Keeping Track Of Time:

Logical Fictions Frederick Bauer, 2007-12 The media bombard us with claims that are often strange unclear and even upsetting Quantum physicists claim that vacuum nothingness is not really nothing because it teems with energy and virtual particles Psychological research suggests that most of our neighbors suffer from some degree of mental disorder Social scientists assure us that science itself is simply a cultural myth Can anyone sort out fact from fiction in today's world The answer thankfully is Yes But first you must make a radical shift in your approach because serious thinking about reality involves serious thinking about fiction not only in your everyday mind but also in the scholarly and technical realms For anyone who has ever wondered and you should wonder whether there really are such things as government society the economy or even marriage the deeply philosophical and utterly practical *Logical Fictions* shows you how a solid grounding in logic and language can help you avoid getting trapped by the ideological fictions prevalent in today's sophisticated world Consider yourself warned humorous and filled with entertaining examples this book will stretch your brain and provoke your thoughts Your view of the world may never be the same

When Things Seem Odd Michael Joseph Legare, 2016-01-12 As you will discover by reading this book the term stranger danger is not only misleading to children it actually does more harm than good By the constant reminder that a child encounters by media adults and television programs about never talking to strangers children are often left confused and powerless of how to deal with the many strangers they come across on a day to day bases Secondly this book aims to teach children to become aware of their instincts feelings of uneasiness suspicion or otherwise their apprehension when it is appropriate and important to do so and when it comes to people and situations they encounter as they go about their lives Not just people of whom they do not know strangers but also of people of whom they may already know Finally this book is in two parts The first part are the three short stories of Polly a fictional character that describes in detail certain dilemmas she encounters when she becomes lost first at a grocery store next at the fair and then in the third story the close encounter she experiences of nearly being abducted by a stranger The stories go into detail about the positive aspects that Polly took each time to protect herself in each case scenario The encounters are based on a realistic chain of circumstances The second part of this book is aimed towards parents to look at self protection strategies suggested by some of the world's most prestigious experts on the subject of child safety and the criminal mind
