Richard Lawrence, Craig Hemmens

Juvenile Justice In The Making:

Juvenile Justice in the Making David Spinoza Tanenhaus, 2004 Faith in childhood and its corollary that separate courts are required for children because they are developmentally different from adults appears to be vanishing in the USA This book examines one of America's most influential legal inventions and its future

The Contexts of Juvenile Justice Decision Making Michael J. Leiber, 2012-02-01 An in depth examination of the contextual nature of decision making and the causes of disproportionate minority confinement in four relatively homogenous juvenile courts in Iowa this book explores the subjective social psychological processes of juvenile court officers and the factors that influence those processes Iowa although a state with a predominantly white population has one of the highest minority incarceration rates for juveniles Michael J Leiber focuses on the relationships between adherence to correctional orientations such as retribution and rehabilitation and decision makers views concerning race crime family and respect for authority with judgments and differential outcomes for youth Quantitative and qualitative methodologies are used to determine the extent to which correctional ideologies and decision makers stereotyping of minorities are fueled by a wide range of contingencies the impact of case processing and outcomes of whites African Americans and Native Americans and how it varies by jurisdiction

States of Delinquency Miroslava Chavez-Garcia, 2012-02-21 Miroslava Chavez Garcia digs into long forgotten files and humanizes the forgotten victims of injustice States of Delinquency exposes the hidden racial dynamics of California's juvenile justice system and makes us re think the history of the child saving movement Tony Platt author of The Child Savers The Invention of Delinquency Impressively researched and passionately argued States of Delinquency shows how racial prejudice and bogus social science reshaped early twentieth century juvenile corrections in California Chavez Garcia recreates both the everyday world of reform schools and the lives of delinquent youth especially minorities who were unfortunate enough to be confined there or worse reassigned to special hospitals for sterilization This book is an innovative disquieting and vividly detailed contribution to historical scholarship on the theory and practice of American juvenile justice Steven Schlossman author of Transforming Juvenile Justice A fascinating and compelling study that reconstructs the forgotten lives of California's marginalized and criminalized youth States of Delinquency illuminates the unsettling history of the juvenile justice system and demonstrates its relevance to the disproportionate incarceration of racial and ethnic minorities today Alexandra Minna Stern author of Eugenic Nation Faults and Frontiers of Better Breeding in Modern America

Juvenile Justice Richard Lawrence, Craig Hemmens, 2008-03-13 Juvenile Justice combines a text with carefully selected accompanying readings The readings will have a policy orientation giving them a real world applied character The book contains extensive coverage of the juvenile justice system focusing on law enforcement court and correctional responses to juvenile offending with an overview of the causes of delinquency This unique approach of combining a text and a reader will provide students with an understanding of the juvenile justice system and an introduction to some of the best original research articles by experts in

the field Screwing the System and Making it Work Mark D. Jacobs, 1990-08-03 Who is responsible for juvenile delinquency Mark D Jacobs uses ethnographic statistical and literary methods to uncover the many levels of disorganization in American juvenile justice By analyzing the continuities between normal casework and exceptional cases he reveals that probation officers must commonly contrive informal measures to circumvent a system which routinely obstructs the delivery of services to their clients Jacobs defines the concept of the no fault society to describe the larger context of societal disorder and interpersonal manipulation that the juvenile justice system at once reflects and exacerbates **Juvenile Justice** Preston Elrod, R. Scott Ryder, 2013-07 The juvenile justice system is a multifaceted entity that continually changes under the influence of decisions policies and laws The all new Fourth Edition of Juvenile Justice A Social Historical and Legal Perspective offers readers a clear and comprehensive look at exactly what it is and how it works Reader friendly and up to date this text unravels the complexities of the juvenile justice system by exploring the history theory and components of the juvenile justice process and how they relate **A Return to Justice** Ashley Nellis, 2015-12-14 Juveniles who commit crimes often find themselves in court systems that do not account for their young age but it wasn't always this way The original aim of a separate juvenile justice system was to treat young offenders as the children they were considering their unique child status and amenability for reform Now after years punishing young offenders as if they were adults slowly the justice system is making changes that would allow the original vision for juvenile justice to finally materialize In its original design the founders focused on treating youth offenders separately from adults and with a different approach The hallmarks of this approach appreciated the fact that youth cannot fully understand the consequences of their actions and are therefore worthy of reduced culpability The original design for youth justice prioritized brief and confidential contact with the juvenile justice system so as to avoid the stigma that would otherwise mar a youth's chances for success upon release Rehabilitation was seen as the priority and efforts to redirect wayward youth were to be implemented when possible and appropriate The original tenets of the juvenile justice system were slowly dismantled and replaced with a system more like the adult criminal justice system one which takes no account of age In recent years the tide has turned again The number of incarcerated youth has been cut in half nationally In addition juvenile justice practices are increasingly guided by scholarship in adolescent development that confirms important differences between youth and adults And states and localities are choosing to invest in evidence based approaches to juvenile crime prevention and intervention rather than in facilities to lock up errant youth This book assesses the strategies and policies that have produced these important shifts in direction Important contributing factors include the declining incidence of youth committed crime advances in adolescent brain science nationwide budgetary concerns focused advocacy with policymakers and practitioners and successful public education campaigns that address extreme sanctions for youth such as solitary confinement and life sentences without the possibility of parole Yet more needs to be done The U S Supreme Court has recently voiced its unfaltering conclusion that children are different from adults in a

