Routledge Revivals: Medieval Italy (2004). Christopher Kleinhenz, 2017      **The New Cambridge Medieval History: Volume 6, C.1300-c.1415** Rosamond McKitterick, 1995 The sixth volume of The New Cambridge Medieval History covers the fourteenth century a period dominated by plague other natural disasters and war which brought to an end three centuries of economic growth and cultural expansion in Christian Europe but one which also saw important developments in government religious and intellectual life and new cultural and artistic patterns Part I sets the scene by discussion of general themes in the theory and practice of government religion social and economic history and culture Part II deals with the individual histories of the states of western Europe Part III with that of the Church at the time of the Avignon papacy and the Great Schism and Part IV with eastern and northern Europe Byzantium and the early Ottomans giving particular attention to the social and economic relations with westerners and those of other civilisations in the Mediterranean      **Florentine Tuscany** William J. Connell, Andrea Zorzi, 2000 Florence has often been studied in the past for its distinctive urban culture and society while insufficient attention has been paid to the important Tuscan territorial state that was created by Florence in the fourteenth and fifteenth centuries Comprising a handful of formerly independent city states and numerous smaller communities in the plains and mountains the Florentine empire in Tuscany supplied the markets and fiscal coffers of the Renaissance republic while providing lessons in statecraft that nourished the political thought of Machiavelli and Guicciardini This volume comprises seventeen original essays representing the new directions being taken by historians of the Florentine Renaissance It offers new and exemplary approaches towards state building political vocabulary political economy civic humanism local history and social patronage in what is one of the most interesting and well documented of the states of late medieval and Renaissance Europe      Florentine Villas in the Fifteenth Century Amanda Lillie, 2005-04-18 In this book which was originally published in 2005 Amanda Lillie challenges the urban bias in Renaissance art and architectural history by investigating the architecture and patronage strategies particularly those of the Strozzi and the Sassetti clans in the Florentine countryside during the fifteenth century Based entirely on archival material that remained unpublished at the time of publication her book examines a number of villas from this period and reconstructs the value systems that emerge from these sources which defy the traditional idealized interpretation of the renaissance villa Here the house is studied in relation to the families who lived in them and to the land that surrounded them The villa emerges as a functional utilitarian farming unit upon whose success families depended and where dynastic and patrimonial values could be nurtured      Medieval Italy Christopher Kleinhenz, 2004-08-02 This Encyclopedia gathers together the most recent scholarship on Medieval Italy while offering a sweeping view of all aspects of life in Italy during the Middle Ages This two volume illustrated A Z reference is a cross disciplinary resource for information on literature history the arts science philosophy and religion in Italy between A D 450 and 1375 For more information including the introduction a full list of

**American Rhetoric** Thomas W. Benson, 1989 Nine fresh views of the interconnections of historical critical and theoretical scholarship in the field of American rhetoric Stephen T Olsen addresses the question of how to determine the disputed authorship of Patrick Henry's Liberty or Death speech of March 23 1775 Stephen E Lucas analyzes the Declaration of Independence as a rhetorical action designed for its own time and drawing on a long tradition of English rhetoric Carroll C Arnold examines the communicative qualities of constitutional discourse as revealed in a series of constitutional debates in Pennsylvania between 1776 and 1790 James R Andrews traces the early days of political pamphleteering in the new American nation Martin J Medhurst discusses the generic and political exigencies that shaped the official prayer at Lyndon B Johnson's inauguration In Rhetoric as a Way of Being Benson acknowledges the importance of everyday and transient rhetoric as an enactment of being and becoming Gerard A Hauser traces the Carter Administration's attempt to manage public opinion during the Iranian hostage crisis Richard B Gregg ends the book by looking for conceptual metaphorical patterns that may be emerging in political rhetoric in the 1980s

**The Renaissance** John Jeffries Martin, 2003 The Renaissance paradigm in crisis Politics language and power Individualism identity and gender Art science and humanism Religion tradition and innovation Dictionary of World Biography Frank Northen Magill, Alison Aves, 1998 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who's who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual's life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history All entries conclude with a fully annotated bibliography

