

Hockey Rink

The red line at the end of each zone, is the goal line. The puck must cross the goal line into the goal for a goal to be scored.

The two blue lines divide the playing surface into 3 zones. The zone with your goal is called the defensive zone; naturally the zone you are trying to score in, at the other end of the rink, is the attacking zone. The zone between the two blue lines is referred to as the neutral zone.

In general:

There are 9 faceoff dots on the ice where the puck is dropped back into play, after the game has been stopped. The referee and linesmen will blow their whistle in order to stop play, which also stops the game time on the clock.

The red semicircle in the neutral zone is the referee's crease and is only used during stoppage of play to communicate goals and penalties. During play, players can skate through this area as the referees will position themselves across the rink to keep up with play.

The red center line divides the rink in half. The dot at the center of the ice is used at the beginning of the game and each period, as well as after a goal has been scored.

There are 5 circles surrounding 5 faceoff dots on the ice. When a faceoff is held at one of these dots, then only 1 player from each team can stand within the circle until the puck is dropped into play.

The light blue space in front of the goal, is called the goal crease. Players trying to score in this zone are not allowed to stand in the crease.
