**National Criminal Justice Thesaurus**, 1998 **How Judges Think** Richard A. Posner, 2010-05-01 A distinguished and experienced appellate court judge Richard A Posner offers in this new book a unique and to orthodox legal thinkers a startling perspective on how judges and justices decide cases When conventional legal materials enable judges to ascertain the true facts of a case and apply clear pre existing legal rules to them Posner argues they do so straightforwardly that is the domain of legalist reasoning However in non routine cases the conventional materials run out and judges are on their own navigating uncharted seas with equipment consisting of experience emotions and often unconscious beliefs In doing so they take on a legislative role though one that is confined by internal and external constraints such as professional

ethics opinions of respected colleagues and limitations imposed by other branches of government on freewheeling judicial discretion Occasional legislators judges are motivated by political considerations in a broad and sometimes a narrow sense of that term In that open area most American judges are legal pragmatists Legal pragmatism is forward looking and policy based It focuses on the consequences of a decision in both the short and the long term rather than on its antecedent logic Legal pragmatism so understood is really just a form of ordinary practical reasoning rather than some special kind of legal reasoning Supreme Court justices are uniquely free from the constraints on ordinary judges and uniquely tempted to engage in legislative forms of adjudication More than any other court the Supreme Court is best understood as a political court

Office for Subject Cataloging Policy, 2013 The Great Chief Justice Charles F. Hobson, 1996 John Marshall remains one of the towering figures in the landscape of American law From the Revolution to the age of Jackson he played a critical role in defining the province of the judiciary and the constitutional limits of legislative action In this masterly study Charles Hobson clarifies the coherence and thrust of Marshall's jurisprudence while keeping in sight the man as well as the jurist Hobson argues that contrary to his critics Marshall was no ideologue intent upon appropriating the lawmaking powers of Congress Rather he was deeply committed to a principled jurisprudence that was based on a steadfast devotion to a science of law richly steeped in the common law tradition As Hobson shows such jurisprudence governed every aspect of Marshall's legal philosophy and court opinions including his understanding of judicial review The chief justice Hobson contends did not invent judicial review as many have claimed but consolidated its practice by adapting common law methods to the needs of a new nation In practice his use of judicial review was restrained employed almost exclusively against acts of the state legislatures Ultimately he wielded judicial review to prevent the states from undermining the power of a national government still struggling to establish sovereignty at home and respect abroad BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *F-O* Library of Congress. Bedi, 2007-01-18 The

jurisprudence of the International Court of Justice generally demonstrates that no rule of international law can be interpreted and applied without regard to its innate values and the basic principles of human rights Through its case law the ICJ has made immense contributions to the development of human rights law and in so doing continues to provide solutions to mounting international problems such as terrorism and unilateral use of force Part I of the book argues that the legislative spirit of contemporary international law lies in the doctrine of human rights and that the spirit of human rights doctrine lies in the principle of human dignity Furthermore it argues that the processes of international legislation and international adjudication are inseparable and that there is no norm of international law which does not intertwine the fundamental principle of human dignity with human rights doctrine Hence human rights law is more a school of law than merely a normative branch of international law and the ICJ's willingness to engage in the development of human rights law depends upon which judicial ideology its judges subscribe to In order to evaluate how this human rights spirit is manifested or occasionally not manifested through the vast jurisprudence of the ICJ Parts II and III critically examine the Court's principal contentious and advisory cases in which it has treated human rights questions The legal reasoning of the Court and the opinions appended to its decisions by its individual judges are analysed in light of the principle of human dignity and the doctrine of human rights