**Humanism and Empire** Alexander Lee, 2018-02-02 For more than a century scholars have believed that Italian humanism was predominantly civic in outlook Often serving in communal government fourteenth century humanists like Albertino Mussato and Coluccio Salutati are said to have derived from their reading of the Latin classics a rhetoric of republican liberty that was opposed to the tyranny of neighbouring signori and of the German emperors In this ground breaking study Alexander Lee challenges this long held belief From the death of Frederick II in 1250 to the failure of Rupert of the Palatinate's ill fated expedition in 1402 Lee argues the humanists nurtured a consistent and powerful affection for the Holy Roman Empire Though this was articulated in a variety of different ways it was nevertheless driven more by political conviction than by cultural concerns Surrounded by endless conflict both within and between city states the humanists eagerly embraced the Empire as the surest guarantee of peace and liberty and lost no opportunity to invoke its protection Indeed as Lee shows the most ardent appeals to imperial authority were made not by signorial humanists but by humanists in the service of communal regimes The first comprehensive synoptic study of humanistic ideas of Empire in the

period c 1250 1402 this volume offers a radically new interpretation of fourteenth century political thought and raises wide ranging questions about the foundations of modern constitutional ideas As such it is essential reading not just for students of Renaissance Italy and the history of political thought but for all those interested in understanding the origins of liberty

**The Cult of Remembrance and the Black Death** Samuel Kline Cohn, 1997-06-15 In his award winning study *Death and Property in Siena* historian Samuel K Cohn Jr used close analysis of last wills to chart transformations in mentalities over a six hundred year history Now in *The Cult of Remembrance and the Black Death* Cohn applies the same methodology to fashion a comparative history of six Italian city states Arezzo Florence Perugia Assisi Pisa and Siena showing the rise of a new Renaissance cult of remembrance In 1363 the Black Death devastated central Italy for the second time causing a detectable shift in notions of afterlife and patterns of charitable giving Throughout Tuscany and Umbria patricians and peasants alike abandoned the practice of dividing their bequests into small sums combining them instead into last gifts to enhance their fame and glory But this new cult of remembrance Cohn argues does not support Burckhardt's thesis of Renaissance individualism Instead the new piety grew in tandem with reverence for ancestors and a strong sense of family identity founded on the importance of male blood lines But rather than retreat into the religious pessimism of earlier times survivors of the plague would develop into a new generation of art patrons albeit one with a taste for distinctively cruder and more regimented forms of religious art From the supposed center of Renaissance culture Florence to the citadel of Franciscan devotion Assisi the widespread change of sentiment created a new demand for monumental burials testamentary commissions for art and other efforts to exert control over the living from beyond the grave *Episcopal Power and Florentine Society, 1000-1320* George Williamson Dameron, 1991 This first detailed study of the bishops of Florence tells the story of a dynamic Italian lordship during the most prosperous period of the Middle Ages Drawing upon a rich base of primary sources Dameron demonstrates that the nature of the Florentine episcopal lordship results from the tension between seigneurial pressure and peasant resistance Implicit throughout is the assumption that episcopal lordship relied upon both the bishop's jurisdictional power and his spiritual or sacramental power The story of the Florentine bishops illuminates important moments in Italian history The development of the Florentine elite for example is closely tied to the political and economic privileges they derived from their access to ecclesiastical property A study of the bishopric's vast holdings in the major river valleys surrounding Florence also provides valuable insight into the nature of the interrelation between city and countryside Comparisons with lordships in other Italian cities contrast with and define the nature of medieval lordship This economic social and political history addresses issues of concern to a wide audience of historians the emergence of the commune the social development of the nobility the nature of economic change before the Black Death and the transition from feudalism to capitalism **The Hundred Years War (Part III)**, 2013-07-25 In this work the third volume of essays dealing with many understudied aspects of the Hundred Years War American British and European scholars deal with the

