**The Anthropology of Justice** Lawrence Rosen, 1989-06-15 Law has often been seen as a relatively autonomous domain one in which a professional elite sharply control the impact of broader social relations and cultural concepts By contrast this study asserts that the analysis of legal systems like the analysis of social systems generally requires an understanding of the concepts and relationships encountered in everyday social life Using as its substantive base the Islamic law courts of Morocco the study explores the cultural basis of judicial discretion From the proposition that in Arabic culture relationships are subject to considerable negotiation the idea is developed that the shaping of facts in a court of law the use of local experts and the organization of the judicial structure all contribute to the reliance on local concepts and personnel to inform the range of judicial discretion By drawing comparisons with the exercise of judicial discretion in America the study demonstrates that cultural concepts deeply inform the evaluation of issues and the shapes of a judge's decision The Anthropology of Justice is not only the first full scale study of the actual operations of the actual operations of a modern Islamic law court anywhere in the Arab world but a demonstration of the theoretical basis on which a cultural analysis of the law may be founded

Ghazanfar, 2006-03-30 Review Islamic Civilization History Contributions and Influence A Compendium of Literature is a window to literature pertaining to Islamic history and Islam's contributions to knowledge and its influence in medieval Europe The book is unique in that it presents more than mere annotations it is a collection of literature briefs detailed and focused descriptions of each of the more than six hundred books and articles covered In the post 9 11 environment there has been a surge of interest regarding all things Islamic While much of the new literature is refreshingly positive some works demonstrate a revival of centuries old misconceptions about the Islamic world Islamic Civilization examines that dichotomy through literature that the author has accumulated over the past twenty years in connection with other research endeavors concerning early Islamic social thought thus most references have a social science humanities orientation Students research scholars and professionals will find this bibliography full of useful resources and a stimulus for further reading

**Modelling Interest-free Economy** Muhammad Anwar, 1987 General equilibrium macroeconomic models are considered essential for evaluating the impact of monetary and fiscal policies in an economy This aspect has not received until now significant attention This present work by Dr Muhammad Anwar develops general equilibrium models of income determination suitable for interest free economies It can be used to understand several implications of making a transition from the conventional financial system to an interest free financial system There are numerous Muslim countries seeking to adopt the new interest free system These countries may find it useful to utilize the insights gained from such study to facilitate the establishment of an Islamic interest free financial system The economic model offered in this book also shows clearly and scientifically that if the interest based financial system is replaced by the interest free financial system then the real rates of return for savers and investors in the economy will be preserved during inflationary and deflationary periods On the other hand financial repression results when savers are badly hurt during inflationary periods in an interest bearing economy This study demonstrates that the inflation ridden developing countries would be definitely better off if they adopt the interest free financial system in place of the prevalent interest bearing system This pioneering work is a new addition to the library of Islamic Economics and an important aid to economic planners
