After struggling four more years during the drought, he makes his car into a pickup, leaves the farm, and uses it to make a living until he is offered an opportunity in Oregon. Suarez, 2018-04-03 New York Times bestselling author Daniel Suarez delivers an exhilarating sci-fi thriller exploring a potential future where CRISPR genetic editing allows the human species to control evolution itself. On a crowded train platform, Interpol agent Kenneth Durand feels the sting of a needle, and his transformation begins. In 2045, Kenneth Durand leads Interpol's most effective team against genetic crime, hunting down black market labs that perform vanity edits on human embryos for a price. These illegal procedures augment embryos in ways that are rapidly accelerating human evolution, preying on human trafficking victims to experiment and advance their technology. With the worlds of genetic crime and human trafficking converging, Durand and his fellow Interpol agents discover that one figure looms behind it all: Marcus Demang Wyckes, leader of a powerful and sophisticated cartel known as the Huli-jing. But the Huli-jing have identified Durand too. After being forcibly dosed with a radical new change agent, Durand wakes from a coma weeks later to find he's been genetically transformed into someone else: his most wanted suspect, Wyckes. Now a fugitive pursued through the genetic underworld by his former colleagues and the police, Durand is determined to restore his original DNA by locating the source of the mysterious and highly valuable change agent. But Durand hasn't anticipated just how difficult locating his enemy will be. With the technology to genetically edit the living, Wyckes and his Huli-jing could be anyone and everyone, and they have plans to undermine identity itself. *Current Oculomotor Research* Wolfgang Becker, Heiner Deubel, Thomas
