Images Of Development Egyptian Engineers In Search Of Industry:

Images of Development Clement Henry Moore, 1994-01 First published in 1980 Images of Development is as much about modernization theory as about the Egyptian engineering profession A new epilogue for this 1994 edition presents a new image of development the engineers now aspiring to transcend and supercede Western modernization theory Their professional syndicate is one of Egypt s few genuinely representative institutions and Islamist activists have achieved control over it through free elections The new image that they project is nothing less than the Islamization of modernity The engineers like their colleagues in other leading professions previously moved in a political vacuum Now their assertions of Islamic identity have articulated a determination to master an alien society corrupted by Egypt s economic open door policy The epilogue critically discusses these recent developments and argues that while Islam may inspire a variety of political forms the engineers exemplify a moderate democratic and anti imperialist movement that works within Egypt s political system and deplores political violence If Egypt has any prospects for genuine democracy this professional syndicate together with others that have been taken over by Islamist activists may already be conditioning its future leadership Small

State Power and Politics in the Making of the Modern Middle East Roger Owen, 2002-04-12 This book continues to serve as an excellent introduction for new comers to the modern history and politics of a region that is usually portrayed as mysterious unpredictable and violent Over-stating the Arab State Nazih N. Ayubi, 1996-12-31 The author s objective within this book is to place the Arab world within a theoretical and comparative framework that avoids both orientalist and fundamentalist insistence on the utter peculiarity and uniqueness of the region The book focuses in detail on eight Arab countries Winning Hearts and Votes Steven Brooke, 2019-01-15 In non democratic regimes around the world non state organizations provide millions of citizens with medical care schooling childrearing and other critical social services Why would any authoritarian countenance this type of activism Under what conditions does the private provision of

social services generate political mobilization And in those cases what linkage does the provision of social services forge between the provider and recipient In *Winning Hearts and Votes* Steven Brooke argues that authoritarians often seek to manage moments of economic crisis by offloading social welfare responsibilities to non state providers But providers who serve poorer citizens motivated by either charity or clientelism will be constrained in their ability to mobilize voters because the poor depend on the state for many different goods Organizations that serve paying customers in contrast may produce high quality consistent and effective services This type of provision generates powerful reputation based linkages with a middle class constituency more likely to support the provider on election day Brooke backs up his novel argument with an in depth examination of the Egyptian Muslim Brotherhood the archetypal organization that combines social service provision with electoral success With a fascinating array of historical qualitative spatial and experimental data he traces the Brotherhood's provision of medical services from its origins in the 1970s through its maturation under the authoritarian regime of Hosni Mubarak to its apogee during the country's brief democratic interlude 2011-2013 In addition to generating new insights into authoritarian regimes party voter linkages and clientelism and the relationship between political parties and social movements *Winning Hearts and Votes* details the history operations and political effects of the Muslim Brotherhood's much discussed but little understood social service network

 Jr., Clark Lombardi, 2012-08-16 Since the 1950s the world has witnessed a period of extraordinary religious revival in which
 religious political parties and non governmental organizations have gained power around the globe At the same time the
 international community has come to focus on the challenge of promoting global human security This groundbreaking book
 explores how these trends are interacting In theoretical essays and case studies from Turkey Egypt Pakistan the Americas
 Africa and Europe the contributors address such crucial questions as Under what circumstances do religiously motivated
 actors advance or harm human welfare Do certain state policies tend to promote security enhancing behavior among
 religious groups The book concludes by providing important suggestions to policymakers about how to factor the influence of
 religion into their evaluation of a population s human security and into programs designed to improve human security around
 the globe **A History of African Higher Education from Antiquity to the Present** Y. G-M Lulat, 2005-08-30 This book
 surveys the history of higher education principally universities in Africa Its geographical coverage encompasses the entire
 continent from Afro Arab Islamic Africa in the north to the former apartheid South Africa in the south and the historical time
 span ranges from the Egyptian civilization to the present Since little has been written on this topic particularly its historical
 component the work fills an important gap in the literature The book delineates the broad contours of the history of higher
 education in Africa in exceptional historical breadth voluminously documenting its subject in the text detailed footnotes and
 lengthy appendices Its methodological approach is that of critical historiography in which the location of the African
 continent in world history prior to the advent of European colonization is an important dimension In addition the book
 incorporates a historical survey of foreign assistance to the development of higher education in Africa in the post
 independence era with a substantive focus on the role of the World Bank It has been written with the following readership in
 mind those pursuing courses or doing research in African studies studies of the African Diaspora and comparative
 international education It should also be of interest to those concerned with developing policies on African higher education
 inside and outside Africa as well as those interested in African Islamic history the development of higher education in
 medieval Europe the contributions of African Americans to African higher education and such controversial approaches to
 the reading of African history as Eurocentrism and Afrocentrism **No God but God** Geneive Abdo, 2002-10-24 Shrouded in
 mystery the Islamic presence in the Middle East evokes longstanding Western fears of terrorism and holy war Our media
 have consistently focused on these extremes of Islam overlooking a quiet yet pervasive religious movement that is now
 transforming the nation of Egypt Drawing on hundreds of interviews No God But God opens up previously inaccessible
 segments of Egyptian society from the universities and professional sectors to the streets to illustrate the deep penetration of

Popular Islamic influence Abdo provides a firsthand account of this peaceful movement allowing its moderate leaders street preachers scholars doctors lawyers men and women of all social classes to speak for themselves Challenging Western stereotypes she finds that this growing number of Islamists do not seek the violent overthrow of the government or a return to a medieval age Instead they believe their religious values are compatible with the demands of the modern world They are working within and beyond the secular framework of the nation to gradually create a new society based on Islamic principles Abdo narrates fascinating accounts of their methods and successes Today for example university students meet in underground unions despite a state ban In addition sheikhs have recently used their new legislative power to censor books and movies deemed to violate religious values Both fascinating and unsettling Abdo s findings identify a grassroots model for transforming a secular nation state to an Islamic social order that will likely inspire other Muslim nations This model cannot be ignored for it will soon help organized Islamists to undermine secular control of Egypt and potentially jeopardize Western interests in the Arab world

The Tentacles of Progress Daniel R. Headrick, 1988-03-10 This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology including equipment techniques and experts from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment Examining the most important technologies shipping and railways telegraphs and wireless urban water supply and sewage disposal economic botany and plantation agriculture irrigation and mining and metallurgy Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African underdevelopment
