Poincare's Prize George G. Szpiro, 2008-07-29 The amazing story of one of the greatest math problems of all time and the reclusive genius who solved it. In the tradition of Fermat's Enigma and Prime Obsession, George Szpiro brings to life the giants of mathematics who struggled to prove a theorem for a century and the mysterious man from St. Petersburg, Grigori Perelman, who finally accomplished the impossible. In 1904, Henri Poincaré developed the Poincaré Conjecture, an attempt to understand higher-dimensional space and possibly the shape of the universe. The problem was he couldn't prove it. A century later, it was named a Millennium Prize problem, one of the seven hardest problems we can imagine. Now this holy grail of mathematics has been found. Accessibly interweaving history and math, Szpiro captures the passion, frustration, and excitement of the hunt and provides a fascinating portrait of a contemporary noble genius.
