Architectural Reflections Colin St John Wilson, 2014-05-16

Architectural Reflections Studies in the Philosophy and Practice of Architecture focuses on the principles techniques and the philosophical context and practice of architecture The book first ponders on natural imagination ethics of architecture and an interpretation of Wittgenstein's comments on architecture Topics include the meaning of play language game and gesture language role of aesthetics reality of architecture fine art and practical art origin of the work of architecture concept of psychological position artistic condensation and figures of architectural form The manuscript then examines Alvar Aalto and the state of modernism and Gunnar Asplund and the dilemma of classicism Topics include modernism and modernismus issue of classicism and connections and collaborations The text takes a look at the thoughts of Hans Scharoun Sigurd Lewerentz and Gerrit Rietveld on the relationship of philosophy and architecture The publication is a valuable reference for

philosophers and architects wanting to study further the philosophy and practice of architecture *Affect, Architecture, and Practice* Akari Nakai Kidd, 2021-05-17 *Affect Architecture and Practice* builds on and contributes to work in theories of affect that have risen within diverse disciplines including geography cultural studies and media studies challenging the nature of textual and representational based research Although numerous studies have examined how affect emerges in architectural spaces little attention has been paid to the creative process of architectural design and the role that affect plays in the many contingencies and uncertainties that arise in the process The book traces the critical philosophic and architectural theories to examine how affect architecture and practice are interlinked Through a series of conversations and reflections it examines three key contemporary architects their practices and projects all within a single coherent theme Reiser Umemoto RUR Architecture DPC USA Kerstin Thompson Architects Australia and Shigeru Ban Architects Japan are critically studied through the lens of different aspects of practice namely image making the design process and the making of an everyday object material Through this investigation author Akari Nakai Kidd demonstrates how affect theory allows a critical interrogation of the in between of practice its liminality and limits It questions the stability of objects the smooth temporality of practice and its often under conceptualised non human dimensions More significantly the book demonstrates architectural practice's contribution to the reconceptualisation of theories of affect **Image, Text, Architecture** Robin

Wilson, 2016-03-09 *Image Text Architecture* brings a radical and detailed analysis of the modern and contemporary architectural media addressing issues of architectural criticism architectural photography and the role of journal editors It covers examples as diverse as an article by British artist Paul Nash in *The Architectural Review* 1940 an early project by French architects Lacaton Vassal published in the journal *2G* 2001 and recent photography by Hisao Suzuki for the Spanish journal *El Croquis* At the intersection of image and text the book also reveals the role of the utopian impulse within the architectural media drawing on theories of utopian discourse from the work of the French semiotician and art theorist Louis

Marin and the American Marxist critic Fredric Jameson Through this it builds a fresh theoretical approach to journal studies revealing a hitherto unexplored dimension of latent or unconscious discourse within the media portrait of architecture The purpose of this enquiry is to highlight moments where a different type of critical voice emerges on the architectural journal page indicating the possibility of a more progressive engagement with the media as a platform for critical and speculative thinking about architecture and to rethink the journals role within architectural history *Walter Benjamin and Architecture* Gevork Hartoonian,2009-10-27 The essays compiled in this book explore aspects of Walter Benjamin s discourse that have contributed to the formation of contemporary architectural theories Issues such as technology and history have been considered central to the very modernity of architecture but Benjamin s reflection on these subjects has elevated the discussion to a critical level The contributors in this book consider Walter Benjamin s ideas in the context of digitalization of architecture where it is the very technique itself that determines the processes of design and the final form This book was published as a special issue of Architectural Theory Review *Pattern Recognition* Apostolos Antonacopoulos,Subhasis Chaudhuri,Rama Chellappa,Cheng-Lin Liu,Saumik Bhattacharya,Umapada Pal,2024-12-03 The multi volume set of LNCS books with volume numbers 15301 15333 constitutes the refereed proceedings of the 27th International Conference on Pattern Recognition ICPR 2024 held in Kolkata India during December 1 5 2024 The 963 papers presented in these proceedings were carefully reviewed and selected from a total of 2106 submissions They deal with topics such as Pattern Recognition Artificial Intelligence Machine Learning Computer Vision Robot Vision Machine Vision Image Processing Speech Processing Signal Processing Video Processing Biometrics Human Computer Interaction HCI Document Analysis Document Recognition Biomedical Imaging Bioinformatics **Dimensions. Architectural Colour in the Professional Palette Fiona McLachlan, 2013-08-15

How do architects use color Do they adopt a different strategy or starting point for every project Do they gradually cultivate individual color palettes which develop alongside their body of built work Do they utilize or are they aware of the body of theoretical work that underpins the use of color in the past and forms the basis of most of the color systems commercially available today Informed by the author's thirty years in architectural practice and academia this book investigates documents and analyzes the work of a number of contemporary architects in order to respond to these questions and provide a clear reference of contemporary color use The book suggests a holistic approach to the integration of color in architecture through a series of thematic essays the text explores and reveals underlying principles in color design and application Case studies include AHMM Caruso St John Erich Wiesner and Otto Steidle Gigon Guyer O'Donnell Tuomey

Sauerbruch Hutton Steven Holl UN Studio The book provides clear insights into how particular contemporary architects use color confidently and intelligently as an integral part of their design philosophy in conjunction with their choices of materials and finishes Offering a stimulating view of the history of color theory and pragmatic advice to practicing architects this book will be inspiring to both design professionals and students *Architecture and Modern Literature* David Anton

