Arterial Hypertension J. Rosenthal, 2012-12-06 It has been a little more than half a century since serious organized research on hyper tension began Public and even physician interest in the subject remained minimal until the early forties and even then there were not more than a dozen fulltime investigators worldwide The first organization devoted to communicating regularly the results of hypertension research was created in Cleveland in 1945 it became the Council for High Blood Pressure Research of the American Heart Association in 1949 The early history of hypertension is not a story of progressive achievement Richard Bright is given great credit followed by Mahomed Allbutt Riva Rocci Bergman and Janeway but it was not until Volhard Fahr and Allen that some semblance of order emerged They were followed by a younger much more vigorous group of investigators who in fact initiated modern research in hypertension Two more generations have followed In the course of some fifty years we have seen emerge a magnificent body of evidence that has prescribed good treatment and contributed a considerable understanding of the many complex mechanisms involved in the hypertension Treatment is now actively promoted by public health agencies including the World Health Organization This is an other case of treatment preceding full understanding of the nature of the disease

Blood Pressure Monitoring in Cardiovascular Medicine and Therapeutics William B. White, 2007-11-16 In this newly updated second edition of Blood Pressure Monitoring in Cardiovascular Medicine and Therapeutics William B White MD and a panel of highly distinguished clinicians give a critical review of every aspect of the evaluation of high blood pressure This includes home and ambulatory blood pressure

monitoring the relationship between whole day blood pressure and the cardiovascular disease process and the effects of antihypertensive therapies on these blood pressure parameters World class contributors describe the significant advances in our understanding of the circadian pathophysiology of cardiovascular disorders and demonstrate that ambulatory blood pressure values are independent predictors of cardiovascular morbidity and mortality This book provides a comprehensive up to date resource of this dynamic field in hypertension and vascular disease *Основы кардиологии. Antihypertensive Therapeutics Detlev Ganten, Patrick J. Mulrow, 2012-12-06 The previous volume on Antihypertensive Agents in the Handbook of Experimental Pharmacology published in 1977 was edited by the late Franz Gross from the Department of Pharmacology in Heidelberg who was one of the grand old men in hypertension research Now more than 10 years later it is necessary to update this volume From the early days of antihypertensive drug treatment starting about 30 years ago with drugs such as reserpine and guanethidine the pharmacology of cardiovascular therapy has evolved into a highly sophisticated and effective therapeutic regimen The major breakthroughs in the 1960s were the introduction of diuretics and beta blockers Then in the 1980s came the calcium antagonists and converting enzyme inhibitors It can be anticipated that the next decade will see a further expansion and sophistication of blood pressure lowering drugs This book provides a state of the art discussion of chemical experimental and clinical pharmacological data as well as of practical experience with drugs which are presently being used or which are going to be introduced on the market in the near future The purpose of this volume is to provide a complete discussion of antihypertensive agents Each major class of antihypertensive drugs is treated exhaustively in a separate chapter fully referenced with chemical formulae and richly

illustrated with figures and tables International authorities were asked to contribute in their respective fields of expertise
