## **From Dream To Discovery On Being A Scientist:**

From Dream to Discovery Hans Selye, 1964 2000 Gift from the estate of Dr Cecil Wittson From dream to discovery, 1964 **Chase, Chance, and Creativity** James H. Austin, 2003-08-15 A personal story of the ways in which persistence chance and creativity interact in biomedical research This first book by the author of *Zen and the Brain* examines the role of chance in the creative process James Austin tells a personal story of the ways in which persistence chance and creativity interact in biomedical research the conclusions he reaches shed light on the creative process in any field Austin shows how in his own investigations unpredictable events shaped the outcome of his research and brought about novel results He then goes beyond this story of serendipity to propose a new classification of the varieties of chance drawing on his own research and examples from the history of science including the famous accidents that led Fleming to the discovery of penicillin Finally he explores the nature of the creative process considering not only the environmental and neurophysiological correlates of creativity but also the role of intuition in both scientific discoveries and spiritual quests This updated MIT Press paperback edition includes a new introduction and recent material on medical research creativity and spirituality

Gaither's Dictionary of Scientific Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics **Scientist as Subject** Michael J. Mahoney, 2004-12-31 In this book originally published by Ballinger in 1976 Michael Mahoney documents the idiosyncracies and foibles of the scientific process as a field of endeavor A new introduction updates his discussion in light of subsequent developments including such aspects of academia as politics and tenure publication and power relations science studies and constructivist inquiry and what have come to be called the science wars A Lab of One's Own Rita Colwell, Sharon Bertsch McGrayne, 2021-08-17 Colwell the first female director of the National Science Foundation discusses the entrenched sexism in science the elaborate detours women have taken to bypass the problem and how to fix the system When she first applied for a graduate fellowship in bacteriology she was told We don't waste fellowships on women Over her six decades in science as she encounters other women pushing back against the status quo Colwell also witnessed the advances that could be made when men and women worked together Here she offers an astute diagnosis of how to fix the problem of sexism in science and a celebration of the women pushing back **The Whys of a Scientific Life** John R. Helliwell, 2018-10-03 The first in the Focus Series on Global Science Education The Whys of a Scientific Life examines why scientists do what they do Working from a diverse background in scientific research including academic departments of

physics and chemistry as well as the scientific civil service the author describes the choices scientists make Fundamentally a scientist asks questions based on curiosity In addition the environment is very important By influencing their elected governments society itself shapes the scientific research that is undertaken by scientists This book follows on naturally from the author's last book *Skills for a Scientific Life* which is a how to guide for scientists and those that aspire to engage in science as a career Key Features User friendly and concise this text dissects the whys of science and discovery The author has outstanding experience in mentoring science students and staff and also in outreach activities for the public and students of all ages including schools The final chapter emphasises the joys of the scientist in research

From Humans To Computers: Cognition Through Visual Perception Victor V Alexandrov, N D Gorsky, 1991-06-25 This book considers computer vision to be an integral part of the artificial intelligence system The core of the book is an analysis of possible approaches to the creation of artificial vision systems which simulate human visual perception Much attention is paid to the latest achievements in visual psychology and physiology the description of the functional and structural organization of the human perception mechanism the peculiarities of artistic perception and the expression of reality Computer vision models based on these data are investigated They include the processes of external data analysis internal environmental model synthesis and the generating of behavioristic responses based on external and internal models comparison Computer vision system evolution resulting from environmental effects is also considered A unique feature of this book is the authors use of black and white and colour prints of traditional and contemporary Russian art to illustrate their principal theses In doing so they introduce the reader to a particularly Russian view of the world

