Musical Imagery R.I. Godoy, H. Jorgensen, 2012-10-12 An edited collection of papers which explore a large number of topics related to musical imagery Musical imagery can be defined as our mental capacity for imagining sound in the absence of a directly audible sound source meaning that we can recall and re experience or even invent new musical sound through our inner ear The first part of the volume is focused on theoretical issues such as the history epistemology neurological bases and cognitive models of musical imagery The second part presents various applications of musical imagery in performance and composition and provides the reader with a broad overview of the many musical activities which are concerned with musical imagery Musical imagery is a truly interdisciplinary subject and it is the belief of the editors that a plurality of approaches ranging from the introspective and philosophical to the experimental and computational is the most fruitful strategy for exploring the subject of musical imagery

The Rhythm Image Steven Shaviro, 2022-11-17 Music videos play a critical role in our age of ubiquitous streaming digital media They project the personas and visions of musical artists they stand at the cutting edge of developments in popular culture and they fuse and revise multiple frames of reference from dance to high fashion to cult movies and television shows to Internet memes Above all music videos are laboratories for experimenting with new forms of audiovisual expression The Rhythm Image explores all these dimensions The book analyzes in depth recent music videos for artists ranging from pop superstar The Weeknd to independent women artists like FKA twigs and Dawn Richard The music videos discussed in this book all treat the traditional themes of popular music sex and romance money and fame and the lived experiences of race and gender But they twist these themes in strange and unexpected ways in order to reflect our entanglement with a digital world of social media data gathering and 24 7 demands upon our attention
