From the Polar Night to Eternal Light Inger Marie Schneider, 1989 The author describes the role of God in her life from her childhood in Norway through her adult years in the United States **NASA Technical Note** ,1965 **Silent Snow** Marla Cone, 2018-09-01 A slender but punch packing overview of the environmental destruction of the Far North from the award winning environmental reporter Kirkus Reviews Traditionally thought of as the last great unspoiled territory on Earth the Arctic is in reality home to some of the most severe contamination on the planet Awarded a major grant by the Pew Charitable Trusts to study the Arctic s deteriorating environment Los Angeles Times environmental reporter Marla Cone traveled across the Far North from Greenland to the Aleutian Islands to find out why the Arctic has become so toxic Silent Snow is not only a scientific journey but a personal one with experiences that range from tracking endangered polar bears in Norway to hunting giant bowhead whales with native Alaskans struggling to protect their livelihood Through it all Cone reports with heartbreaking immediacy on the dangers of pollution to native peoples and ecosystems how Arctic cultures are adapting to this pollution and what solutions will prevent the crisis from getting worse **Arctic Voices** Subhankar Banerjee, 2012-07-03 One of the great strengths of Arctic Voices is that it shows how Alaska and the Arctic are tied to the places where most of us live In this impassioned book Banerjee shows a situation so serious that it has created a movement where voices of resistance are gathering are getting louder and louder May his heartfelt efforts magnify them The climate changes that are coming have hit soon and hard in the Arctic and their consequences may be starkest there Ian Frazier The New York Review of Books A pristine environment of ecological richness and biodiversity Home to generations of indigenous people for thousands of years The location of vast quantities of oil natural gas and coal Largely uninhabited and long at the margins of global affairs in the last decade Arctic Alaska has quickly become the most contested land in recent US history World renowned photographer writer and activist Subhankar Banerjee brings together first person narratives from more than thirty prominent activists writers and researchers who address issues of climate change resource war and human rights with stunning urgency and groundbreaking research From Gwich in activist Sarah James s impassioned appeal We Are the Ones Who Have Everything to Lose during the UN Climate Conference in Copenhagen in 2009 to an original piece by acclaimed historian Dan O Neill about his recent trips to the Yukon Flats fish camps Arctic Voices is a window into a remarkable region Other contributors include Seth Kantner Velma Wallis Nick Jans Debbie Miller Andri Snaer Magnason George Schaller George Archibald Cindy Shogan and Peter Matthiessen *The Complete Writings of Ralph Waldo Emerson* Ralph Waldo Emerson, 1929 **Asian and African Studies** meisai.org.il, [Metamorphoses of Light](#) Walter Böhler, 2015-05-25 Goethe called colour the deeds and sufferings of the light victorious deeds when it pierces matter and suffering when it endures the darkness in matter Indeed there is no greater contrast in the whole cosmos than that between matter and light Having spent time in the Arctic Circle in Lapland where with the sky filled in a flood of colour the midnight

sun shines for weeks and the long polar night is brightened by the shining northern lights the author was left with unforgettable memories Thinking through these experiences led to this short but penetrating work a study of the pathways and metamorphoses of light from a global perspective The essence of light is to shine it rays out dynamically in all directions at an unimaginable speed never resting The nature of matter in contrast is heavy static and condensed But matter can also let light through as with crystal or in the transparent and flowing element of water evaporation and even air Water and air thus act as mercurial factors allowing the creative potential of light to appear in a diversity of colours The deeds and sufferings of light are further to be found in many phenomena of the inorganic world such as the northern lights By seeing the laws within phenomena Goethe approached an understanding of the etheric formative forces The object of this book is the observation of nature s natural wonders using Goethe s methodical process Apart from the rainbows lightning and northern lights in the title the author discusses the blue of the sky the colours of twilight and the dewdrop and halos and other light phenomena The power of imagination produced by the observer creates depth and inwardness says the author In such a state of consciousness one s inner eye can picture a threefold global union of light which speaks to a threefold organization of the Earth B hler s concentrated work will inspire readers to make their own observations of the optical phenomena in our atmosphere learning anew to treasure our planet for what it is a human scale home for which we are all responsible