varied sources that reveal the lives of soldiers in the conflict as well as the development of strategy and generalship in the many theaters of the war. The authors also focus on real heroes and villains of the conflict as well as the war's impact on regions as scattered as Wales, the Low Countries, Italy, Scotland, and Spain. Contributors are Adrian Bell, Anne Curry, Adam Chapman, Andy King, David Simpkin, Christopher Candy, Donald Kagay, William Caferro, David Hoonstra, Elena Odio, Daniel Franke, David Green, Philip Morgan, Sean McGlynn, Wendy Turner, Andrew Villalon, Aleksandra Pfau, Kelly DeVries, and Sergio Boffa. Winner of the 2014 Verbruggen Prize of De Re Militari, the Society for the Study of Medieval Military History given annually for the best book on medieval military history. *Spain, Portugal and the Atlantic Frontier of Medieval Europe* Jose-Juan Lopez-Portillo, 2016-12-05. As seen from the perspective of 1492, the medieval expansion of Latin Europe was nowhere as dramatic or enduring as in the Iberian Peninsula and the Atlantic. Its Christian kingdoms continued their advance against Al Andalus up to 1492, whereas territorial expansion elsewhere against the Muslim world had either ceased or subsided by the late 13th century. Castile and Portugal also transformed the Atlantic Ocean from the inaccessible dead end of Eurasia into the most promising avenue for European expansion for the first time in history. The articles collected in this volume explore the causes and the nature of this expansion from a variety of historical traditions. They investigate the extent to which the transference of Mediterranean traditions aided this process, the characteristics of Iberian conflict that eventually led to the success of its Christian kingdoms, and the motives for launching and techniques for running the first European overseas empires in the unfolding Atlantic frontier. In the process, they illuminate the new identities and cultural interactions that this expansion produced in its wake, while the new introduction sets them in the broader context. Chaucer's Italian Tradition Warren Ginsberg, 2002. Explores provocative questions about the dynamics of cross-cultural translation and the formation of tradition. *The Construction of Minorities* André Burguière, Raymond Grew, 2001. A cross-cultural volume that investigates the question of how social minorities are formed. The Merchant of Prato's Wife Ann Crabb, 2015-02-09. The first full study of the life of Margherita Datini illuminates the role and social standing of wives in early modern Italian society. John Hawkwood William Caferro, 2006-04-24. Winner 2008 Otto Gröndler Book Prize. The Medieval Institute. Winner 2008 Otto Gröndler Book Prize. The Medieval Institute. Notorious for his cleverness and daring, John Hawkwood was the most feared mercenary in early Renaissance Italy. Born in England, Hawkwood began his career in France during the Hundred Years War and crossed into Italy with the famed White Company in 1361. From that time until his death in 1394, Hawkwood fought throughout the peninsula as a captain of armies in times of war and as a commander of marauding bands during times of peace. He achieved international fame, and city-states constantly tried to outbid each other for his services, for which he received money, land, and in the case of Florence, citizenship, a most unusual honor for an Englishman. When Hawkwood died, the Florentines buried him with great ceremony in their cathedral, an honor denied their greatest poet, Dante. William Caferro's ambitious account of

Hawkwood is both a biography and a study of warfare and statecraft Caferro has mined more than twenty archives in Britain and Italy creating an authoritative portrait of Hawkwood as an extraordinary military leader if not always an admirable human being

**The Atlantic Frontier of the Thirteen American Colonies and States** Jacob M. Price, 2024-10-28 The external economy of British North America has attracted considerable scholarly attention in the last two generations and the papers reprinted here in this second collection from Jacob Price make important contributions to quantification conceptualisation and debate Studies presenting and analysing new statistical material from the English and Scottish customs accounts are supplemented by a general survey of the transatlantic economy in the 18th century which is required reading for all students of the subject Price's treatment is diversified into financial arrangements and the role of credit in the slave trade and plantation economies In a provocative chapter Who cared about the colonies concern in Britain for the 13 colonies between 1714 and 1775 is explored in terms of the ability of the colonies to involve the interests and command the attention and concern of people in Britain from the politically eminent to those in trade and to the nation at large

*Sorrow and Consolation in Italian Humanism* George W. McClure, 2014-07-14 George McClure offers here a far reaching analysis of the role of consolation in Italian Renaissance culture showing how the humanists interest in despair and their effort to open up this realm in both social and personal terms signaled a shift toward a heightened secularization in European thought Analyzing works by fourteenth and fifteenth century writers from Petrarch to Marsilio Ficino McClure examines the treatment of such problems as bereavement fear of death illness despair and misfortune These writers who evinced a belief in the legitimacy of secular sadness tried to forge a wisdom that in their view dealt more realistically with the art of living and dying than did the disputations of scholastic philosophy and theology Arguing that consolatory concerns helped spur the revival of classical schools of psychological thought McClure reveals that the humanists sought comfort from once neglected troves of Stoic Peripatetic Epicurean Platonic and Christian thought He contends that the humanists pursuit of solace and their duty as consolers provided not only a forum but perhaps also an incentive for the articulation of prominent Renaissance themes concerning immortality the dignity of man and the sanctity of worldly endeavor Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
