Robert Adelson, Alain Roudier, Jenny Nex, Laure Barthel, Michel Foussard, 2015-06-11 Sébastien Erard and the firm that carried his name are seminal in the history of musical instruments Erard's inventions especially the double escapement for the piano and the double action for the harp have had an enormous impact on instruments and musical life and are still at the foundation of piano and harp building today The recently discovered archives of the Erard piano and harp building firm are perhaps the largest and most complete record of musical instrument making anywhere containing never before published correspondence from musicians including Mendelssohn Liszt and Fauré These volumes present the archive's records and documents in two parts the first relating to inventions business composers and performers and the second to the Erard family correspondence In both the original French and with English translations the documents offer fascinating insights into the musical landscape of Europe from the start of Erard's career in 1785 to the closure of the firm in 1959 *The Modern*

Borgato, Erwin Neuenschwander, Irène Passeron, 2019-03-22 Mathematical correspondence offers a rich heritage for the history of mathematics and science as well as cultural history and other areas. It naturally covers a vast range of topics and not only of a scientific nature; it includes letters between mathematicians but also between mathematicians and politicians, publishers and men or women of culture. Wallis, Leibniz, the Bernoullis, D'Alembert, Condorcet, Lagrange, Gauss, Hermite, Betti, Cremona, Poincaré and van der Waerden are undoubtedly authors of great interest and their letters are valuable documents but the correspondence of less well known authors too can often make an equally important contribution to our understanding of developments in the history of science. Mathematical correspondences also play an important role in the editions of collected works contributing to the reconstruction of scientific biographies as well as the genesis of scientific ideas and in the correct dating and interpretation of scientific writings. This volume is based on the symposium Mathematical Correspondences and Critical Editions held at the 6th International Conference of the ESHS in Lisbon, Portugal in 2014. In the context of the more than fifteen major and minor editions of mathematical correspondences and collected works presented in detail, the volume discusses issues such as History and prospects of past and ongoing edition projects, Critical aspects of past editions, The complementary role of printed and digital editions, Integral and partial editions of correspondence, Reproduction techniques for manuscripts, images and formulae and the editorial challenges and opportunities presented by digital technology.

Erard Robert Adelson, 2021 Erard A Passion for the Piano shows how the Erard piano played an important and often leading role in the history of the instrument beginning in the late eighteenth century and continuing into the final decades of the nineteenth.
