the revision contains a full set of all current RDA instructions. It replaces the previous version of RDA Print as opposed to being an update packet. To that version RDA has gone through many changes since it was first published in 2010. Cataloging practice described by RDA has not changed dramatically due to the changes above but nearly every page in RDA Print was impacted by the changes with the result that an RDA Print update packet would require nearly as many pages as the full revision. The most current RDA the revision contains all changes to RDA up to and including the 2013 RDA Update approved by the JSC. Annually the JSC considers proposals to update, enhance and maintain RDA as a current cataloging standard. These updates can and often do change the cataloging process as described by RDA. The JSC also periodically issues changes to RDA to fix errors and to clarify meaning. These changes do not typically change cataloging practice as described by RDA. Reworded RDA the revision includes the reworded version of RDA instructions. To improve readability and comprehension of complex instructions RDA has been edited and reworded since its original release. The rewording was carried out by the JSC RDA Copy Editor and reviewed by the U S RDA Test Coordinating Committee.

Infantry, 2000 Bibliographic Guide to Soviet and East European Studies, 1978 Army, 1987 **Ballistic Missile Proliferation in Non-Nuclear States** Karim El-Baz, Ali Ghanbarpour-Dizboni, 2024-08-14. This book offers an exploration of ballistic missile proliferation in the Middle East and also delves into the geopolitical landscape to unveil a narrative of contemporary Middle Eastern history. The central focus of this book is to decipher the pivotal moments when three regional powers of the Middle East, Egypt, Saudi Arabia and Iran embraced ballistic capabilities as a strategic response to military vulnerabilities. The authors contend that the very essence of ballistic proliferation incorporates a tactical rationale provided by military needs that varies from one state to another and it is upon the assessment of these military needs that the decision to procure ballistic missiles is made. Offering a blend of theoretical insights and primary sources based case studies, this book dissects the decision making processes that spurred these states to choose ballistic missiles despite their inefficiencies in delivering conventional payloads. The absence of an effective air force emerges as a catalyst triggering what the authors term a moment of ballistic consciousness. Spanning three diverse regimes, the work provides a rich historical tapestry and untangles the complexities of political decisions with military implications, providing a fresh perspective on global power dynamics. This narrative sheds light on the intersection of

military strategy geopolitical realities and the pursuit of ballistic capabilities that shapes the world's security landscape This book will be of much interest to students of arms control nuclear proliferation Middle Eastern politics and International Relations
