history stretching back to Iberian Caribbean Spanish American and even African roots brought to the United States by adventurers merchants military engineers planters and the enslaved Tabby has been preserved most abundantly in the Beaufort area and its outlying islands and along the Sea Islands all the way to Florida as well with Fort Frederick in 1734 having the earliest example of a diverse group of structures which included town houses seawalls planters homes barns agricultural buildings and slave quarters Tabby's insulating properties are excellent protection from long hot humid and sometimes deadly summers and on the islands particularly wealthy plantation owners built grand houses for themselves and improved dwellings for enslaved workers that after two hundred plus years still stand today An extraordinarily hardy material tabby has a history akin to some of the world's oldest building techniques and is referred to as rammed earth as well as tapia in Spanish pis de terre in French and hangtu in Chinese The form that tabby construction took along the Sea Islands however was born of necessity Here stone and brick were rare and expensive but the oyster shells that were used as the source for the tabby's lime base were plentiful Today these bits of shell often visible in the walls and forms constructed long ago give tabby its unique and iconic appearance Colin Brooker architect and expert on historic restoration has not only made an exhaustive foray into local tabby architecture and heritage he also has made a multinational tour as well in search of tabby origins evolution and diffusion from the Bahamas to Morocco to Andalusia which can be traced back as far as the tenth century Brooker has spent more than thirty years investigating the origins of tabby its chemistry its engineering and its limitations The Shell Builders lays out a sweeping in depth and fascinating investigative journey at once archaeological sociological and historical into the ways prior inhabitants used and shaped their environment in order to house and protect themselves leaving behind an architectural legacy that is both mysterious and beautiful Lawrence S Rowland a distinguished professor emeritus of history at the University of South Carolina Beaufort and past president of the South Carolina Historical Society provides a foreword

Tolomato Cemetery is the oldest remaining cemetery in St Augustine Florida It was founded in an era when the grim and grey church graveyard was the cultural norm in the North American colonies In an act of compassion for a group of unfortunate Catholic refugees in British East Florida the cemetery was established on the site of an abandoned Franciscan mission where it remained active through the end of the 19th century After a century of neglect it now faces complex material conservation issues and a lack of public involvement in its care and interpretation It sits silently locked within its gates unable to share its own stories of St Augustine s rich history This book explores how the site evolved over the centuries into its present state and what can be done to ensure its survival and return to a place of prominence among the cultural resources of one of America s oldest cities In Reverence was written as a graduate thesis at Cornell University in 2009 and has been revised for publication **Florida** Michael Gannon, 2003-07-01
