Johnson, 1987 A portrait of the mining finance organization which had its origins in the gold mining industry of South Africa Consolidated Gold Fields in Australia Robert Porter, 2020-04-29 Consolidated Gold Fields was a major British mining house founded by Cecil Rhodes in 1892 Diversifying from its South African gold interests the company invested widely during the following century This included investments in the Western Australian gold sector from the 1920s and exploration and mining activities elsewhere in Australia and the Territory of New Guinea In the 1960s Consolidated Gold Fields Australia CGFA was formed CGFA had ambitious plans and the financial backing from London to establish itself as one of the main diversified mining companies in Australia Investments were held in the historic Mount Lyell Mining and Railway Company in Renison and it was one of the first groups to develop iron ore deposits in the Pilbara of Western Australia It also acquired a major interest in mineral sands While the London based Consolidated Gold Fields ceased to exist in 1989 taken over and dismembered by renowned corporate raider Hanson Plc its Australian subsidiary renamed Renison Goldfields Consolidated RGC continued for another nine years as a diversified mining group before it suffered its own corporate demise facilitated by Hanson CGFA and RGC were important participants in Australia's post World War II mining sector This book is a history of a once great British mining finance house and its investments in Australia Consolidated Gold Fields had a rich and broad history in Australia its ultimate fate did not demonstrate its potential as an Australian mining company **The History of Geophysics in Southern Africa** Johan H de Beer, 2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century However its phenomena like earthquakes tsunamis volcanic eruptions and lightning had been objects of fear curiosity and speculation since ancient times In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488 This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country's proud history The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa *The Founder* Robert I. Rotberg, 1990-10-25 The definitive biography of one of the most controversial figures of the 19th century captures a life that was complex and fascinating evil and good Illustrated The Colonialist William Kelleher Storey, 2025-05 Mining magnate politician and imperialist Cecil Rhodes had a larger than life impact on the development of Southern Africa and the extension of British imperial power This critical biography of Rhodes elaborates his life and times showing how his racist politics impacted mining industry transportation warfare and society while discussing his controversial and enduring legacies Historic Overview of the Witwatersrand Goldfields J. R. F. Handley, 2004 *Mining Tycoons in the Age of Empire, 1870-1945* Raymond E. Dumett, 2016-12-05 The years of the late nineteenth and early twentieth centuries aptly described by Mark Twain as the Gilded Age witnessed an

unprecedented level of technological change material excess untrammled pursuit of profit and imperial expansion Within this dynamic and often ruthless environment many colorful characters strode across the world stage among them the great mining tycoons who with the thousands of prospectors diggers shift bosses timbermen blastmen and muckers in mining enterprise constituted one of the major spearheads of global capitalistic expansion and colonial exploitation This volume which carries the epic story to the mid twentieth century provides a truly international perspective on the role of mining entrepreneurs investors and engineers in shaping the economic and political map of the globe in testing management techniques and in setting a vogue for extravagant displays of wealth among the world s rich Each chapter is loosely focussed on a biographical account of a particular mining tycoon that allows for broad and comparative accounts to be made about the individuals their business interests the technologies they employed and the national and international political considerations under which they operated Furthermore this structure also allows for consideration of the effect that these tycoons had on the countries and territories in which they worked particularly the often long lasting impact on indigenous populations the environment transport links and economic development By approaching the subject matter through this stimulating mix of cultural social economic business and colonial history many intriguing and thought provoking conclusions are reached that will reward any scholars with an interest late nineteenth and early twentieth century history
