

What is Liberal Education Today?

- ◆ A philosophy of education that empowers individuals with core knowledge and transferable skills, and a strong sense of ethics, values, and civic engagement.
- ◆ Involving challenging intellectual encounters with important and relevant issues today and throughout history, a liberal education prepares graduates for socially valued work and civic leadership.
- ◆ A liberal education usually includes a general education curriculum that provides broad exposure to multiple disciplines and ways of knowing, along with more in-depth study in one or more field.
- ◆ A liberal education provides students with the knowledge and skills employers are calling for and the society needs.

Liberal Education In A Knowledge Society

Yuh Huann Tan, Seng Chee Tan

Liberal Education In A Knowledge Society:

Liberal Education in a Knowledge Society Barry Smith, 2002 Liberal education was once governed by a canon a recognized body of knowledge considered essential for transmission from one generation to the next These essays examine the plight of modern educational theory in a world trying to cope with information overload without the guidance of a canon Contributors include Carl Bereiter Gordon Wells and James Miller *Liberal Education in a Knowledge Society* Barry Smith, 2002 An essay by Carl Bereiter followed by comments on his work by other writers and Bereiter's response to these writers Liberalism, Human Values and Schools as Microcosms of Society Martin Cohen, 2025-03-31 This seminal volume provides an accessible overview of key ethical and philosophical debates surrounding contemporary education policy advocating for a future in education that is primarily driven by prioritising social values Grounded in the educational ideas of recent British liberal and philosophical thinkers including Roger Scruton Mary Midgley and Brenda Almond in particular the book provides a deeper understanding of the importance of intellectual and moral freedom as it plays out in today's schools The book echoes Almond's call for education to be viewed through the lens of social values and argues for a broader societal strategy to the philosophy of education than narrowly utilitarian attempts to prepare pupils for the labour market Chapters present various debates in society that relate to liberalism social values and utilitarianism and ultimately encourage dialogue on the approach towards education that is necessary to create a socially adjusted thoughtful and genuinely knowledgeable society of the future By encouraging readers to think about the requirements of the schools of tomorrow along with their role in shaping both individual lives and society itself this book will be of interest to scholars postgraduate students and researchers in the fields of philosophy of education education studies and moral and value education Those interested in the sociology of education and citizenship studies more broadly will also benefit from the volume Emerging Pedagogies in the Networked Knowledge Society: Practices Integrating Social Media and Globalization Limbu, Marohang, Gurung, Binod, 2013-11-30 Since the dawn of the digital era the transfer of knowledge has shifted from analog to digital local to global and individual to social Complex networked communities are a fundamental part of these new information based societies *Emerging Pedagogies in the Networked Knowledge Society Practices Integrating Social Media and Globalization* examines the production dissemination and consumption of knowledge within networked communities in the wider global context of pervasive Web 2.0 and social media services This book will offer insight for business stakeholders researchers scholars and administrators by highlighting the important concepts and ideas of information and knowledge based economies

Knowledge Society, Information Society and Adult Education Agnieszka Bron, 2003 At the end of the twentieth century the concept of knowledge advanced to become one of the central factors of society and seemed to gain in importance in the twenty first century mostly understood as know how and technical knowledge Next to globalisation knowledge seems to be the leading term both in public as well as in scientific discourses What is more the prominent status of knowledge is

also reflected in the fact that it is used particularly in social sciences to explain complex social transitions and changes. Thus one of the most widely discussed and debated social diagnoses takes place under the term Knowledge Society. However, the academic discipline of adult education has not yet profoundly engaged in the discourse on Knowledge Society. This book brings together a cross section of European researchers in adult education who have contributed to the discourse on Knowledge Society from various perspectives. By presenting their recent research results, the book provides an overview of key concepts within the European discourse which, according to observations, is only at the beginning.

Education for a Knowledge Society in Arabian Gulf Countries Alexander W. Wiseman, Naif H. Alromi, Saleh A. Alshumrani, 2014-03-10. This volume investigates the agendas and initiatives for using education to transition Gulf communities from being dependent on natural resources into knowledge societies. This volume presents information case studies and empirical research about the development of information based economies across the Arabian Gulf as a whole.

The Routledge Companion to Education James Arthur, Andrew Peterson, 2013-07-23. The Routledge Companion to Education presents the most comprehensive up to date guide available to the major topics and theories in education. Forty specially commissioned chapters covering all aspects of education introduce you to the key thinkers, events, ideas, research, and issues that have shaped the field of education.

Liberal Education and Citizenship in a Free Society Justin Buckley Dyer, Constantine Christos Vassiliou, 2023-07-24. The liberal arts university has been in decline since well before the virtualization of campus life, increasingly inviting public skepticism about its viability as an institution of personal, civic, and professional growth. New technologies that might have brought people together have instead frustrated the university's capacity to foster thoughtful citizenship among tomorrow's leaders and exacerbated socioeconomic inequalities that are poisoning America's civic culture. With *Liberal Education and Citizenship in a Free Society*, a collection of 19 original essays, editors Justin Dyer and Constantine Vassiliou present the work of a diverse group of scholars to assess the value of a liberal arts education in the face of market, technological, cultural, and political forces shaping higher learning today.

