Images And Memories Georgia Tech 18851985:

Georgia Tech Matthew Hild, 2018-08-06 Georgia Tech has become one of the nation's top 10 ranked public universities and boasts a former U.S. president, TV personality and Hall of Fame athletes among its prominent alumni. From humble beginnings as a small technological institute that opened in 1888, Georgia Tech is now renowned throughout the world for its excellence in technological education and research. A top 10 ranked public university according to U.S. News World Report rankings, famous Georgia Institute of Technology alumni include Jimmy Carter, G. Wayne Clough, Jeff Foxworthy, Sam Nunn, Randolph Scott, and Leonard Wood, along with many famous athletes. Georgia Tech has won four national college football championships, the first in 1917 under the legendary coach John Heisman. Today Georgia Tech has a student body of more than 29,000 at the undergraduate and graduate levels and more than 155,000 living alumni. The institute has an annual economic impact of about \$3 billion upon Georgia's economy. Authors and Tech alumni Matthew Hild and David L. Morton take you inside the journey of how this institute got to where it is today.

Girls Coming to Tech! Amy Sue Bix, 2022-11-01 How women coped with both formal barriers and informal opposition to their entry into the traditionally masculine field of engineering in American higher education. Engineering education in the United States was long regarded as masculine territory. For decades, women who studied or worked in engineering were popularly perceived as oddities, outcasts, unfeminine or inappropriately feminine in a male world. In *Girls Coming to Tech*, Amy Bix tells the story of how women gained entrance to the traditionally male field of engineering in American higher education. As Bix explains, a few women breached the gender-reinforced boundaries of engineering education before World War II. During World War II, government employers and colleges actively recruited women to train as engineering aides, channeling them directly into defense work. These wartime training programs set the stage for more engineering schools to open their doors to women. Bix offers three detailed case studies of postwar engineering coeducation. Georgia Tech admitted women in 1952 to avoid a court case over objections by traditionalists. In 1968, Caltech male students argued that nerds needed a civilizing female presence. At MIT, which had admitted women since the 1870s but treated them as a minor afterthought, feminist-era activists pushed the school to welcome more women and take their talent seriously. In the 1950s, women made up less than one percent of students in American engineering programs. In 2010 and 2011, women earned 18.4% of bachelor's degrees, 22.6% of master's degrees, and 21.8% of doctorates in engineering. Bix's account shows why these gains were hard won.
