Liberal Education Pb 1972:

Reimagining Liberal Education Hanan Alexander, 2015-01-29 This challenging and provocative book reimagines the justification substance process and study of education in open pluralistic liberal democratic societies Hanan Alexander argues that educators need to enable students to embark on a quest for intelligent spirituality while paying heed to a pedagogy of difference Through close analysis of the work of such thinkers as William James Charles Taylor Elliot Eisner Michael Oakeshott Isaiah Berlin Martin Buber Michael Apple and Terrence McLaughlin *Reimagining Liberal Education* offers an account of school curriculum and moral and religious instruction that throws new light on the possibilities of a nuanced rounded education for citizenship Divided into three parts Transcendental Pragmatism in Educational Research Pedagogy of Difference and the Other Face of Liberalism and Intelligent Spirituality in the Curriculum this is a thrilling work of philosophy that builds upon the author's award winning text *Reclaiming Goodness Education and the Spiritual Quest*

Engineers for Change Matthew Wisnioski, 2012-10-19 An account of conflicts within engineering in the 1960s that helped shape our dominant contemporary understanding of technological change as the driver of history In the late 1960s an eclectic group of engineers joined the antiwar and civil rights activists of the time in agitating for change The engineers were fighting to remake their profession challenging their fellow engineers to embrace a more humane vision of technology In *Engineers for Change* Matthew Wisnioski offers an account of this conflict within engineering linking it to deep seated assumptions about technology and American life The postwar period in America saw a near utopian belief in technology's beneficence Beginning in the mid 1960s however society influenced by the antitechnology writings of such thinkers as Jacques Ellul and Lewis Mumford began to view technology in a more negative light Engineers themselves were seen as conformist organization men propping up the military industrial complex A dissident minority of engineers offered critiques of their profession that appropriated concepts from technology's critics These dissidents were criticized in turn by conservatives who regarded them as countercultural Luddites And yet as Wisnioski shows the radical minority spurred the professional elite to promote a new understanding of technology as a rapidly accelerating force that our institutions are ill equipped to handle The negative consequences of technology spring from its very nature and not from engineering's failures Sociotechnologists were recruited to help society adjust to its technology Wisnioski argues that in responding to the challenges posed by critics within their profession engineers in the 1960s helped shape our dominant contemporary understanding of technological change as the driver of history

Thomas G. Guarino, 2005-05-01 Guarino argues in this book that the doctrinal form of the Christian faith in its essential characteristics calls for certain theoretical exigencies This is to say that the proportion and beauty of the form is not served or illuminated by simply any presuppositions Rather a determinate understanding of first philosophy of the nature of truth of hermeneutical theory of the predication of language and mutual correlation is required if Christian faith and doctrine are to maintain a recognizable and suitably mediative form Failing to adduce specific principles will lead either to a simple assertion of Christian truth in which case the form of Christianity becomes less intelligible and attractive or one will substitute a radically changed form which is itself inappropriate for displaying the fundamental revelatory narrative of faith The house of Christian faith possesses a certain proportion of structure the form will sag badly if one removes an undergirding item or if one beam is replaced with another of variable shape or size The form s beauty will either be obscured no longer clearly visible or the form will become something quite different no longer architectonically related to what was originally the case The intention of this book is to discuss those doctrinal characteristics considered fundamental to the Christian faith as protective of its revelatory form and concomitantly to examine the theoretical principles required if such form is to remain both intelligible and beautiful *Thinking About The Curriculum (Routledge Revivals)* William A Reid, 2013-10-14 First published in 1978 this book looks at the curriculum crisis of the 1970s examining the effect it has had for Curriculum Studies and curriculum policy making It focuses on a time when long established structures and procedures were challenged and schools were accused of having lost touch with the wants and needs of communities The author argues that the curriculum should become part of community interest and be led by this rather than by professionals and initiates Indeed he feels that the curriculum must have an identity which avoids alliances with technocrats bureaucrats or ideologues but yet has a positive philosophy and a commitment to good values
