Modeling the Meanings of Pictures John Kulvicki, 2020-09-05 John Kulvicki offers an account of the many ways in which pictures can be meaningful which is inspired by the philosophy of language. Pictures are important parts of communicative acts along with language, gesture, facial expressions, and props. They express wide ranges of thoughts, make assertions, offer warnings, instructions, and commands. Pictures are also representations. They have meanings which help explain the range of communicative uses to which they can be put. Modelling the meanings of pictures is accounting for the ways in which pictures manage to be meaningful with an eye toward how those meanings let us use them as we do. By framing pictures with the philosophy of language, we acquire new perspectives on the many things we can do with them. Sometimes pictures are used as descriptions, he looks like this, while sometimes they are used more like singular terms, find him while showing a mugshot. Most picture-making cultures also have iconographies, but this is usually put to one side in discussions of pictures if it is mentioned at all. Likewise, some uses of pictures, especially in advertising, are metaphorical, and very little has been said about metaphor in pictures. Pictures are also related in important ways to other kinds of representations like maps, and this book provides a new way of understanding what makes them alike and different. By showing that pictures are very different from languages, this book also shows that the tools developed with language in mind are not actually specific to linguistic phenomena.

Berkeley: An Interpretation Kenneth P. Winkler, 1989-04-06 David Hume wrote that Berkeley's arguments admit of no answer but produce no conviction. This book aims at the kind of understanding of Berkeley's philosophy that comes from seeing how we ourselves might be brought to embrace it. Berkeley held that matter does not exist and that the sensations we take to be caused by an indifferent and independent world are instead caused directly by God. Nature becomes a text with no existence apart from the spirits who transmit and receive it. Kenneth P. Winkler presents these conclusions as natural though by no means inevitable consequences of Berkeley's reflections on such topics as representation, abstraction, necessary truth, and cause and effect. In the closing chapters, Professor Winkler offers new interpretations of Berkeley's view on unperceived objects, corpuscularian science, and our knowledge of God and other minds.
