Globalization, Sport and Corporate Nationalism Jay Scherer, Steve Jackson, 2010 Although New Zealand exists as a small pop 4.3 million peripheral nation in the global economy it offers a unique site through which to examine the complex but uneven interplay between global forces and long standing national traditions and cultural identities. This book examines the profound impact of globalization on the national sport of rugby and New Zealand's iconic team the All Blacks. Since 1995 the national sport of rugby has undergone significant change most notably due to the New Zealand Rugby Union's lucrative and ongoing corporate partnerships with Rupert Murdoch's News Corporation and global sportswear giant Adidas. The authors explore these significant developments and pressures alongside the resulting tensions and contradictions that have emerged as the All Blacks and other aspects of national heritage and indigenous identity have been steadily incorporated into a global promotional culture. Following recent research in cultural studies they highlight the intensive but contested commodification of the All Blacks to illuminate the ongoing transformation of rugby in New Zealand by corporate imperatives and the imaginations of marketers most notably through the production of a complex discourse of corporate nationalism within Adidas's evolving local and global advertising campaigns

Engaging in contemporary debates surrounding the internet Robins and Webster question whether it can really offer us a new world of virtual communities and suggest more radical alternatives to the corporate agenda of contemporary technologies

Potters without a Wheel Saswati Bhattacharya, 2022-06-24 This book is an ethnographic study of clay idol makers of Kumartuli in Kolkata India Much of the visibility and identity of Kolkata s creative culture has been dependent upon the clay artists of Kumartuli for the last 100 years or so This book explores the nature of the carefully constructed identity of these idol makers as mritshilpis or clay artists who as opposed to ordinary potters work with their hands instead of a wheel It looks at how the mritshilpis consciously embrace and expand their market based on this variation and elevated status as artists instead of artisans and studies the embeddedness of this identity within the commodity markets It also shows that commodity markets in this case the market of clay idols are an outcome of trends of urbanisation popular demand corporatisation and

commodification of culture all of which have shaped the contours of clay idol making as not only an occupation but a brand identity Drawing on extensive fieldwork and in depth interviews the book highlights the larger structural relationship between urbanisation indigenous occupational categories and identity politics It will be indispensable to scholars and researchers of sociology social anthropology political studies cultural history urban economy art history urbanisation cultural studies and urban sociology

Americanism and Americanization Mel van Elteren, 2006-09-28 With the current state of foreign affairs the terms Americanism and Americanization sometimes take on an unexpected and an unflattering connotation Americanism essentially involves values beliefs ideals goods and practices in local settings outside the United States that are in some way related or attributed to American influence While the validity of this influence may be under scrutiny it requires a detailed historical and sometimes cultural analysis to understand all the dynamics and implications of Americanization A variety of factors contributes to this influence including the preoccupation and reception of the relevant culture itself For instance many European countries have at times demonstrated a preoccupation with all things American which was not necessarily swayed by any action of America itself The overall actualization of Americanization however encompasses a number of societal dimensions including power differentials in the exchange processes concerned Informed by a history of relevant developments since the early nineteenth century this volume presents an in depth critical analysis of the Americanization process Beginning with a survey of early European preoccupations with things American the book goes on to discuss European concerns regarding American influence after World War II The work then looks at Americanism and its influence within the United States itself especially regarding developments during the New Deal and beyond The primary goal of the analysis is the construction of an interpretative framework allowing for a more balanced approach to the study of Americanism abroad Written from a critical social emancipatory perspective the author's approach blends economic military social political cultural and psychological dimensions as well as an examination of the ways in which these areas interact Finally Americanism is examined as part of a U S style corporate globalization at the current juncture
