

The background of the cover is a painting of a young boy with brown hair, wearing a blue shirt, leaning over the side of a boat and looking out at a body of water. The water and the background are painted in shades of green and yellow, suggesting a swampy or marshy environment. A dragonfly is flying in the upper left corner.

Keeper Of The Swamp:

Keeper of the Swamp Ann Garrett, 1999 A boy and his ailing grandfather pole a small boat out into the Louisiana bayou. Suddenly they spot Boots, a female alligator the grandfather saved from poachers years ago. How will the boy face the danger in learning to take care of this wild creature? Strikingly illustrated with artwork that combines oil painting and computer imaging, *Keeper of the Swamp* is a scary and satisfying tale that carries a strong environmental message. *The Tarantula Keeper's Guide* Stanley A. Schultz, Marguerite J. Schultz, 2009-01-01 Terrarium hobbyists and arachnid lovers will rejoice at this comprehensive guide on tarantulas. The *Tarantula Keeper's Guide* provides in-depth information on their biology and advice on housing and caring for pet tarantulas. Tarantulas are small and easy to maintain, exotic pets that are fun and captivating to watch. The *Tarantula Keeper's Guide* includes detailed information on the natural history and biology of these fascinating creatures. This spider book is filled with color photos, scientifically accurate line art, and detailed care instructions. It's no wonder that *The Tarantula Keeper's Guide* is considered the Bible of Arachnoculture by hobbyists and arachnid enthusiasts. *Bee-keeper's Magazine*, 1883 **The Power of Picture Books in Teaching Math and Science** Lynn Columbia, 2017-05-12 This book's 50 plus lessons, each based on a different picture book or story, will help classroom teachers build a foundation for teaching math, science, and social studies concepts to their students. Each lesson uses children's literature to make challenging abstract concepts relevant to children's lives, inviting them to learn these concepts while responding to a story's illustrations, theme, characters, and plot. The lessons also demonstrate how teachers can use children's literature to meet national standards in math, science, and social studies. Chapters 1 through 5 set the stage for using picture books, discussing the effective imaginative integration of literature into the classroom. Teachers will learn to create an environment that ensures that when children and books come together, the experience is enjoyable and thought-provoking. Chapters 6 through 9 provide individual lessons by grade level with detailed activities based on specific books.

Peloquin, 2014-03-11 *Keeper of the Tears* is a fantastical story about the Journey of a band of unlikely swamp creatures waging a battle to return a precious tear to the Keeper Watch and see how they reflect the courage, fears, and self-doubt that is so much like our world. nineteenth century roots of environmental writing in American literature are often mentioned in passing and sometimes studied piece by piece. *Writing the Environment in Nineteenth Century American Literature: The Ecological Awareness of Early Scribes of Nature* brings together numerous explorations of environmentally aware writing across the genres of nineteenth century literature. Like Lawrence Buell, the authors of this collection find Thoreau's writing a touchstone of nineteenth century environmental writing, particularly focusing on Thoreau's claim that humans may function as scribes of nature. However, these studies of Thoreau's antecedents, contemporaries, and successors also reveal a range of other writers in the nineteenth century whose literary treatments of nature are often more environmentally attuned than most readers have noticed. The writers whose works are studied in this collection include canonical and forgotten writers, men and women, early nineteenth century and late nineteenth century authors, pioneers and conservationists. They drew attention to the conflicted relationships between humans and the American continent as experienced by Native Americans and European Americans. Taken together, these essays offer a fresh perspective on the roots of environmental literature in nineteenth century American nonfiction, fiction, and poetry, as well as in multi-genre compositions such as the travel writings of Margaret Fuller. Bringing largely forgotten voices such as John Godman alongside canonical voices such as Nathaniel Hawthorne, Herman Melville, Walt Whitman, and Emily Dickinson, the authors whose writings are studied in this collection produced a diverse tapestry of nascent American environmental writing in the nineteenth century. From early nineteenth century writers such as poet Philip Freneau and novelist Charles Brockden Brown to later nineteenth century conservationists such as John James Audubon and John Muir, *Scribes of Nature* shows the development of an environmental consciousness and a growing conservationist ethos in American literature. Given their often surprisingly healthy respect for the natural environment, these nineteenth century writers offer us much to consider in an age of environmental crisis. The complexities of the supposed nature/culture divide still work into our lives today as economic and environmental issues are often seen at loggerheads when they ought to be seen as part of the same conversation of what it means to live healthy lives and to pass on a healthy world to those who follow us in a world where human activity is becoming increasingly threatening to the health of our planet.
