**I Like to Feed Dinosaurs!** Jeff Ashley, 2023-02-02 On a back road in Saranac Lake New York is Petrova Avenue where a small rock shop owned by the Bristol family was located As a young boy I remember going to that rock shop

every summer when my family traveled to visit my grandparents in Lake Placid That rock shop had treasures lots of treasures There were fossils that were millions of years old and geodes that you could buy and have cut open The geodes were my favorite It would take half an hour to cut open those big round grapefruit sized rocks and when they split you could hear a thump inside the oil cutting saw tank Then they would open the saw lid and you would see what kind of treasure was inside the geode That was fifty years ago I can still see the sparkling light shining off the oil covered hollow inside and the purple crystals of amethyst that shined back The geodes with large dark purple amethyst crystals were the most valuable I still have those same geodes today Perhaps because of this experience my favorite color became purple and I went on to college and majored in geology How I wondered as a young boy could anyone be certain that those fossils were indeed millions of years old Geology teaches us that the world is 4 75 billion years old and that the Grand Canyon represents 1 8 billion years of earth s history with an average depth of over one mile in thickness six thousand feet According to <https://www.ocean.washington.edu> it also tells us that the average thickness of land on our planet is 2 755 feet and 75 percent of the surface rocks are sedimentary <https://digitalatlas.cose.isu.edu> Sedimentary rocks are rocks that have been broken down from other rocks by the action of water Where did all the water come from to create so many sedimentary rocks that are even found 2 755 feet above sea level Virtually all scientific sources agree that if all the ice on the planet melted North Pole South Pole glaciers etc the ocean would only rise 200 230 feet above sea level So where did all the water come from to make those sedimentary rocks that are over thousands of feet above sea level Science does not have an answer Did you know if you apply common rates of ocean sedimentation to how long it would take the sedimentary layers in the Grand Canyon to form it will only take 5 4 million years or less to form the sedimentary layers of the Grand Canyon instead of 1 800 million years There are very pronounced errors in the theory of evolution that can be proven with simple math and common sense explanations That is what this book is about common sense rebuttals of what has become a worldwide philosophy evolution There are simple answers to the questions of why the earth is not extremely old and where all the water came from that formed sedimentary rocks at such high elevations above sea level These answers are not taught in our school classrooms In this book I attempt to write from a less complicated stance explaining in layman s terms truths that refute the theory of evolution Dinosaurs: Marvels of God's Design Dr. Tim Clarey, 2015-10-23 This book fills a critical need for sound science about dinosaurs from a biblical viewpoint focusing on the five major dinosaur groups Dinosaurs are in the news every day as well as viewed in museums and on science channels Unfortunately these portrayals always push an evolutionary agenda This book counters those arguments with solid accurate and biblically based science Explains the latest findings in dinosaur biology behavior extinction and more Covers the complete spectrum of dinosaur related topics from the earliest dinosaur discoveries to debate over why they went extinct Provides a visually stunning dynamic exploration into the history of dinosaurs through the most current discoveries few have seen before Because of secular books and television shows many Christians have struggled to

explain how dinosaurs fit in the biblical timeline The word dinosaur is not found in the Bible which has caused some well meaning Christians to turn to secular science for explanations including more speculation than actual fact Unfortunately this misdirection has caused many people to lose faith in the Bible especially the young generation This book will restore faith in the Word of God as it connects the Bible with science Read and discover how dinosaurs are part of God s creative glory

*The Paradoxical Situation in Carcinogenesis* George D. K. Gogichadze,2019-11-01 This volume is dedicated to the ethical problems related to carcinogenesis It discusses the karyogamic theory in a new light using new arguments and considers the prospects of cancer prevention and treatment The current stage of scientific development fails to answer such questions as What is a cancer cell What is its essence In the opinion of most cancer researchers the genetic apparatus of the target cell should be responsible for the conversion of a tumour cell into a normal one This book however highlights the often disregarded role of non DNA cellular elements in carcinogenesis It also investigates the loss of contact inhibition of cancer cells the cellular mechanism of malignization in the case of hemolytic anemia and the high oncogenic risk of low and medium doses of carcinogens as well as the common trigger mechanism of action of diametrically different carcinogens on target cells
