Issues In Second Language Acquisition Multiple Perspectives:

Issues in Second Language Acquisition Leslie M. Beebe, 1988 **The Study of Second Language Acquisition** Rod Ellis, 1994 This thorough introduction to second language research provides a comprehensive review of the research into learner language internal and external factors in language acquisition individual differences and classroom second language learning Critical Issues in Foreign Language Instruction Ellen S. Silber, 2013-09-13 First Published in 1991 This is Volume 22 of the Source Books on Education series Politically speaking the study of foreign languages and cultures helps maintain a strong competitive position in an increasingly global marketplace It was hard to imagine in 1957 that the launching of a Soviet rocket would push the United States into its greatest investment ever in foreign language education As American policy makers attempted to play catch up with our brothers and sisters behind the iron curtain this country infused federal dollars into extensive foreign language teacher training and the creation of new foreign language educational programs As suddenly as federal support was given however so was it taken away and its withdrawal was responsible for one of the darkest periods in the history of foreign language education in America Drawing on the expertise of a number of the nation's most experienced and creative foreign language educators this volume edited by Ellen S Silber addresses some of the crucial problems we face in foreign language education today *An Introduction to Second Language Acquisition Research* Diane Larsen-Freeman, Michael H. Long, 2014-09-25 Understanding how people learn and fail to learn second and foreign languages is increasingly recognised as a critical social and psycholinguistic issue Second languages are vitally important to diverse groups of people ranging from refugees to college students facing foreign language requirements This book provides a synthesis of empirical findings on second and foreign language learning by children and adults emphasising the design and execution of appropriate research **The Handbook of Second Language Acquisition** Catherine J. Doughty, Michael H. Long, 2008-04-15 The Handbook of Second Language Acquisition presents an integrated discussion of key and sometimes controversial issues in second language acquisition research Discusses the biological and cognitive underpinnings of SLA mechanisms processes and constraints on SLA the level of ultimate attainment research methods and the status of SLA as a cognitive science Includes contributions from twenty seven of the world's leading scholars Provides an invaluable resource for all students and scholars of human cognition including those in linguistics psychology applied linguistics ESL foreign languages and cognitive science *Pedagogical Realities of Implementing Task-Based Language Teaching* Rosemary Erlam, Constanza Tolosa, 2022-02-09 This book documents how teachers working in school foreign language learning contexts and teaching beginner learners of languages other than English learn about and use tasks It first presents a pedagogically researched account of how teachers learn about design and evaluate tasks after being introduced to TBLT during an in service programme The authors then go into classrooms to explore ways in which teachers continue to use tasks as part of their regular ongoing classroom language programmes following their in service education The book

documents how the teachers use tasks to open up opportunities for language learning for students and investigates how teachers understand and position tasks and TBLT as relevant and of value to their teaching contexts The challenges that teachers face in incorporating TBLT into their practice are also explored The book suggests how the use of the task as a pedagogic tool may contribute to ongoing understanding about TBLT
