The Treeseacher ,2001 **Global Heartland** Peter Simons,2025-03-25 Highlighting the critical role of midwestern farmers in the creation of the American Century Though often left out of the story of the making of the American Century the farmers of the Midwest were at its center fueling the nation s growing power in the midtwentieth century In Global Heartland Peter Simons explores how after decades of slipping to the margins of an urbanizing economy these farmers assumed renewed strategic and cultural importance as they produced essential sustenance for overseas troops and food rations for a domestic population During the mid 1900s once isolationist midwestern farmers came to see the

continental interior not as an insulated space but as an environmentally rich landscape that mandated them to accept a larger stake in global affairs Simons traces this transformation from an older agrarian internationalism rooted in religion and ties to family abroad to illuminate the increasing influence of the U S agricultural community during the Cold War Examining regional political parties Lend Lease programs wartime mass media and farmer led relief programs and interspersing this history with vignettes revisiting the Mercy Wheat campaign of 1947 the postwar International Farm Youth Exchange and the Flying Farmers organization Simons offers an enlightening consideration of midwestern farmers involvement in America s international ascent Unique in its focus on farmers and their work rather than the more common attention to food or agricultural commodities Global Heartland complicates and expands ideas of the farm industry s role in American history