**Objectivity** Lorraine Daston, Peter L. Galison, 2021-02-02 Objectivity has a history and it is full of surprises In *Objectivity* Lorraine Daston and Peter Galison chart the emergence of objectivity in the mid nineteenth century sciences and show how the concept differs from alternatives truth to nature and trained judgment This is a story of lofty epistemic ideals fused with workaday practices in the making of scientific images From the eighteenth through the early twenty first centuries the images that reveal the deepest commitments of the empirical sciences from anatomy to crystallography are those featured in scientific atlases the compendia that teach practitioners of a discipline what is worth looking at and how to look at it Atlas images define the working objects of the sciences of the eye snowflakes galaxies skeletons even elementary particles Galison and Daston use atlas images to uncover a hidden history of scientific objectivity and its rivals Whether an atlas maker idealizes an image to capture the essentials in the name of truth to nature or refuses to erase even the most incidental detail in the name of objectivity or highlights patterns in the name of trained judgment is a decision enforced by an ethos as well as by an epistemology As Daston and Galison argue atlases shape the subjects as well as the objects of science To pursue objectivity or truth to nature or trained judgment is simultaneously to cultivate a distinctive scientific self wherein knowing and knower converge Moreover the very point at which they visibly converge is in the very act of seeing not as a separate individual but as a member of a particular

scientific community Embedded in the atlas image therefore are the traces of consequential choices about knowledge persona and collective sight Objectivity is a book addressed to any one interested in the elusive and crucial notion of objectivity and in what it means to peer into the world scientifically

**Stress in Health and Disease** Hans Selye, 2013-10-22 Stress in Health and Disease presents the principal pathways mediating the response to a stressor It discusses the clinical background of cross resistance and treatment with stress hormones It addresses the diseases of adaptation or stress diseases diagnostic indicators and functional changes Some of the topics covered in the book are the concept of heterostasis stressors and conditioning agents morphology of frostbite characteristics manifestations of stress catecholamines and their derivatives various hormones and hormone like substances FFA triglycerides and lipoproteins morphologic changes and hypothalamo hypophyseal system The gastrointestinal diseases of adaptation are covered The schizophrenia and related psychoses is discussed The text describes the manic depressive disease and senile psychosis A study of the experimental cardiovascular diseases and neuropsychiatric diseases is presented A chapter is devoted to the diseases of adaptation in animals Another section focuses on the shift in adeno-hypophyseal activity and catatonic hormones The book can provide useful information to scientists doctors students and researchers

**Women Scientists in America** Margaret W. Rossiter, 1998-09-29 Winner of the Pfizer Award for Outstanding Book in the History of Science Margaret Rossiter's widely hailed Women Scientists in America Struggles and Strategies to 1940 marked the beginning of a pioneering effort to interpret the history of American women scientists That effort continues in this provocative sequel that covers the crucial years of World War II and beyond Rossiter begins by showing how the acute labor shortage brought on by the war seemed to hold out new hope for women professionals especially in the sciences But the public posture of welcoming women into the scientific professions masked a deep seated opposition to change Rossiter proves that despite frustrating obstacles created by the patriarchal structure and values of universities government and industry women scientists made genuine contributions to their fields grew in professional stature and laid the foundation for the breakthroughs that followed 1972

From Magical Child to Magical Teen Joseph Chilton Pearce, 2003-02-24 A groundbreaking perspective on Nature's plan for full human creativity and intelligence during the teen years Shows what is at the core of today's serious social and psychological problems Explores the sexual and spiritual stage of adolescent development Details the connection between adolescent brain and heart development and the issue of nature vs nurture By the author of Magical Child 250 000 copies sold Something is supposed to happen during the adolescent years something greater than MTV video games and the Internet Joseph Chilton Pearce describes this something as the natural mandate for post biological development the development of the sexual and spiritual senses and expansion of our growth process outside of our bodies and into the physical world that surrounds us Though first written in the mid 1980s the message of From Magical Child to Magical Teen is even more compelling and helpful today especially for those who live with and work with adolescents Drawing on the stages

of development outlined by Swiss biologist Jean Piaget and the brain research of neuroscientist Paul MacLean Pearce demonstrates how nature has built into us an agenda for the intelligent unfolding of our lives He offers a powerful critique of contemporary child rearing practices and a groundbreaking alternative to existing perspectives on adolescence so we can unleash our greatest potential as well as that of our children in order to experience our fullness in the manner nature intended all along