Universities in the Knowledge Society Timo Aarrevaara, Martin Finkelstein, Glen A. Jones, Jisun Jung, 2021-09-28. Springer is proud to announce that *Universities in the Knowledge Society* has received the ASHE CIHE award for Significant Research on International Higher Education. Congratulations to Timo Aarrevaara, Martin Finkelstein, Glen A. Jones, Jisun Jung, and all contributors. This book explores the complex, multi-faceted relationships between national research and innovation systems and higher education. The transition towards knowledge societies/economies is repositioning the role of the university and transforming the academic profession. The volume provides a foundational introduction to the concepts of knowledge society and knowledge economy, and these concepts ground the detailed case studies of eighteen systems located across five continents. Each case study was written by a leading expert in that jurisdiction and provides a critical analysis of the research and development infrastructure, the role of universities, and the implications for the academic profession. The book describes how nations in various

geographic regions and at various stages of economic maturity are restructuring their university systems to adapt to the new imperatives and provides a cross case analysis identifying common themes and distinctive features In telling the story of higher education s on going global metamorphosis the contributing authors place current developments in the context of the university s historic evolution survey the changing metrics that national governments are adopting to measure university performance and describe a new international project the Academic Profession in the Knowledge based Society APiKS that involved a common survey of academics in more than twenty countries to take the pulse of developments on the ground while documenting the challenges confronting knowledge workers in the new economy *Handbook of Research on Advancing Critical Thinking in Higher Education* Wisdom, Sherrie,Leavitt, Lynda,2015-07-17 The importance of critical thinking has surged as academics in higher education realize that many students upon entering college lack the critical thinking skills necessary to succeed While much has been written regarding the lack of critical thinking less has been written on the success of methods implemented to develop this fundamental skill The Handbook of Research on Advancing Critical Thinking in Higher Education explores the effective methods and tools being used to integrate the development of critical thinking skills in both undergraduate and graduate studies Due to the difficulties associated with teaching critical thinking skills to learners of any age this publication is a crucial addition to the scholarly reference works available to pre service and early career teachers seasoned educational professionals professors across disciplines curriculum specialists and educational administrators The Emergent Knowledge Society and the Future of Higher Education Deane E. Neubauer,2011-12-13 The nature of higher education is by no means fixed it has evolved over time different models of higher education co exist alongside each other at present and worldwide there are demands for higher education to change to better help support economic growth and to better fit chagnig social and economic circumstances This book examines from an Asian perspective the debates about how higher education should change It considers questions of funding and of who will attend universities and the fundamental question of what universities are for especially as the three key funcations of universities knowledge creation through research knowledge dissemination through teaching and service and knowledge conservation through libraries the disciplinary structuring of knowledge and in other ways are increasingly being carried out much more widely outside universities in the new knowledge society Throughout the book discusses the extent to which the countries of East Asia are developing new models of higher education thereby better preparing themselves for the new knowledge society rather than simply following old Western models **Knowledge Society vs. Knowledge Economy** S. Sörlin,H. Vessuri,2007-02-05 A new collection in the IAU Issues in Higher Education Series that deals with the major tensions between education and science Drawing on experiences from a range of countries and regions the book demonstrates the need to find new avenues for the management of knowledge production to ensure that it can meet increasingly global goals and demands **Impacts of the Knowledge Society on Economic and Social Growth in Africa** Amoah, Lloyd G. Adu,2014-03-31 In a

world that is essentially digitizing some have argued that the idea of the knowledge society holds the greatest promise for Africa's rapid socio-economic transformation. **Impacts of the Knowledge Society on Economic and Social Growth in Africa** aims to catalyze thinking and provide relevant information on the complex ways in which the information age is shaping Africa and the implications that this will have for the continent and the world. This premier reference volume will provide policy analysts, policymakers, academics and researchers with fresh insights into the key empirical and theoretical matters framing Africa's ongoing digitization.

Education and Mind in the Knowledge Age Carl Bereiter, 2005-04-11 In this book Carl Bereiter, a distinguished and well-known cognitive educational psychologist, presents what he calls a new way of thinking about knowledge and the mind. He argues that in today's Knowledge Age, education's conceptual tools are inadequate to address the pressing educational challenges and opportunities of the times. Two things are required: first, to replace the mind-as-container metaphor with one that envisions a mind capable of sustaining knowledgeable intelligent behavior without actually containing stored beliefs; second, to recognize a fundamental difference between knowledge building and learning, both of which are essential parts of education for the knowledge age. Connectionism in cognitive science addresses the first need; certain developments in post-positivist epistemology address the second. The author explores both the theoretical bases and the practical educational implications of this radical change in viewpoint. The book draws on current, new ways of thinking about knowledge and mind, including information processing, cognitive psychology, situated cognition, constructivism, social constructivism, and connectionism, but does not adhere strictly to any camp. Above all, the author is concerned with developing a way of thinking about the mind that can usher education into the knowledge age. This book is intended as a starting point.

