of game hunting animals on film, are

moving sympathetic and sometimes tragic figures In this vivid and engaging book Arpad Kovacs explores the social symbolic scientific and aesthetic approaches to a subject that has been of continuous interest to photographers across the centuries Over ninety full color plates represent image makers ranging from Felice Beato Eadweard Muybridge Andr Kert sz and Alfred Stieglitz to Berenice Abbott Manuel lvarez Bravo and Man Ray More recent photographers such as Robert Mapplethorpe and Hiroshi Sugimoto are represented along with contemporary artists such as Tim Hawkinson Pieter Hugo and Graciela Iturbide The result is a book that shows the evolution of a photographic obsession that abides to this day This book is published on the occasion of the exhibition In Focus Animalia on view at the J Paul Getty Museum from May 26 to October 18 2015

Documenting the World Gregg Mitman,Kelley Wilder,2016-12-20 Imagine the twentieth century without photography and film Its history would be absent of images that define historical moments and generations the death camps of Auschwitz the assassination of John F Kennedy the Apollo lunar landing It would be a history in other words of just artists renderings and the spoken and written word To inhabitants of the twenty first century deeply immersed in visual culture such a history seems insubstantial imprecise and even perhaps unscientific Documenting the World is about the material and social life of photographs and film made in the scientific quest to document the world Drawing on scholars from the fields of art history visual anthropology and science and technology studies the chapters in this book explore how this documentation from the initial recording of images to their acquisition and storage to their circulation has altered our lives our ways of knowing our social and economic relationships and even our surroundings Far beyond mere illustration photography and film have become an integral transformative part of the world they seek to show us **Still Life in Photography** Paul

Martineau,2010 The genre of still life is considered from a wide range of visual perspectives as it spans the history of photography from the early nineteenth century to the present Regional Dress Sara Hume,2022-06-16 Traditional dress is a common phenomenon across much of Western Europe often originating in elaborate practices for rural religious events Yet despite its fundamentally local nature traditional dress in various European regions developed along a similar trajectory sometimes being transformed into political symbols and regional promotion for tourism and always revealing the complexity of rural society in terms of religious divisions class inequality and tension between the desires to protect tradition and embrace modernity To better understand how traditional dress evolved in France and Germany from the 19th to 21st centuries this book takes Alsace as its case study and in doing so illuminates broad experiences of modernity across rural Europe and answers overarching questions about regionalism and nationalism Specifically Sara Hume unpacks why Alsatian dress was adopted as a symbol of loyalty to France despite being closer in style to German dress practices She explores the impact of political and geographical tensions on the appearance and function of traditional clothing for example in Alsace s situation at the border between France and Germany and in its transformation from disputed territory into capital of a united Europe Logically progressing chapters reveal how modernity did not drive out tradition in rural communities but rather led

to processes of adaption preservation and re evaluation Through a rich variety of primary sources including costumes illustrations political cartoons legal documents and oral histories Regional Dress sheds light on the little known and rarely documented experiences of rural Europeans Its material culture approach to the study of regionalism is essential to students of traditional and folk dress history European history and design history **Humanities** ,2000 *Illustrations, Optics and Objects in Nineteenth-Century Literary and Visual Cultures* L.