Spurr,2017-05-09 Exploring the related cultural forms of architecture and literature in the modern era Ten dialogues between architects and philosophers Mike Liu,2025-05-16 About the Book In these ten imagined conversations architecture

meets philosophy through memory desire identity silence and form Spanning centuries and ideas Ten Dialogues invites readers to explore the unseen structure of thought and the emotional resonance of space Is architecture a projection of the unconscious Can buildings carry meaning beyond utility What does it mean to dwell physically emotionally philosophically This is not a textbook It is a reflective offering **Architecture Modernization** Nick Tune,Jean-Georges Perrin,2024-02-20

The decisions you make about your software are inherently connected to the decisions you make about your business Why not turn the mundane task of modernizing legacy systems into a transformative process for your entire company This book shows you how It reveals a socio technical approach to align your software and products with organizational dynamics and ways of working Architecture modernization socio technical alignment of software strategy and structure presents a clear path of upgrading your entire organization when you re imagine your software In it you ll learn to combine practices like Domain Driven Design Event Storming and Wardley Mapping to discover user needs design optimal architecture and avoid falling back into old habits Provocative examples from Danske Salesforce the UK Government and others show the real world result of each approach identifying techniques you can apply effectively in your own business **Women Architects at**

Work Mary Anne Hunting,Kevin D. Murphy,2025-02-18 A comprehensive history of the women architects who left their enduring mark on American Modernism In the decades preceding World War II professional architecture schools enrolled increasing numbers of women but career success did not come easily Women Architects at Work tells the stories of the resilient and resourceful women who surmounted barriers of sexism racism and classism to take on crucial roles in the establishment and growth of Modernism across the United States Mary Anne Hunting and Kevin D Murphy describe how the Cambridge School of Architecture and Landscape Architecture in Massachusetts evolved for the professional education of women between 1916 and 1942 While alumnae such as Eleanor Agnes Raymond Victorine du Pont Homsey and Sarah Pillsbury Harkness achieved some notoriety others like Elizabeth Ann Campbell Knapp and Louisa Vaughan Conrad have been largely absent from histories of Modernism Hunting and Murphy describe how these innovative practitioners capitalized on social educational and professional ties to achieve success and used architecture to address social concerns including how modernist ideas could engage with community and the environment Some joined women led architectural firms while others partnered with men or contributed to Modernism as retailers of household furnishings writers and

educators photographers and designers or fine artists With stunning illustrations *Women Architects at Work* offers new histories of recognized figures while recovering the stories of previously unsung women all of whom contributed to the modernization of American architecture and design *Architecture and Violence* Bechir Kenzari,2011-09-01 This is a compelling compilation of essays by international architectural theorists on the relationship of violence to space With the events of September 11th the London bombings the Madrid train explosions and the daily blasts in Baghdad the question of violence and terrorism is imposing architectural ramifications with renewed urgency A new sense of architectural awareness has been forged as violence is forcing its place as an architectural datum Wide ranging contributions approach design issues related to violence through multiple angles and intersections We only need to flip casually through the repertoire of the built environment to realize that certain built structures from concentration camps to separation walls from jails to propaganda exhibitions from slaughterhouses to suburban complexes from illegal settlements to palaces either sanction violence or give it a spatial ground to happen and thrive *Space and Language in Architectural Education* Kasia Nawratek,2022-05-02 Architects habitually disregard disciplinary boundaries of their profession in search for synergies and inspiration The realm of language although not considered to be architects natural environment opens opportunities to further stretch and expand the architectural imagination and the set of tools used in the design process When used in the context of architectural pedagogy the exploration of the relationship between space and language opens the discussion further to include the reflection on the design studio structure the learning process in creative subjects and the ethical dimension of architectural education This book offers a glimpse into architectural pedagogies exploring the relationship between space and language using literary methods and linguistic experiments The examples discuss a wide range of approaches from international perspective exploring opportunities and challenges of engaging literary methods and linguistic experiments in architectural education The theme of Catalysts discusses the use of literary methods in architectural pedagogy where literary texts are used to jumpstart and support the design process resulting in deeply contextual approaches capable of subverting embedded hierarchies of the design studio Tensions explore the gap between the world and its description employing linguistic experiments and literary methods to enrich and expand the architectural vocabulary to include the experience of space in its infinite complexity This book will be useful for innovators in architectural education and those seeking to expand their teaching practice to incorporate literary methods and to creatives interested in making teaching a part of their practice It may also appeal to students from design based disciplines with an established design studio culture demonstrating how to use narrative poetry and literature to expand and feed your imagination **Photographic Architecture in the Twentieth Century** Claire Zimmerman,2014-05-01 One hundred years ago architects found in the medium of photography so good at representing a building s lines and planes a necessary way to promote their practices It soon became apparent however that photography did more than reproduce what it depicted It altered both subject and reception as architecture in the twentieth

century was enlisted as a form of mass communication Claire Zimmerman reveals how photography profoundly influenced architectural design in the past century playing an instrumental role in the evolution of modern architecture Her picture anthropology demonstrates how buildings changed irrevocably and substantially through their interaction with photography beginning with the emergence of mass printed photographically illustrated texts in Germany before World War II and concluding with the postwar age of commercial advertising In taking up photographic architecture Zimmerman considers two interconnected topics first architectural photography and its circulation and second the impact of photography on architectural design She describes how architectural photographic protocols developed in Germany in the early twentieth century expanded significantly in the wartime and postwar diaspora and accelerated dramatically with the advent of postmodernism In modern architecture she argues how buildings looked and how photographs made them look overlapped in consequential ways In architecture and photography the modernist concepts that were visible to the largest number over the widest terrain with the greatest clarity carried the day This richly illustrated work shows for the first time how new ideas and new buildings arose from the interplay of photography and architecture transforming how we see the world and how we act on it
