Zeydel, Bertha M. Masche, 1967 **Contemplating Violence** Stefani Engelstein, Carl Niekerk, 2015-06-29 Illuminates the treatment of violence in the German cultural tradition between the French Revolution and the Holocaust and Second World War The Philosophical Foundations of Early German Romanticism Manfred Frank, 2012-02-01 Often portrayed as a movement of poets lost in swells of passion early German Romanticism has been generally overlooked by scholars in favor of the great system builders of the post Kantian period

Schelling and Hegel In the twelve lectures collected here Manfred Frank redresses this oversight offering an in depth exploration of the philosophical contributions and contemporary relevance of early German Romanticism Arguing that the early German Romantics initiated an original movement away from idealism Frank brings the leading figures of the movement Friedrich Schlegel and Friedrich von Hardenberg Novalis into concert with contemporary philosophical developments and explores the role that Friedrich Schlegel and other members of the Homburg Circle had upon the development of early German Romantic philosophy

*Collective Creativity* Gerhard Fischer, Florian Vassen, 2011 Collective Creativity combines complex and ambivalent concepts While creativity is currently experiencing an inflationary boom in popularity the term collective appeared until recently rather controversial due to its ideological implications in twentieth century politics In a world defined by global cultural practice the notion of collectivity has gained new relevance This publication discusses a number of concepts of creativity and shows that in opposition to the traditional ideal of the individual as creative genius cultural theorists today emphasize the collaborative nature of creativity they show that creativity makes alterity discontinuity and difference attractive Not the Romantic Originalgenie but rather the agents of the creative economy appear as the new avant garde of aesthetic innovation teams groups and collectives in business and science in art and digital media who work together in networking clusters to develop innovative products and processes In this book scholars in the social sciences and in cultural and media studies in literature theatre and visual arts present for the first time a comprehensive inter and transdisciplinary account of collective creativity in its multifaceted applications They investigate the intersections of artistic scientific and cultural practice where the individual and the collective merge come together or confront each other

*Memory in German Romanticism* Christopher R. Clason, Joseph D. Rockelmann, Christina M. Weiler, 2023-03-31 Memory in German Romanticism treats memory as a core element in the production and reception of German art and literature of the Romantic era The contributors explore the artistic expression of memory under the categories of imagination image and reception Romantic literary aesthetics raises the subjective imagination to a level of primary importance for the creation of art It goes beyond challenging reason and objectivity two leading intellectual faculties of eighteenth century Enlightenment and instead elevates subjective invention to form and sustain memory and imagination Indeed memory and imagination both cognitive functions seek to assemble the elements of one's own experience either directed toward the past memory or toward the future imagination coherently into a narrative And like memories images hold the potential to elicit charged emotional responses those responses live on through time becoming part of the spatial and temporal reception of the artist and their work While imagination generates and images trigger and capture memories reception creates a temporal spatial context for art organizing it and rendering it memorable both for good and for bad Thus through the categories of imagination image and reception this volume explores the phenomenon of German Romantic memory from different perspectives and in new contexts
