Evolutionary Biology: Exobiology and Evolutionary Mechanisms Pierre Pontarotti, 2013-07-03 This book presents 19 selected contributions to the 16th Evolutionary Biology Meeting which took place in September 2012 in Marseilles The aims of these annual meetings which gather together leading evolutionary biologists and other scientists are to promote the exchange of ideas and to encourage interdisciplinary collaborations The first chapter deals with the history of a great discovery The first experiments on ascidian and sea urchin egg fertilization The remaining contributions are grouped under the following categories Evolutionary biology concepts Exobiology and the origin of life Evolutionary mechanisms Offering an up to date overview of recent findings in the field of evolutionary biology this book is an invaluable source of information for scientists teachers and advanced students **Why**

Study Biology by the Sea? Karl S. Matlin, Jane Maienschein, Rachel A. Ankeny, 2020-03-12 For almost a century and a half biologists have gone to the seashore to study life The oceans contain rich biodiversity and organisms at the intersection of sea and shore provide a plentiful sampling for research into a variety of questions at the laboratory bench How does life develop and how does it function How are organisms that look different related and what role does the environment play From the Stazione Zoologica in Naples to the Marine Biological Laboratory in Woods Hole the Amoy Station in China or the Misaki Station in Japan students and researchers at seaside research stations have long visited the ocean to investigate life at all stages of development and to convene discussions of biological discoveries Exploring the history and current reasons for study by the sea this book examines key people institutions research projects organisms selected for study and competing

theories and interpretations of discoveries and it considers different ways of understanding research such as through research repertoires A celebration of coastal marine research Why Study Biology by the Sea reveals why scientists have moved from the beach to the lab bench and back

Modern Art and the Idea of the Mediterranean Vojtech Jirat-Wasiutyński, Anne Elizabeth Dymond, Vojtech Jirat-Wasiutyński, 2007-01-01 The Mediterranean is an invented cultural space on the frontier between North and South West and East Modern Art and the Idea of the Mediterranean examines the representation of this region in the visual arts since the late eighteenth century placing the idea of the Mediterranean a cultural construct rather than a physical reality at the centre of our understanding of modern visual culture This collection of essays features an international group of scholars who examine competing visions of the Mediterranean in terms of modernity and cultural identity questioning and illuminating both European and non European representations An introductory essay frames the analysis in terms of a new spatial paradigm of the Mediterranean as a geographic historical and cultural region that emerged in the late eighteenth century as France and Britain colonized the surrounding territories Essays are grouped around three vital themes visualization of the space of the new Mediterranean varied uses of the classical paradigm and issues of identity and resistance in an age of modernity and colonialism Drawing on recent geographical historical cultural and anthropological studies contributors address the visual representation of identity in both the European and the Oriental the colonial and post colonial Mediterranean

Science, Geopolitics and Culture in the Polar Region Sverker Sörlin, 2016-04-01 Throughout the twentieth century glaciologists and geophysicists from Denmark Norway and Sweden made important scientific contributions across the Arctic and Antarctic This research was of acute security and policy interest during the Cold War as knowledge of the polar regions assumed military importance But scientists also helped make the polar regions Nordic spaces in a cultural and political sense with scientists from Norden punching far above their weight in terms of population geographical size or economic activity This volume presents an image of Norden that stretches far beyond its conventional limits covering a vast area in the North Atlantic and the Arctic Sea as well as parts of Antarctica Rich in resources scarce in population but critically important in global and regional geopolitics these spaces were contested by major powers such as Russia the United States Canada and in the Antarctic Argentina Australia South Africa and others The empirical focus on Danish Norwegian and Swedish influence in the polar regions during the twentieth century embraces a diverse array of themes from the role of science in policy and diplomacy to the tensions between nationalism and internationalism with clear relevance to the important role science plays in contemporary discussions about Nordic engagement with the polar regions

Ancestors in Evolutionary Biology Ronald A. Jenner, 2022-07-28 Exploration of the history and current practice of phylogenetics as a storytelling discipline that provides explanations for character evolution

Neptune's Laboratory Antony Adler, 2019-11-19 We have long been fascinated with the oceans and sought to pierce the profundity of their depths But the history of marine science also tells us a lot about ourselves Antony Adler explores the ways

in which scientists politicians and the public have invoked ocean environments in imagining the fate of humanity and of the planet *The American Bibliography of Slavic and East European Studies* Patt Leonard, Rebecca Routh, 2020-02-27 This bibliography first published in 1957 provides citations to North American academic literature on Europe Central Europe the Balkans the Baltic States and the former Soviet Union Organised by discipline it covers the arts humanities social sciences life sciences and technology **Stations in the Field** Raf De Bont, 2015-03-26 When we think of sites of animal research that symbolize modernity the first places that come to mind are grand research institutes in cities and near universities that house the latest in equipment and technologies not the surroundings of the bird s nest the octopus s garden in the sea or the parts of inland lakes in which freshwater plankton reside Yet during the late nineteenth and early twentieth centuries a group of zoologists began establishing novel indeed modern ways of studying nature propagating what present day ecologists describe as place based research Raf De Bont s *Stations in the Field* focuses on the early history of biological field stations and the role these played in the rise of zoological place based research Beginning in the 1870s a growing number of biological field stations were founded first in Europe and later elsewhere around the world and thousands of zoologists received their training and performed their research at these sites Through case studies De Bont examines the material and social context in which field stations arose the actual research that was produced in these places the scientific claims that were developed there and the rhetorical strategies that were deployed to convince others that these claims made sense From the life of parasitic invertebrates in northern France and freshwater plankton in Schleswig Holstein to migratory birds in East Prussia and pest insects in Belgium De Bont s book is a fascinating tour through the history of studying nature in nature

