The World of Rural Dissenters, 1520-1725 Margaret Spufford,1995-03-16 There has been dispute amongst social historians about whether only the more prosperous in village society were involved in religious practice A group of historians working under Dr Spufford s direction have produced a factual solution to this dispute by examining the taxation records of large groups of dissenters and churchwardens and have established that both late Lollard and post Restoration dissenting belief crossed the whole taxable spectrum We can no longer speak of religion as being the prerogative of either weavers and threshers or on the other hand of village elites The group also examined the idea that dissent descended in families and concluded that this was not only true but that such families were the least mobile population group so far examined in early modern England probably because they were closely knit and tolerated in their communities The cause of the apparent correlation of dissenting areas and areas of early by employment was also questioned The group concludes that travelling merchants and carriers on the road network carried with them radical ideas and dissenting print the content of which is examined as well as goods In her own substantial chapter Dr Spufford draws together the pieces of the huge mosaic constructed by her team of contributors adds radical ideas of her own and disagrees with much of the prevailing wisdom on the function of religion in the late seventeenth century Professor Patrick Collinson has contributed a critical conclusion to the volume This is a book which breaks new ground and which offers much original material for ecclesiastical cultural demographic and economic historians of the period

Picture World Rachel Teukolsky,2020-08-16 The modern media world came

into being in the nineteenth century when machines were harnessed to produce texts and images in unprecedented numbers. In the visual realm new industrial techniques generated a deluge of affordable pictorial items: mass printed photographs, posters, cartoons, and illustrations. These alluring objects of the Victorian parlor were miniaturized spectacles that served as portals onto phantasmagoric versions of the world. Although new kinds of pictures transformed everyday life, these ephemeral items have received remarkably little scholarly attention. *Picture World* shines a welcome new light onto these critically neglected yet fascinating visual objects. They serve as entryways into the nineteenth century's key aesthetic concepts. Each chapter pairs a new type of picture with a foundational keyword in Victorian aesthetics, a familiar term reconceived through the lens of new media. Character appears differently when considered with caricature in the new comics and cartoons appearing in the mass press in the 1830s; likewise, the book approaches realism through pictorial journalism, illustration via illustrated Bibles, sensation through carte de visite portrait photographs, the picturesque by way of stereoscopic views, and decadence through advertising posters. *Picture World* studies the aesthetic effects of the nineteenth century's media revolution; it uses the relics of a previous era's cultural life to interrogate the Victorian world's most deeply held values, arriving at insights still relevant in our own media age.

Reassesses major axial alignment at many megalithic ritual and funerary monuments Neolithic to Bronze Age in Britain and Ireland not in terms of abstract astronomical concerns but as an expression of repeated seasonal propitiation involving community agrarian economy and ancestry in an attempt to mitigate variable environmental conditions.

Ridges in Image and Data Analysis David Eberly, 1996-09-30. The concept of ridges has appeared numerous times in the image processing literature. Sometimes the term is used in an intuitive sense. Other times a concrete definition is provided. In almost all cases the concept is used for very specific applications. When analyzing images or data sets it is very natural for a scientist to measure critical behavior by considering maxima or minima of the data. These critical points are relatively easy to compute. Numerical packages always provide support for root finding or optimization whether it be through bisection, Newton's method, conjugate gradient method, or other standard methods. It has not been natural for scientists to consider critical behavior in a higher order sense. The concept of ridge as a manifold of critical points is a natural extension of the concept of local maximum as an isolated critical point. However, almost no attention has been given to formalizing the concept. There is a need for a formal development. There is a need for understanding the computation issues that arise in the implementations. The purpose of this book is to address both needs by providing a formal mathematical foundation and a computational framework for ridges. The intended audience for this book includes anyone interested in exploring the usefulness of ridges in data analysis.

The Amateur Photographer & Photography ,1922 **Perceptions of Retailing in Early Modern England** Nancy Cox,Karin Dannehl,2017-05-15 Whilst there has been much recent scholarly work on retailing during the early modern period less is known about how people at the time perceived retailing both as onlookers artists and commentators and as participants Centred on the general theme of perceptions the authors address this gap in our knowledge by looking at a different aspect of consumption They focus on two ancillary themes the first is location and how contemporaries perceived the settlements in which there were shops the other is distance Pictures prints novels diaries and promotional literature of the tradespeople themselves provide much of the evidence Many of these sources are not new

to historians but they have not been scrutinized and analysed with the questions in mind that are posed here The methodology to be employed has been developed by Nancy Cox over the last decade and is used successfully in her book The Complete Tradesman and in the compilation of the forthcoming Dictionary of Traded Goods and Commodities 1550 1800 This book will find a ready market with scholars concerned with British social and economic history in the early modern period Although it is first and foremost a book written by historians for historians it nevertheless borrows concepts and approaches from various disciplines concerned with theories of consumption material culture and representational art **The JFK**
