**Picture World** Rachel Teukolsky, 2020 Explores the ways in which new forms of visual culture such as the illustrated newspaper the cheap caricature cartoon the affordable illustrated book the portrait photograph and the advertising poster worked to shape key Victorian aesthetic concepts

**Grammatology of Images** Sigrid Weigel, 2022-08-16 Grammatology of Images radically alters how we approach images Instead of asking for the history power or essence of images Sigrid Weigel addresses imaging as such The book considers how something a visible gets transformed into an image Weigel scrutinizes the moment of mis en apparition of making an appearance and the process of concealment that accompanies any imaging Weigel reinterprets Derrida's and Freud's concept of the trace as that which must be thought before something exists In doing so she illuminates the threshold between traces and iconic images between something immaterial and its pictorial representation Chapters alternate between general accounts of the line the index the effigy and the cult image and case studies from the history of science art politics and religion involving faces as indicators of emotion caricatures as effigies of defamation and angels as embodiments of transcendental ideas Weigel's approach to images illuminates fascinating unexpected correspondences between premodern and contemporary image practices between the history of religion and the modern sciences and between things that are and are not understood as art

**The Pensive Image** Hanneke Grootenboer, 2021-02-16 Grootenboer considers painting as a form of thinking in itself rather than a subject of philosophical and interpretive thought While the philosophical dimension of painting has long been discussed a clear case for painting as a form of visual thinking has yet to be made Traditionally vanitas still life paintings are considered to raise ontological issues while landscapes direct the mind toward introspection Grootenboer moves beyond these considerations to focus on what remains unspeakable in painting the implicit and inexpressible that manifests in a quality she calls pensiveness Different from self-aware or actively desiring images pensive images are speculative pointing beyond interpretation An alternative pictorial category pensive images stir us away from interpretation and toward a state of suspension where thinking through and with the image can start In fluid prose Grootenboer explores various modalities of visual thinking as the location where thought should be found as a refuge enabling reflection and as an encounter that provokes thought Through these considerations she demonstrates that artworks serve as models for thought as much as they act as instruments through which thinking can take place Starting from the premise that painting is itself a type of thinking The Pensive Image argues that art is capable of forming thoughts and shaping concepts in visual terms

**The Terrorist Image** Charlie Winter, 2022-04-22 The summer of 2014 when the Islamic State seized Mosul Iraq's second city captured vast swathes of eastern Syria and declared itself a latter day Caliphate marked a turning point in the history of photography one that pushed its already contested relationship with reality to its very limits Uniquely obsessed with narrative image management and branding the Islamic State used cameras as weapons in its formative years as a Caliphate The tens of thousands of

propaganda photographs captured during this time were used to denote policy to navigate through defeat and perhaps most importantly to construct an impossible reality a totalising image world of Salafi Jihadist symbols and myths Based on a deep examination of the 20 000 photographs Charlie Winter collected from the Islamic State s covert networks online in 2017 this book explores the process by which the Caliphate shook the foundations of modern war photography Focusing on the period in which it was at its strongest Winter identifies the implicit value systems that underpinned the Caliphate s ideological appeal and evaluates its uniquely malign contribution to the history of the photographic image The Terrorist Image travels to the heart of what made the Islamic State tick during its prime providing unique insights into its global appeal and mobilisation successes

**Image, History and Memory** Michał Haake, Piotr Juszkiewicz, 2022-02-22 This book discusses the active relationship among the mechanics of memory visual practices and historical narratives Reflection on memory and its ties with historical narratives cannot be separated from reflection on the visual and the image as its points of reference which function in time This volume addresses precisely that temporal aspect of the image without reducing it to a neutral trace of the past a mnemotechnical support of memory As a commemorative device the image fixes structures and crystalizes memory turning the view of the past into myth It may however also stimulate transform and update memory functioning as a matrix of interpretation and understanding the past The book questions whether the functioning of the visual matrices of memory can be related to a particular historical and geographical scope that is to Central and Eastern Europe and whether it is possible to find their origin and decide if they are just local and regional or perhaps also Western European and universal It focuses on the artistic reflection on time and history in the reconstructions of memory due to change of frontiers and political regimes as well as endeavours to impose some specific political structure on territories which were complex and mixed in terms of national identity religion and social composition The volume is ideal for students and scholars of memory studies history and visual studies *The Ethical Implications of Bergson's Philosophy* Mrs. Una Mirrielees Bernard Sait, 1914

**Archives of Philosophy ...**, 1914 **Expo Sixty Seven** Rhona Richman Kenneally, Johanne Sloan, 2010-01-01 Expo 67 the world's fair held in Montreal during the summer of 1967 brought architecture art design and technology together into a glittering modern package Heralding the ideal city of the future to its visitors the Expo site was perceived by critics as a laboratory for urban and architectural design as well as for cultural exchange intended to enhance global understanding and international cooperation This collection of essays brings new critical perspectives to Expo 67 an event that left behind a significant material and imaginative legacy The contributors to this volume reflect a variety of interdisciplinary approaches and address Expo 67 across a broad spectrum ranging from architecture and film to more ephemeral markers such as

postcards menus pavilion displays or the uniforms of the hostesses employed on the site Collectively the essays explore issues of nationalism the interplay of tradition and modernity twentieth century discourse about urban experience and the enduring impact of Expo 67 s technological experimentation Expo 67 Not Just a Souvenir is a compelling examination of a world s fair that had a profound impact locally nationally and internationally Film and the American Presidency Jeff Menne,Christian B. Long,2015-02-20 The contention of Film and the American Presidency is that over the twentieth century the cinema has been a silent partner in setting the parameters of what we might call the presidential imaginary This volume surveys the partnership in its longevity placing stress on especially iconic presidents such as Lincoln and FDR The contributions to this collection probe the rich interactions between these high institutions of culture and politics Hollywood and the presidency and argue that not only did Hollywood acting become an idiom for presidential style but that Hollywood early on understood its own identity through the presidency s peculiar mix of national epic and unified protagonist Additionally they contend that studios often made their films to sway political outcomes that the performance of presidential personae has been constrained by the kinds of bodies for so long white and male that have occupied the office such that presidential embodiment obscures the body politic and that Hollywood and the presidency may finally be nothing more than two privileged figures of media age power *The World's Great Confessions* ,1929 The confessions of Jean Jacques Rousseau The autobiography of Benvenuto Cellini The confessions of an English opium eater by Thomas De Quincey The memoirs of Madame de Pompadour The autobiography of Benjamin Franklin The confessions of St Augustine
