Kim, 2023-01-01 Yale French Studies 142 explores the contemporary relevance of an alternative strand of feminism as theorized by Monique Wittig This volume of Yale French Studies foregrounds Monique Wittig 1935 2003 a writer who left France to live and teach in the United States in a diverse range of multidisciplinary conversations in literary studies history and gender and sexuality studies to demonstrate how Wittig's theoretical and literary work remains an indispensable resource for thinking and creating in the twenty-first century Editors Morgane Cadieu and Annabel L. Kim flip the materialist lesbianism that Wittig's collection of essays The Straight Mind centers and describes as being the core of Wittig's work to deal instead with lesbian materialism thereby making lesbian the method and materialism the object and allowing Wittig's work to realize its full range The volume reinterrogates the official historiography of French materialist feminism expands the intellectual framework within which Wittig's work is usually considered insists on the language-centric materialism that emerges from Wittig's writing as a way of joining the political with the literary and attends to the way this literary material inspires material responses and creations within the plastic arts Underlying the entire volume is a keen sense of the materiality of Wittig's archives housed at the Beinecke Rare Book and Manuscript Library at Yale University as a site of lesbian thought in Wittig's radical sense of the term a fugitive positionality **The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century** Peter E. Gordon, Warren Breckman, 2019-08-29 The Cambridge History of Modern European Thought is an authoritative and comprehensive exploration of the themes, thinkers and movements that shaped our intellectual world in the late eighteenth and nineteenth century Representing both individual figures and the contexts within which they developed their ideas each essay is written in a clear accessible style by leading scholars in the field and offers both originality and interpretive insight This second volume surveys twentieth-century European intellectual history conceived as a crisis in

modernity Comprised of twenty one chapters it focuses on figures such as Freud Heidegger Adorno and Arendt surveys major schools of thought including Phenomenology Existentialism and Conservatism and discusses critical movements such as Postcolonialism Structuralism and Post structuralism Renouncing a single master narrative of European thought across the period Peter E Gordon and Warren Breckman establish a formidable new multi faceted vision of European intellectual history for the global modern age

The Burnt Book Marc-Alain Ouaknin, 2024-05-14 A profound look at what it means for new generations to read and interpret ancient religious texts In this book rabbi and philosopher Marc Alain Ouaknin offers a postmodern reading of the Talmud Combining traditional learning and contemporary thought Ouaknin dovetails discussions of spirituality and religious practice with such concepts as deconstruction intertextuality undecidability multiple voicing and eroticism in the Talmud On a broader level he establishes a dialogue between Hebrew tradition and the social sciences which draws for example on the works of Levinas Blanchot and Jabès as well as Derrida The Burnt Book represents the innovative thinking that has come to be associated with a school of French Jewish studies headed by Levinas and dedicated to new readings of traditional texts The Talmud transcribed in 500 C E is shown to be a text that refrains from dogma and instead encourages the exploration of its meanings A vast compilation of Jewish oral law the Talmud also contains rabbinical commentaries that touch on everything from astronomy to household life Examining its literary methods and internal logic Ouaknin explains how this text allows readers to transcend its authority in that it invites them to interpret discuss and recreate their religious tradition An in depth treatment of selected texts from the oral law and commentary goes on to provide a model for secular study of the Talmud in light of contemporary philosophical issues Throughout the author emphasizes the self effacing quality of a text whose worth can be measured by the insights that live on in the minds of its interpreters long after they have closed the book He points out that the burning of the Talmud in anti Judaic campaigns throughout history has in fact been an unwitting act of complicity with Talmudic philosophy and the practice of self effacement Ouaknin concludes his discussion with the story of the Hasidic master Rabbi Nahman of Bratslav who himself burned his life achievement a work known by his students as the Burnt Book This story leaves us with the question should all books be destroyed in order to give birth to thought and renew meaning

Barley, Julian E. Orr, 2018-10-18 Between Craft and Science brings together leading scholars from sociology anthropology industrial relations management and engineering to consider issues surrounding technical work the most rapidly expanding sector of the labor force Part craft and part science part blue collar

