Taking Nazi Technology Douglas M. O'Reagan, 2021-03-30 Intriguing real life espionage stories bring to life a comparative history of the Allies efforts to seize control and exploit German science and technology after the Second World War During the Second World War German science and technology posed a terrifying threat to the Allied nations These advanced weapons which included rockets V 2 missiles tanks submarines and jet airplanes gave troubling credence to Nazi propaganda about forthcoming wonder weapons that would turn the war decisively in favor of the Axis After the war ended the Allied powers raced to seize intellectual reparations from almost every field of industrial technology and academic science in occupied Germany It was likely the largest scale technology transfer in history In Taking Nazi Technology Douglas M O Reagan describes how the Western Allies gathered teams of experts to scour defeated Germany seeking industrial secrets and the technical personnel who could explain them Swarms of investigators invaded Germany s factories and research institutions seizing or copying all kinds of documents from patent applications to factory production data to science journals They questioned hired and sometimes even kidnapped hundreds of scientists engineers and other technical

personnel They studied technologies from aeronautics to audiotapes toy making to machine tools chemicals to carpentry equipment They took over academic libraries jealously competed over chemists and schemed to deny the fruits of German invention to any other land including that of other Allied nations Drawing on declassified records O Reagan looks at which techniques worked for these very different nations as well as which failed and why Most importantly he shows why securing this technology how the Allies did it and when still matters today He also argues that these programs did far more than spread German industrial science they forced businessmen and policymakers around the world to rethink how science and technology fit into diplomacy business and society itself