The Struggle of Parts Wilhelm Roux, 2024 Among the late nineteenth century profusion of evolutionary ideas Wilhelm Roux s theory of a struggle for existence within organisms between tissues cells and even subcellular components is one of the most important Evolutionary biologist David Haig and Richard Bondi present the first ever English translation of Roux s pioneering work Science, Geopolitics and Culture in the Polar Region Professor Sverker Sörlin, 2013-10-28 Throughout the twentieth century glaciologists and geophysicists from Denmark Norway and Sweden made important scientific contributions across the Arctic and Antarctic This research was of acute security and policy interest during the Cold War as knowledge of the polar regions assumed military importance But scientists also helped make the polar regions Nordic spaces in a cultural and political sense with scientists from Norden punching far above their weight in terms of population geographical size or economic activity This volume presents an image of Norden that stretches far beyond its conventional limits covering a vast area in the North Atlantic and the Arctic Sea as well as parts of Antarctica Rich in resources scarce in population but critically important in global and regional geopolitics these spaces were contested by major powers such as Russia the United States Canada and in the Antarctic Argentina Australia South Africa and others The empirical focus on Danish Norwegian and Swedish influence in the polar regions during the twentieth century embraces a diverse array of

themes from the role of science in policy and diplomacy to the tensions between nationalism and internationalism with clear relevance to the important role science plays in contemporary discussions about Nordic engagement with the polar regions

The Correspondence of Charles Darwin: Volume 22, 1874 Charles Darwin, 2015-03-05 This volume is part of the definitive edition of letters written by and to Charles Darwin the most celebrated naturalist of the nineteenth century Notes and appendixes put these fascinating and wide ranging letters in context making the letters accessible to both scholars and general readers Darwin depended on correspondence to collect data from all over the world and to discuss his emerging ideas with scientific colleagues many of whom he never met in person The letters are published chronologically volume 22 includes letters from 1874 the year in which Darwin completed his research on insectivorous plants and published second editions of *Descent of Man* and *Coral Reefs* The year also saw an acrimonious dispute between Darwin and St George Jackson Mivart as a result of an anonymous review the latter had written in which he criticised Darwin's son George

Oceanographic History Keith Rodney Benson, Philip F. Rehbock, 2002 From a study of knowledge of the sea among indigenous cultures in the South Seas to inquiries into the subject of sea monsters from studies of Pacific currents to descriptions of ocean going research vessels the sixty three essays presented here reflect the scientific complexity and richness of social relationships that characterize ocean ographic history Based on papers presented at the Fifth International Congress on the History of Oceanography held at the Scripps Institution of Oceanography the first ICHO meeting following the cessation of the Cold War the volume features an unusual breadth of contributions Oceanography itself involves the full spectrum of physical biological and earth sciences in their formal empirical and applied manifestations The contributors to *Oceanographic History The Pacific and Beyond* undertake the interdisciplinary task of telling the story of oceanography's past drawing on diverse methodologies Their essays explore the concepts techniques and technologies of oceanography as well as the social economic and institutional determinants of oceanographic history Although focused on the Pacific the geographic range of subjects is global and includes Micronesia East Africa and Antarctica the bathymetric range comprises inshore fisheries coral reefs and the azoic zone The seventy one contributors represent every continent of the globe except Antarctica bringing together material on the history of oceanography never before published

Zambesi Lawrence Drietas, 2010-03-31 *Zambesi* tells the story of David Livingstone's Zambesi Expedition It exposes the rivalry among some of Victorian Britain's leading establishment figures and institutions including the Foreign Office the Royal Society Royal Geographical Society British Museum Kew Gardens and the Admiralty as abolitionists scientists and entrepreneurs sought to promote and protect their differing interests Making use of letters documents and materials neglected by previous writers and researchers the author reveals how tensions arose from the very beginning between those in pursuit of knowledge for its own sake and the proponents of the civilizing missions who saw scientific knowledge as the utilitarian means to a social end The result is an exciting story involving one of England's most feted Victorian heroes that offers important new insights in

the practice and politics of expeditionary science in Victorian England This is the definitive account of the expedition to date

The History of Natural History Gavin D. R. Bridson, 2008 With over 5 300 added references this revised and updated edition is an essential source of information for scientists researchers and enthusiastic amateurs The History of Natural History is one of those key works that should be kept in easy reach of anyone interested in the study of natural history in all its branches