and part white collar technical work demands skill and knowledge but is rarely rewarded with commensurate status or salary The book first considers the anomalous nature of technical work and the difficulty of locating it in any conventional theoretical framework Only an ethnographic approach studying the actual doing of the work will make sense of the subject the authors conclude The studies that follow report daily practice filled with disjunctures and ironies that mirror the ambiguities of technical work s place in the larger culture On the basis of those studies the authors probe questions of policy management and education Between Craft and Science considers the cultural difficulties in understanding technical work and advances coherent practice oriented insights into this anomalous phenomenon *Research Handbook on Jurilinguistics* Anne Wagner,Aleksandra Matulewska,2023-10-06 This Research Handbook offers a comprehensive study of jurilinguistics that not only presents the latest international research findings among academics and practitioners but also provides a new approach to the phenomena and nature of communicative flexibility legal genres vulnerability of interlingual legal communication and the cultural landscape of legal translation *The Coming Authoritarian Ecology* Fabrice Flipo,2018-07-31 The book examines ecological issues such as climate change and biodiversity articulating local and global scales and short and long term perspectives questioning what development and progress are The goal is to show how diverging points of view are conflictually articulated to one another in a political ideology perspective This perspective which is close to the main actor s point of view allows displacement of the usual analysis and offers a new synthesis *Legitimacy, Legal Development and Change* David K. Linnan,2016-04-22 This book addresses critical questions about how legal development works in practice Can law be employed to shape behavior as a form of social engineering or must social behavior change first relegating legal change to follow as ratification or reinforcement And what is legal development s source of legitimacy if not modernization But by the same token whose version of modernization will predominate absent a Western monopoly on change There are now legal development alternatives especially from Asia so we need a better way to ask the right questions of different approaches primarily in non Western Asia Africa the Islamic world plus South America Incoming waves of change like the Arab spring lie on the horizon Meanwhile debates are sharpening about law s role in economic development versus democracy and governance under the rubric of the rule of law More than a general survey of law and modernization theory and practice this work is a timely reference for practitioners of institutional reform and a thought provoking interdisciplinary collection of essays in an area of renewed practical and scholarly interest The contributors are a distinguished international group of scholars and practitioners of law development social sciences and religion with extensive experience in the developing world *Internet Oligopoly* Nikos Smyrnaio,2018-09-10 Drawing on a historical and political economy analysis this book provides insight on how under neoliberal hegemony the internet was transformed from an emancipatory project for humanity to the final frontier of unrestrained capitalism *The End of the Schism* Udi Greenberg,2025-05-01 After centuries of enmity why did Europe s Catholics and Protestants reconcile Udi

Greenberg argues that modern Christian cooperation arose not from tolerance but from fears of socialism feminism and Afro Asian liberation movements In seeking to preserve Christian life these former rivals forged a lasting alliance that remade the continent

Heidegger in the Face of the Environmental Question Enrique Leff,2023-12-22 This volume engages with the work of Heidegger to argue that the modern environmental crisis is fundamentally a crisis of understanding Life resulting from the symbolic codification of the world from the Logos of Greek philosophy to the rationality of the modern world and resulting in a metaphysics that privileges ontological thinking on the question of being over the environmental question and the concern for the conditions of life Exploring the work of the three principal thinkers of the Lebensphilosophie Bergson Dilthey and Husserl it charts the itinerary of Heidegger s work and exposes its conflicts with the work of Marx Plessner Haar and Derrida A critical argument against the colonization of the world by Eurocentric reason and for the deconstruction of Capital Heidegger in the Face of the Environmental Question draws on Latin American environmental thought to re think the conditions for life on Earth It will therefore appeal to scholars of philosophy political theory and political sociology with interests in environmental philosophy political ecology and socioeconomic transformation

Framing Sustainability in Language and Communication Maida Kosatica,Sean P. Smith,2025-03-31 This collection brings together established and emerging scholars for a critical framing of sustainability through the lens of language and communication social semiotics and media studies The volume underscores the importance of re envisioning sustainability around not only climate change and biodiversity loss but in broader systems of ecological social and economic imbalances on a global scale The book begins with a visual essay which provides a semiotic foundation for understandings of sustainability across disciplinary approaches in the chapters that follow Subsequent chapters are organized around four thematic parts reframing sustainability in a colonial world the semiotics of sustainability communicating sustainability in everyday life and sustainability communication in the arts A closing commentary by Crispin Thurlow offers critical reflections on sustainability within language and communication research and beyond This book will be of interest to scholars addressing sustainability across diverse disciplines including language and communication social semiotics linguistic anthropology environmental communication media studies and development studies

Political Ecology Enrique Leff,2021-02-23 This book offers a conceptual framework for the critical understanding of the present socio environmental conflicts It reflects on the evolution of subject and thought a shift in environmental thinking triggered by the development of eco territorial conflicts and the social responses given to the environmental question Bringing together 40 years of the authors writing and research the book explores the transition from ecological economics and historical materialism to ecological Marxism It unpacks the forging of political ecology from value theory in political economy to ecological distribution and ecologies of difference a transition to an environmental rationality grounded in the ontology of diversity a politics of difference and an ethics of

otherness This evolution in thinking gives consistency to a theoretical discourse able to respond to the territorial conflicts generated by the radicalization of the environmental question as a key social issue of our times The book is a call to respond to the urgent challenge of reversing the tendency towards the entropic death of the planet and to building a sustainable world order Participation, Associations, Development, and Change Albert Meister, 1984-01-01
