Imagination And Time:

Imagination and Time Mary Warnock, 1994-01-01 All religion and much philosophy has been concerned with the contrast between the ephemeral and the eternal Human beings have always sought ways to overcome time and to prove that death is not the end This book consists then in an exploration of certain closely related ideas personal identity time history and our commitment to the future and the role of imagination in life

The Dawn that Never Comes Michael K. Bourdaghs, 2003 A critical rethinking of theories of national imagination The Dawn That Never Comes offers the most detailed reading to date in English of one of modern Japan's most influential poets and novelists Shimazaki Toson 1872 1943 It also reveals how Toson's works influenced the production of a fluid shifting form of national imagination that has characterized twentieth century Japan Analyzing Toson's major works Michael K Bourdaghs demonstrates that the construction of national imagination requires a complex interweaving of varied and sometimes contradictory figures for imagining the national community Many scholars have shown for example that modern hygiene has functioned in nationalist thought as a method of excluding foreign others as diseased This study explores the multiple images of illness appearing in Toson's fiction to demonstrate that hygiene employs more than one model of pathology and it reveals how this multiplicity functioned to produce the combinations of exclusion and assimilation required to sustain a sense of national community Others have argued that nationalism is inherently ambivalent and self contradictory Bourdaghs shows more concretely both how this is so and why it is necessary and provides in the process a new way of thinking about national imagination Individual chapters take up such issues as modern medicine and the discourses of national health ideologies of the family and its representation in modern literary works the gendering of the canon of national literature and the multiple forms of space and time that narratives of national history require

Edge of Reality William Thomas, 2017-11-15 This book contains a discussion with a new perspective on the old string theory problems With respect to where all those extra dimensions are we need to make the theory work mathematically It has been said by many scientists that we may need to look at the string theory problem with a fresh perspective or find new ways of thinking to resolve its challenges Lets have a little fun with open minds and a new way of looking into reality with our imaginations turned on as we discuss possible new solutions to resolving the string theory challenges Exercising the mind is one way to look into things that are out of the reach of direct experimentation Einstein utilized the thought experiments to revolutionize modern physics by means of imagination insight and logic This discussion proceeds in a language that anyone can follow regardless of background This is an intuitive discussion with respect to known and accepted foundational science principles focused on solving the string theory challenges

Unnamable Susette Min, 2018-06-05 Charting its historical conditions and the expansive contexts of its emergence the author challenges the notion of Asian American art as a site of reconciliation for marginalized artists to enter into the canon Pressing critically on how the politics of visibility and recognition reduces artworks by Asian American artists to narrow parameters of

categorization this work reconceives Asian American art not as a subset of objects but as a discursive medium that sets up the conditions for a politics to occur By approaching Asian American art in this way the author refigures the way we see Asian American art as an oppositional practice less in terms of its aspirations to be seen than in terms of how it models a different way of seeing and encountering the world Uniquely presented the chapters are organized thematically as mini exhibitions and offer readings of select works by contemporary artists including Tehching Hsieh Byron Kim Simon Leung Mary Lum and Nikki S Lee Inspired above all by their art practice the author argues for an alternative approach to exhibition making and methods of reading that conceives of these works not as exemplary instances of Asian American art but as engaged in an aesthetic practice that remains open ended challenging the assumptions that racialize artists within an Asian American context In this book the author insists that in order to reassess Asian American art beyond its place in art history she suggests the possible need to let go not only of established viewing and curatorial practices but even the category of Asian American art itself

The Great One Cyrus M. Esmaili, 2012-02-24 It is the dawning of a new world where a genderless Great One is assumed to know everything humanly possible All that matters is its thoughts It however carries a huge burden It must engage an endless line of seekers one at a time on a mission to examine the nature of humanity A man embraces his first new destiny that radiates compassionate thoughts and questions such as Who do I want to be As he does so he is approached by a beautiful being who immediately envelops him in a complete state of surrender Just as they discover their energetic fusion a bright light appears who offers them a promise that will be fulfilled but only by paying a price As the man moves in time space he eventually joins several companions on a trail to meet the Great One As he finally arrives in the Great One's presence the man engages in an unforgettable philosophical discussion about life In this futuristic tale that offers a compelling illustration of what an active imagination can truly achieve a man on a quest for the truth explores the vastness of humanity and all it encompasses as he moves through time and space

Resisting Alterities, 2021-11-01 This volume of essays poetry and prose fiction records various attempts to read the fracture zones created by the discursive strategy of a democratic imagination where space and ideas are opened to new linguistic and literary insights Pride of place is taken by essays on the Caribbean writer Wilson Harris which explore the implications of his awareness of a polyphony of coexistent voices that dislodges the hegemony of Cartesian dualism This group of studies is rounded off with an interview with and searching testimony by Harris himself The further contributions take up the implications of the encounter with alterity strangers natives barbarians in order to underline not only wonder in the face of an unknown presence or the shame through which the subject discovers itself but also the resentment involved in the creation of demonized Others As the poet Charles Tomlinson states what we take to be otherness alterity can be readmitted into our literary consciousness and seen as part of the whole causing us to readjust our awareness of the possibilities of English These essays confirm that resistance is an interface of ambivalence between discursive worlds encouraging us to read the living network of a text contrapuntally Specific topics include Billy Bragg and New Labour Schopenhauer in Britain Objectivist poetry gender and sexual identity in Nancy Cunard in Scottish fiction multivocal discourse in South Africa specific forms of alterity in Jamaica Kincaid in the poetry of Edwin Morgan in allo-Semitism and the deculturalizing perils of globalization
