From Babel to AI Dawn Lewis Sutherland, 2025-03-21 From Babel to AI Idolatry Transhumanism and the Crisis of Imago Dei confronts the profound questions of human identity and purpose in an age dominated by technological innovation Drawing from biblical narratives like the Tower of Babel this thought provoking work explores how artificial intelligence transhumanism and other modern advancements echo ancient struggles with idolatry and hubris At its core this book calls readers to rediscover the doctrine of the imago Dei the belief that humanity is created in the image of God as the foundation for addressing the ethical and theological challenges of our time Through compelling analysis and case studies it unpacks the dangers of dehumanizing technologies and offers a robust theological framework for engaging them while safeguarding human dignity and relationality Whether readers are a scholar church leader or thoughtful believer wrestling with the implications of AI and transhumanism From Babel to AI will inspire all to think deeply act faithfully and reclaim humanity's divine purpose in a rapidly changing world *The Ethics of The Tripartite Tractate (NHC I, 5)* Paul Linjamaa, 2019-06-07 In The Ethics of The Tripartite Tractate NHC I 5 Paul Linjamaa explores the theoretical foundations and practical implications

of the ethics in the longest Valentinian text extant today As such it is one of the first serious explorations of early Christian determinism *Ideas, Qualities and Corpuscles* Peter Alexander, 1985-05-09 This study presents a substantial and often radical reinterpretation of some of the central themes of Locke's thought Professor Alexander concentrates on the Essay Concerning Human Understanding and aims to restore that to its proper historical context In Part I he gives a clear exposition of some of the scientific theories of Robert Boyle which he argues heavily influenced Locke in employing similar concepts and terminology Against this background he goes on in Part II to provide an account of Locke's views on the external world and our knowledge of it He shows those views to be more consistent and plausible than is generally allowed demonstrating how they make sense and enable scientific explanations of nature In examining the views of Locke and Boyle together the book throws light both on the development of philosophy and the beginnings of modern science and in particular it makes a considerable and original contribution to our understanding of Locke's philosophy **The Minds of Gods** Benjamin Grant Purzycki, Theiss Bendixen, 2023-02-09 Why are humans obsessed with divine minds What do gods know and what do they care about What happens to us and our relationships when gods are involved Drawing from neuroscience evolutionary cultural and applied anthropology social psychology religious studies philosophy technology and cognitive and political sciences *The Minds of Gods* probes these questions from a multitude of naturalistic perspectives Each chapter offers brief intellectual histories of their topics summarizes current cutting edge questions in the field and points to areas in need of attention from future researchers Through an innovative theoretical framework that combines evolutionary and cognitive approaches to religion this book brings together otherwise disparate literatures to focus on a topic that has comprised a lasting central obsession of our species Technopolitics Constantino Pereira Martins (Ed.), 2024-09-24 Technopolitics is a follow up book that intends to depart and expand the concept of Cyberpolitics to all the dimensions and effects of technology in our lives but placing politics at the center of debate and thought Most investigations in the fields of Humanities have highlighted the impact of digitization and social virtualization and mapped the transition from the Industrial Revolution and mass disciplinary society to the digital revolution telework and social atomism The fusion of disruptive technologies is changing the fundamentals of our world almost roaming on its own towards a near future with unprecedented and unpredictable outcomes This new technological reason implies a rupture and a paradigm shift in the radical transition from an instrumental reason auxiliary to an autonomous reason essential This means the impossibility of further sustaining the illusion of technological neutrality Science culture and technology appear to be merging and in combat simultaneously And all fields of knowledge are alert to a main idea how deep is technology shaping our societies and politics Regardless of the outcome an age of instability is also an age of challenges In our era of uncertainty and while our civilization moves forward toward a hyper technological future we should not forget to discuss and reflect on the values and ethics we would like to survive the ruin of time and to pass on to the next generations The Other Calling Andrew Shanks, 2008-04-15 What is the

true calling of the intellectual In this provocative new book Andrew Shanks presents a distinctive fresh answer The Other Calling is a systematic riposte both to the elitism of philosophy in the heritage of Plato and to the typical individualism of Plato's philosophic opponents Here instead intellectual integrity is identified with a form of priesthood Asserts that intellectuals are critical to bringing together the common aspirations of a community Offers a strikingly original approach to the moral and political aspects of theology's relationship with philosophy exploring the perspectives of both disciplines Draws on the work and thought of Christians Muslims Hindus Buddhists Agnostics and Atheists Argues for a new religiously multicultural priesthood of all thinkers considering how once all intellectuals were as a matter of course also priests Published in the new and prestigious Illuminations series