series of landmark cases The question now is how to take advantage of the opportunity for juvenile justice reform of the kind that would reorient the juvenile justice system to its original intent both in policy and practice and would return to a system that treats children as children Using case examples throughout Nellis offers a compelling history and shows how we might continue on the road to reform *Juvenile Justice: A Social, Historical and Legal Perspective* Preston Elrod, R. Scott Ryder, 2009-12-09 The juvenile justice system is a multifaceted entity that continually changes under the influence of decisions policies and laws The all new Third Edition of *Juvenile Justice A Social Historical and Legal Perspective* offers readers a clear and comprehensive look at exactly what it is and how it works Reader friendly and up to date this text unravels the complexities of the juvenile justice system by exploring the history theory and components of the juvenile justice process and how they relate *Juvenile Justice Administration* Peter C. Kratcoski, 2012-05-10 An effective administrator must not only have the educational background to understand the foundational basis for the system but must also be guided by the vision and mission of the organization *Juvenile Justice Administration* illustrates through examples and interviews with juvenile justice administrators and other personnel how these organizations *Decision Making and Juvenile Justice* Paul E. Tracy, 2002-03-30 Based on a comprehensive study of three counties in Texas this work examines the idea of differential handling of minority youth offenders Traditional wisdom indicates that minorities are over represented in the juvenile justice system due to racism and discrimination within the system itself The author refutes this logic by challenging current studies and examining the results of the Texas study The findings suggest that minorities are represented in the juvenile justice system in greater numbers than their majority offender counterparts due to their greater involvement in criminal activity not to any differential treatment they may receive at crucial decision points within the system Allegations of racial bias against the juvenile justice system are often supported by the federal government which suggests that minorities continue to be targeted more frequently for arrest prosecution conviction and imprisonment merely because they are persons of color Drawing on new research the author addresses racial disparity in the juvenile justice system and contends that previous research suffers methodological and statistical analysis problems resulting in the mischaracterization of the issue of racial bias The present study argues that most minority juveniles receive different case outcomes because of the severity of their current offense and both the length and severity of their prior delinquency careers Tracy's research ultimately indicates that rather than being discriminatory the juvenile system is instead reacting to a particular type of delinquent using legally permissible guidelines *Federal Register* , 1996-05-09 *The Oxford Handbook of Juvenile Crime and Juvenile Justice* Barry C. Feld, Donna M. Bishop, 2012-01-12 State of the art critical reviews of recent scholarship on the causes of juvenile delinquency juvenile justice system responses and public policies to prevent and reduce youth crime are brought together in a single volume authored by leading scholars and researchers in neuropsychology developmental and social psychology sociology history criminology criminal justice and law ***Juvenile Justice: A Social, Historical and Legal Perspective*** ,

Reforming Juvenile Justice National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Assessing Juvenile Justice Reform, 2013-05-22 Adolescence is a distinct yet transient period of development between childhood and adulthood characterized by increased experimentation and risk taking a tendency to discount long term consequences and heightened sensitivity to peers and other social influences A key function of adolescence is developing an integrated sense of self including individualization separation from parents and personal identity Experimentation and novelty seeking behavior such as alcohol and drug use unsafe sex and reckless driving are thought to serve a number of adaptive functions despite their risks Research indicates that for most

youth the period of risky experimentation does not extend beyond adolescence ceasing as identity becomes settled with maturity Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems This imbalance model implies dual systems one involved in cognitive and behavioral control and one involved in socio emotional processes Accordingly adolescents lack mature capacity for self regulations because the brain system that influences pleasure seeking and emotional reactivity develops more rapidly than the brain system that supports self control This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century It was in this context that the Office of Juvenile Justice and Delinquency Prevention OJJDP asked the National Research Council to convene a committee to conduct a study of juvenile justice reform The goal of Reforming Juvenile Justice A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform to assess the new generation of reform activities occurring in the United States and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts
