Levels Of Knowing Existence:

Levels of Knowing and Existence Harry L. Weinberg, 1959 **Knowing Life** Brianne Donaldson, 2025-02-28 *Knowing Life* examines the limits of dominant knowledge forms that contribute to current practices negatively affecting more than human beings while also exploring alternative approaches to knowing that are capable of reducing harm and maximizing planetary thriving Specifically this volume seeks multispecies answers to long standing questions in Western philosophy Who or what counts as a knower What kinds of knowing are valid Is knowledge a product of mind body or something else Historically these epistemic questions have been answered in ways that neutralize the knowing and knowledge contribution of and for more than human beings as well as those on the margins of society considered less than human Consequently these epistemic assumptions often support the destruction of ecological habitats industrialization of food animals widespread use of insect and plant toxins water and air pollution climate extinctions ecological militarism and the perpetual flow of living beings used for entertainment research clothing companionship and economic resources In this book crosscultural and multidisciplinary contributors including lesser known global religious philosophical accounts philosophies of plant and insect life race and disability studies laboratory epistemology embodied semiotics and scholar artists challenge and expand these classical concepts through diverse modes of embodied engagement on multispecies knowing toward open futures of planetary co flourishing **Understanding Maritain** Deal Wyatt Hudson, Matthew J. Mancini, 1987 **Readings in The Hidden Forces of Life** Santosh Krinsky, 2024-01-01 We tend to live our lives in the belief that we are separate and isolated from one another We struggle to survive and thrive in a world where every other being is competing with us for their own survival and self aggrandisement In such a world we suffer from self doubt anxiety fear and pressure We subject ourselves to internal judgment when we fail to meet the standards we believe govern our lives and we project our desires needs thoughts and concerns onto others and judge them on that standard as well What we fail to recognise is that we are actually united with all other beings in an interactive fully unified reality and that what we think what we feel what we experience what we suffer and what we enjoy all is the result of forces active in the world that vibrate within us when we are receptive to them and thereby create the reactions we experience We are receiving and transmitting stations for these universal forces Dr Dalal points out in the Preface to this compilation Dealt with herein are the diverse forces which act on us determining the course of events influencing our thoughts feelings and actions affecting our moods health and level of energy pulling the human being to nether depths or beckoning him towards lofty heights Spoken of in this book are also the hidden forces behind evolution and beneficent forces which man can learn more and more to draw upon Many of the passages in the book not only explain the nature of the various forces but also provide practical guidance in relation to both helpful as well as deleterious forces The systematic review of *The Hidden Forces of Life* reveals much that is hidden and occult from our normal daily view provides us considerable food for reflection and inner growth and helps us to overcome the limitations we set upon ourselves

through the inaccurate view of our separation and isolation from the rest of the creation **Existence** Valentin Matcas,2016-04-20 It is easy to distinguish what it is from what it is not just by telling them apart Since this is the simplistic empirical approach while studying existence Yet what exactly is existence itself How or where does existence exist Is existence limited to the human existence human cognition or the humankind Yes because all living beings are defined by existence just because the term being implies to be to exist However the term real implies the same Because the concept existence has a multitude of terms defining it and now we have to consider them while studying existence in all details And as you notice we are not looking for a superficial empirical study because we already have one since we already know that everything that exists exists and everything that does not exist does not exist We want more we want a comprehensive study of existence from all perspectives existential rational living interconnected social objective analytical created consensual cognitive natural mathematical consensual developmental scientific fiat empirical subjective philosophical ideological highjective accurate algorithmic legal and correspondent Only that from all these distinct perspectives of existence we end up with a distinct type of existence as we have to consider these But what exactly is there escaping the senses of perception of all living beings in this world The nonexistent certainly And what exactly exists and takes place beyond existence itself Again it is the nonexistent Yet this is the case only for us and from our perspective since existence is relative to any observer You have one existence defining you and it is your own existence And in this manner you may exist even on your own and you still exist for yourself Yet for others if they never encounter and never interact with you directly and implicitly then you do not exist for them you are simply part of the inexistent according to them and so are they for you from your own perspective Because there might be zillions of worlds and realities similar to ours but if they never interact with us then they never exist for us while we never exist for them And this is the case for all realities because nothing exists objectively at the exterior of any reality not even the concept of exterior itself We already notice how existence is capable to define everything as existing or not in this simple Boolean manner And this is the case because existence stands towards the base of our world defining everything within to exist to be real or simply to be since it is the same concept However when you try to define existence itself you cannot since there is not much below it to form a meaningful base of knowledge defining it but only the absent the missing the unreal or the nonexistent distinguishing existence trivially by contrast This is your only mean to define accurately existence now as being different from the nonexistent and this is why you end up with a Boolean depiction for existence To be or not to be But never to be and not to be While existence defines everything else in a similar Boolean manner you either exist or you do not You either interconnect with others being part of their existence or not You are either alive or not You are either fulfilling throughout life or not Throughout this book we study existence entirely through accurate facts from all perspectives and in all circumstances in order to understand it accurately Furthermore we use existence to define understand and explain everything related to humans and human life And since existence stands at the base of everything

that exists this accounts for everything

The Whole Person Mark H. Bickhard, 2024-11-27 The Whole Person explores the realms of theory and philosophy concerning minds and persons This book presents models of the emergent realization of multiple mental processes and of the constitution of social realities and social persons Each chapter explores prevalent theoretical and philosophical assumptions that obstruct the acceptance of models depicting emergent realization offering analyses of these barriers and demonstrating ways to overcome them Rooted in the framework of process metaphysics this book models metaphysically genuine emergence paving the way for a comprehensive model of multifarious normative emergences These normative emergences include phenomena such as function dysfunction representational truth and falsity rational irrational ethical unethical and others that shape our mental and social landscapes The discussion extends to the macro evolutionary culmination of mental processes in a model of reflective consciousness The book then extends its exploration to the foundational role of mental processes in the emergence of social realities and persons with language acting as a core element in these emergences Addressing evolutionary aspects brain processes developmental processes moral normativities and self consistency considerations The Whole Person presents a holistic integration of decades of constructive work Endorsements This ambitious yet unpretentious carefully constructed and argued book is a must read for anyone with serious interest in the nature of persons and the psychology of personhood Mark Bickhard s The Whole Person is a sustained and convincing narrative about our individual and collective evolution and emergence as the unique beings that we are Of particular interest is his account of the emergence of persons as homo socius Here Professor Bickhard captures key but often overlooked historical sociocultural and socio developmental dynamics and processes that make us who we are a species constantly interacting with each other and the world in a never ending process of mutual co constitution By theorizing a process metaphysics replete with emergent normativity that does not clash with a naturalistic ontological psychology Bickhard takes a giant step toward seeing ourselves as we are and as we might become Jack Martin Professor Emeritus Simon Fraser University A typical psychological theory offers narrow generalizations about data sets obtained by semi proprietary empirical methods The basic empirical research on which such theories have depended is in crisis tremendous effort has gone into ill motivated studies applying statistics inappropriately to inadequate samples too often generating irreproducible results The kind of theory that psychology needs is broad and deep pays no respect to boundaries between specialties makes falsifiable predictions and answers to arguments in principle The Whole Person presents just such a theory psychologists whether their aim is to extend it and support it or to challenge it and refute it will benefit from studying it closely Robert L Campbell Professor Emeritus Psychology Clemson University Presents models of how multiple mental processes are emergently realized and of how social persons are constituted Discusses the problems of representation and their implications Reviews naturalism and normativity within the early 20th century

Synthesis and Intentional Objectivity

Nathan Rotenstreich,2013-04-17 We shall be concerned in the following pages with some issues common to the systems of both Kant and Husserl Given the structured nature of philosophical systems however the topics cannot be isolated from the systems in which they function imbuing them in each case with a specific direction An examination of the basic concept of Anschauung will indicate the difference between the two systems To be sure Anschauung points in both to the visual aspect of knowledge an element inherent in the classical concept of theoria which is related to the word horao to see In Kant however the visual aspect is not the highest component of cognition since it is related to sensuality Anschauung belongs to the synthesis and not the summit of knowledge It is given before thinking and is present in the ongoing search for relations between data In Kant's understanding pure reason can be related to data only through the medium of understanding In this sense we could say that Anschauung being a variation of Schau is that which can be perceived with the eyes In Kant's system it points to the presence of that which is given and thus to reception whereas knowledge proper is a synthesis of reception and spontaneity
