*Visions of the 21st Century and Beyond* Peter Schwartz,2001

**The Nature of Tomorrow** Michael Rawson,2021-11-16

An examination of how Western visions of endless future growth have contributed to the global environmental crisis For centuries the West has produced stories about the future in which humans use advanced science and technology to transform the earth Michael Rawson uses a wide range of works that include Francis Bacon s New Atlantis the science fiction novels of Jules Verne and even the speculations of think tanks like the RAND Corporation to reveal the environmental paradox at the heart of these narratives the single minded expectation of unlimited growth on a finite planet Rawson shows how these stories which have long pervaded Western dreams about the future have helped to enable an unprecedentedly abundant and technology driven lifestyle for some while bringing the threat of environmental disaster to all Adapting to ecological realities he argues hinges on the ability to create new visions of tomorrow that decouple growth from the idea of progress

Ofra Amihay,Lauren Walsh,2012-01-17 The question of the relation between the visual and the textual in literature is at the heart of an increasing number of scholarly projects and in turn the investigation of evolving visual verbal dynamics is becoming an independent discipline This volume explores these profound literary shifts through the work of twelve talented and in some cases emerging scholars who study text and image relations in diverse forms and contexts The inter medial conjunctures investigated in this book play with and against the traditional roles of the visual and the verbal The Future of Text and Image presents explorations of the incorporation of visual elements into works of literature of visual writing modes and of the textuality and literariness of images It focuses on the special potential literature offers for the combination of these two functions Alongside examinations of major forms and genres such as memoirs novels and poetry this volume expands the discussion of text and image relations into more marginal forms for instance collage books the PostSecret collections of anonymous postcards and digital poetry In other words while exploring the destiny of text and image as an independent discipline this volume simultaneously looks at the very literal future of text and image forms in an ever changing technological reality The essays in this book will help to define the emergent practices and politics of this growing field of study and at the same time reflect the tremendous significance of the visual in today s image culture

**Truth and Freedom in the Global Village** Thomas R. McFaul,2009-11-19 This book offers a bold forecast of the year 2050 and what life will look like in the emerging global village Is this profound new work Thomas McFaul examines the interwoven concepts of truth and freedom in the context of the Modernist movement that has fundamentally reshaped our world McFaul s thesis Societies that make truth and freedom their signature values stand the best chance of prospering in the emerging global village In The Future of Truth and Freedom in the Global Village Modernism and the Challenges of the Twenty first

Century McFaul relates the two cornerstone ideas of truth and freedom to the development of Modernism and its impact on science religion ethics economics and politics This sets the stage for thought provoking speculation as McFaul forecasts what life might be like in the year 2050 with scenarios that range from moving forward as a unified world embracing new possibilities to sliding back to the good old days McFaul s well reasoned conclusion is that any society s long term viability rests on having the freedom to adapt to changes in the modern world in new and creative ways **The Futurist** ,1990

World-future Images in Children's Literature Lillian Biermann Wehmeyer,1978 Beyond the Image Machine David Tomas,2004-03-01 Beyond the Image Machine is an eloquent and stimulating argument for an alternative history of scientific and technological imaging systems Drawing on a range of hitherto and marginalised examples from the world of visual representation and the work of key theorists and thinkers such as Latour de Certeau McLuhan and Barthes David Tomas offers a disarticulated and deviant view of the relationship between archaic and new representations imaging technologies and media induced experience Rejecting the possibility of absolute forms of knowledge Tomas shows how new media technologies have changed the nature of established disciplines The book develops Tomas s own theory of transcultural space and makes several original contributions to current debates on the culture of advanced technology Educating Beyond Violent Futures Francis Hutchinson,2005-06-27 As we enter the Twenty First Century it is easy to assume that worsening trends in violence will be a feature of our lives whether in our schools our societies or as a species Educating Beyond Violent Futures challenges assumptions that trends in violence are destiny and raises crucial questions about choice and engagement Drawing upon new research this book is essential reading for those who want to prepare our children for living constructively in the next century *War beyond Words* Jay Winter,2017-07-06 What we know of war is always mediated knowledge and feeling We need lenses to filter out some of its blinding terrifying light These lenses are not fixed they change over time and Jay Winter s panoramic history of war and memory offers an unprecedented study of transformations in our imaginings of war from 1914 to the present He reveals the ways in which different creative arts have framed our meditations on war from painting and sculpture to photography film and poetry and ultimately to silence as a language of memory in its own right He shows how these highly mediated images of war in turn circulate through language to constitute our cultural memory of war This is a major contribution to our understanding of the diverse ways in which men and women have wrestled with the intractable task of conveying what twentieth century wars meant to them and mean to us
