Time, Narrative & the Fixed Image / Temps, narration & image fixe, 2021-10-18 This volume focuses on the relationship between time narrative and the fixed image. As such it highlights renewed interest in the temporality of the fixed image, probably one of the most important trends in the formal and semiotic analysis of visual media in the past decade. The various essays discuss paintings, the illustrated covers of books, comics or graphic novels, photo stories, postcards, television and video art, as well as aesthetic practices that defy categorization such as Chris Marker's masterpiece *La Jetée*. The range of works and practices examined is reflected in the different theoretical approaches and methods used, with an emphasis on semiology and narratology and, to a lesser extent, aesthetics and psychoanalysis. The interest of this book, however, does not stem exclusively from the range and scope of the artefacts examined or the methodological issues that are addressed; its fundamental importance rests in the contributors' readiness to question the differentiation between fixed and moving images, which all too often provides a convenient if not altogether convincing starting point for image analysis. The originality and value of the contribution that *Time Narrative and the Fixed Image* makes to the body of theoretical writing on visual media lies in this challenging and comprehensive approach.

L'évolution créatrice est une œuvre majeure du philosophe français Henri Bergson (1859-1941). Publiée en 1907, cette œuvre a eu un impact significatif sur la philosophie et a influencé divers domaines, y compris la philosophie de la biologie, la métaphysique et même la littérature. Dans *L'évolution créatrice*, Bergson remet en question les conceptions mécanistes de l'évolution et de la vie. Il propose une vision de l'évolution basée sur la créativité et la vitalité. Bergson soutient que la réalité n'est pas simplement une succession d'états figés, mais plutôt un processus dynamique et créatif. Il explore le concept de durée, s'opposant à la conception newtonienne du temps linéaire et immuable. L'idée centrale de Bergson dans cette œuvre est la notion d'élan vital, une force créative inhérente à la vie qui pousse l'évolution vers des formes de plus en plus complexes. Il explore également la tension entre l'intelligence, la faculté analytique et l'intuition, la capacité de saisir l'élan vital de manière immédiate. *L'évolution créatrice* a suscité des débats et des discussions animés.

notamment avec d'autres philosophes de l'époque comme William James et Alfred North Whitehead. L'œuvre a contribué à fonder la philosophie du XXe siècle et a inspiré des penseurs dans des domaines divers y compris la philosophie de la biologie et la philosophie de la science.
