Problem-based Learning into the Future Megan Yih Chyn A. Kek,Henk Huijser,2016-10-17 In this book we respond to a higher education environment that is on the verge of profound changes by imagining an evolving and agile problem based learning ecology for learning The goal of doing so is to humanise university education by pursuing innovative approaches to student learning teaching curricula assessment and professional learning and to employ interdisciplinary methods that go far beyond institutional walls and include student development and support curriculum

sustainability research and the scholarship of teaching and learning as well as administration and leadership An agile problem based learning PBL ecology for learning deliberately blurs the boundaries between disciplines between students and teachers between students and employers between employers and teachers between academics and professional staff between formal and informal learning and between teaching and research It is based on the recognition that all of these elements are interconnected and constantly evolving rather than being discrete and static Throughout this book our central argument is that there is no single person who is responsible for educating students Rather it is everyone s responsibility teachers students employers administrators and wider social networks inside and outside of the university Agile PBL is about making connections rather than erecting barriers In summary this book is not about maintaining comfort zones but rather about becoming comfortable with discomfort The actual implementation is beyond the scope of this book and we envisage that changing perceptions towards this vision will itself be a mammoth task However we believe that the alternative of leaving things as they are would ultimately prove untenable and more distressingly would leave a generation of students afraid to think feel and act for themselves let alone being able to face the challenges of the 21st century Pursuing Equity and Success for Marginalized Educational Leaders Salazar Montoya, LeAnne C.,Bonn, Christopher,2024-02-22 In educational leadership aspiring leaders from traditionally marginalized backgrounds face a difficult range of challenges that hinder their ability to thrive This problem is not confined to a single facet but extends its reach across the educational landscape impacting diversity equity and inclusivity within academic institutions As the demand for authentic and practical guidance in navigating the leadership pipeline becomes increasingly urgent institutions struggle to prepare aspiring leaders effectively and develop a more inclusive curriculum These issues are deeply interconnected forming a complex and multifaceted problem that demands an all encompassing solution Within the pages of Pursuing Equity and Success for Marginalized Educational Leaders the remedy for this intricate challenge unfolds This groundbreaking book emerges as a product of collaboration between seasoned practitioners and esteemed researchers presenting a comprehensive guide aimed at empowering aspiring leaders hailing from marginalized backgrounds It is a valuable resource offering practical guidance and research backed strategies *Exploring the Effectiveness of Online Education in K-12 Environments* Heafner, Tina L.,Hartshorne, Richard,Petty, Teresa,2014-08-31 The integration of technology in classrooms is rapidly emerging as a way to provide more educational opportunities for students As virtual learning environments become more popular evaluating the impact of this technology on student success is vital Exploring the Effectiveness of Online Education in K 12 Environments combines empirical evidence and best practices in current K 12 distance learning and virtual schools Emphasizing current research and opportunities this book is an all inclusive reference source for administrators teachers researchers teacher educators and policymakers interested in the development and implementation of blended and electronic learning in primary and secondary education **AI in Learning: Designing the Future** Hannele Niemi,Roy D. Pea,Yu Lu,2022-11-26 AI