Transforming Schools D. G. Mulcahy, 2013-05-01 President Obama has on a number of occasions rejected policies that have been tried and do not work. Legislation such as No Child Left Behind and policies such as Race to the Top are neither effective nor based on sound research. Educational policy making is now more than ever the preserve of politicians, advocacy foundations, and lobbyists parading as corporate leaders. Teachers have little voice; their role is merely to be held responsible for policies foisted upon them. In *Transforming Schools: Alternative Perspectives on School Reform*, our aim is to provide alternative perspectives to the dead-end educational policies by which our governments have become consumed. We turn the spotlight on a select range of topics that have become the focus of concern and we consider the implications for school improvement. These topics include school reform in general, the achievement gap, literacy, standardized assessment, social justice, and ecojustice, aesthetic and moral education, and general education.

Disrupting Pedagogies in the Knowledge Society: Countering Conservative Norms with Creative Approaches Faulkner, Julie, 2011-12-31 This book examines a range of disruptive approaches exploring how challenge, dissonance, and discomfort might be mobilized in educational contexts in order to shift taken-for-granted attitudes and beliefs held by both educators and learners. Provided by publisher.

Knowledge Creation in Education Seng Chee Tan, Hyo Jeong So, Jennifer

Yeo,2014-06-12 This book arises from research conducted through Singapore's National Institute of Education on such topics as integrating knowledge building pedagogies into Singaporean classrooms with both students and teachers across school levels from primary schools to high schools Additionally international scholars contribute research on theories of knowledge creation methodological foundations of research on knowledge creation pedagogies in classrooms and knowledge creation work involving educators The book is organized in two sections Section A focuses on theoretical technological and methodological issues where sources of justification for claims are predominantly theories and extant literature although empirical evidence is used extensively in one chapter Section B reports knowledge creation practices in schools with teachers students or both the key sources of justification for claims are predominantly empirical evidence and narratives of experience The editor asserts that schools should focus on developing students capacity and disposition in knowledge creation work at the same time leaders and teachers alike should continue to develop their professional knowledge as a community In the knowledge building vernacular the chapters are knowledge artifacts artifacts that not only document the findings of the editors and authors but that also mediate future advancement in this area of research work The ultimate aim of the book is to inspire new ideas and to illuminate the path for researchers of similar interest in knowledge creation in education

Collaborative Knowledge Creation Anne Moen, Anders I. Mørch, Sami Paavola, 2012-10-26 This book presents perspectives on the knowledge creation metaphor of learning and elaborates the dialogical approach to learning The knowledge creation metaphor differs from both the acquisition and the participation metaphors In a nutshell dialogical approaches seek to engage learners in joint work with shared objects and artefacts mediated by collaboration technology The theoretical underpinnings stem from different origins including Bereiter and Scardamalia's theory on knowledge building and Engeström's activity theory The authors in this collection introduce key concepts and techniques explain tools designed and developed to support knowledge creation and report results from case studies in specific contexts The book chapters integrate theoretical methodological empirical and technological research to elaborate the empirical findings and to explain the design of the knowledge creation tools The target audiences for this book are researchers teachers and Human Resource developers interested in new perspectives on collaborative learning technology mediated knowledge creation and applications of this in their own settings for higher education teacher training and workplace learning The book is the result of joint efforts from many contributors who took part in the Knowledge practices Laboratory KP Lab project 2006-2011 supported by EU FP6

Twenty-first Century Schools Gerard Macdonald, David W. Hursh, 2006 Twenty first Century Schools traces the extension of political control over Britain's school system and through US case studies looks at alternative methods of organisation

Conceptions of Knowledge Creation, Knowledge and Knowing Yuh Huann Tan, Seng Chee Tan, 2020-03-11 This book responds to calls for further advancing knowledge creation in schools It examines sixteen Chinese Language teachers from Singapore since language teachers are primarily responsible for the basic literacy that is the

foundation of students lifelong learning. Positing that people's cultural beliefs and the language s they use are inseparable, the book argues that Chinese language teachers possess a unique understanding of the various phenomena that reflect the influences of Chinese culture by virtue of the language they speak and teach. For the purposes of the investigation, it employs phenomenography, a methodology aimed at finding and systematising how people interpret the world around them, to determine and describe Chinese language teachers' conceptions of these phenomena.

Enjoying the Song of Expression: An Emotional Symphony within **Liberal Education In A Knowledge Society**

In some sort of eaten by displays and the ceaseless chatter of instant transmission, the melodic beauty and emotional symphony developed by the published term usually disappear in to the backdrop, eclipsed by the relentless noise and interruptions that permeate our lives. Nevertheless, set within the pages of **Liberal Education In A Knowledge Society** a charming fictional prize brimming with fresh feelings, lies an immersive symphony waiting to be embraced. Constructed by an outstanding composer of language, this charming masterpiece conducts viewers on an emotional journey, skillfully unraveling the hidden tunes and profound affect resonating within each cautiously crafted phrase. Within the depths of the poignant examination, we shall explore the book is central harmonies, analyze its enthralling writing type, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
