Imaginary Lands:

Building Imaginary Worlds Mark J.P. Wolf, 2014-03-14 Mark J P Wolf's study of imaginary worlds theorizes world building within and across media including literature comics film radio television board games video games the Internet and more Building Imaginary Worlds departs from prior approaches to imaginary worlds that focused mainly on narrative medium or genre and instead considers imaginary worlds as dynamic entities in and of themselves Wolf argues that imaginary worlds which are often transnarrative transmedial and transauthorial in nature are compelling objects of inquiry for Media Studies Chapters touch on a theoretical analysis of how world building extends beyond storytelling the engagement of the audience and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's Odyssey to the present internarrative theory examining how narratives set in the same world can interact and relate to one another an examination of transmedial growth and adaptation and what happens when worlds make the jump between media an analysis of the transauthorial nature of imaginary worlds the resulting concentric circles of authorship and related topics of canonicity participatory worlds and subcreation's relationship with divine Creation Building Imaginary Worlds also provides the scholar of imaginary worlds with a glossary of terms and a detailed timeline that spans three millennia and more than 1 400 imaginary worlds listing their names creators and the works in which they first appeared

Dynamic Play and Creative Movement Judith Peck, 2022-10-31 Dynamic Play and Creative Movement offers effective and accessible methods to supplement elementary education for young children using dance movement and play Imagination physical energy and the need for self expression are childhood qualities recognized by parents but are not sufficiently valued to be applied to formal education Yet when valued as natural endowments they might intelligently be used to increase a child's perceptive abilities and self confidence essential to learning These three qualities combine in dynamic play a term devised by the author to describe an approach to learning Through physical participation children deal with concepts ideas and emotions while they reach out to touch a vast world of people animals nature and activities The chapters provide for improvisations in music visual art drama and stories in addition to topics related to the changing seasons sports school subjects travel games and many other elements of the natural and man made world Research about the correlation of movement to brain activity is included to support the thesis that creative movement is an effective adjunct to learning Therapists counselors and preschool and elementary teachers will find this easily adaptable material valuable in fostering perception insight and cognitive understanding in children

Domicide Ammar Azzouz, 2023-07-13 The city of Homs like so many places in Syria has suffered

mass destruction since the war began in 2011 So far the architectural response to the crisis has focused on cultural heritage ancient architecture and the external displacement of refugees often neglecting the everyday lives of Syrians and the buildings that make up their homes and communities In Domicide Ammar Azzouz uses the notion of the home to address the destruction in cities like Homs the displacement of Syrian people both externally and internally and to explore how cities can be rebuilt without causing further damage to the communities that live there Drawing on interviews with those working in the built environment professions both inside and outside of Syria but also Syrians from other backgrounds who have become architects in their own way as they were forced to repair and rebuild their homes by themselves Domicide offers fresh insight into the role of the architect during time of war and explores how the future reconstruction of cities should mirror the wants and needs the traditions and ways of living of local communities Focusing on Homs but offering a blueprint for other urban areas of conflict across Syria and the wider world the book is essential reading for researchers in architecture urban planning heritage studies and conflict studies [Library of Congress Subject Headings](#) Library of Congress.
