**Marx on Gender and the Family** Heather A. Brown, 2012-07-25 This the first book length study devoted exclusively to Marx s perspectives on gender and the family offers a fresh look at this topic in light of twenty first century concerns Although Marx s writings sometimes exhibit sexism especially through the naturalization of certain female social functions his work often transcends these Brown studies those writings on gender as well as his 1879 1882 notebooks on precapitalist societies and gender some of them still unpublished in any language The author argues that although Marx never fully developed these ideas he gave important indications toward a theory of gender and society This study attempts to fill a significant gap in the literature on Marx and offer some general insights into the intersectionality of gender and class

**Education and the Reproduction of Capital** R. Kumar, 2012-07-25 A reflection on the specific context of neoliberal capitalism and it s impact on education The chapters establish the intersectionality of state capital and education and engage with possibilities of transcending the onslaught of capital in different geographical locations from the Northern Hemisphere to the Southern Hemisphere

**Marx 2020** Ronaldo Munck, 2016-08-15 The 2008 financial crisis revitalised the question of whether capitalism was working and how it might be overturned More recently the growth of new social movements across the globe are posing a threat to the economic and political status quo with Marxist ideas rejuvenated for the 21st century In this provocative and critically engaged introduction Ronaldo Munck applies Marx s theories to the most pressing issues of our times the environmental crisis austerity international development religion nationhood the role of women and LGBTQ communities Crucially he shows the far reaching contribution Marx can make to both contemporary debate and political

action Accessible and wide ranging Marx 2020 is essential reading for anyone interested in the state of the modern world and the ideas needed for effective change      **Social Transformation and Migration** S. Castles,D. Ozkul,M.

Cubas,2015-02-27 This book examines theories and specific experiences of international migration and social transformation with special reference to the effects of neo liberal globalization on four societies with vastly different historical and cultural characteristics South Korea Australia Turkey and Mexico      **Horizontal Rights** Gautam Bhatia,2023-08-24 This book provides a new conceptual model for considering constitutional rights from a comparative perspective A prestigious club bars women from standing for executive positions A homeowner refuses to rent their house to a person on grounds of their race Each of these real life cases involves the exercise of private power which deprives individuals of their rights Can these individuals invoke the Constitution in response Horizontal Rights An Institutional Approach brings a fresh perspective to these age old yet fraught issues This book argues that constitutional scholarship and doctrine across jurisdictions has proceeded from an inarticulate premise called default verticality This is based on a set of underlying philosophical assumptions which presumes that constitutional rights are presumptively applicable against the State and need special justification to be applied against private parties Departing from default verticality and its assumptions this book argues that constitutional rights should apply horizontally between private parties where the existence of an economic social or cultural institution creates a difference in power between the parties and allows one to violate the rights of the other The institutional approach aims to be both theoretically convincing as well as a providing a workable model for constitutional adjudication It applies both to classic issues such as restrictive covenants as well as cutting edge contemporary legal problems around the regulation of platform work and the distribution of property upon divorce This promises to be an exciting new contribution to the global conversation around constitutional rights and private power      **The Unfree Market and the Law** Koen Byttebier,2018-09-24 This book examines how legal systems and mechanisms give shape to the capitalist economic system In this regard it focuses on the most important of these systems such as monetary and financial law company law fiscal law contract and labour law Further the book provides a thorough analysis of the underlying ethical values of said legal systems and mechanisms It also gives an overview of several potentially devastating related effects such as poverty the increasing polarisation between rich and poor climate change and mounting debts at both the public and private level The book concludes by presenting proposals for change Given its critical analysis of legal systems and mechanisms in connection with the value choices dictated by economic ideologies the book will be of particular interest to legal and economic academics researchers and students but also to policymakers and more generally to anyone with a genuine concern for how the socio economic order will evolve      *The Transformation of Citizenship, Volume 1* Juergen Mackert,Bryan S. Turner,2017-03-16 The Transformation of Citizenship addresses the basic question of how we can make sense of citizenship in the twenty first century These volumes make a strong plea for a reorientation of the sociology of citizenship and address serious threats of an

ongoing erosion of citizenship rights Arguing from different scientific perspectives rather than offering new conceptions of citizenship as supposedly more adequate models of rights membership and belonging they deal with both the ways citizenship is transformed and the ways it operates in the face of fundamentally transformed conditions This volume Political Economy discusses manifold consequences of a decades long enforcement of neo liberalism for the rights of citizens As neo liberalism not only means a new form of economic system it has to be conceived of as an entirely new form of global regional and national governance that radically transforms economic political and social relations in society Its consequences for citizenship as a social institution are no less than dramatic Against the background of both manifest and ideological processes the book looks at if citizenship has lost the basis it has rested upon for decades or if the institution itself is in a process of being fundamentally transformed and restructured thereby changing its meaning and the significance of citizens rights This book will appeal to academics working in the field of political theory political sociology and European studies

*The History of Development* Gilbert Rist, 2002-10 With all its hopes of a more just and materially prosperous world development has fascinated societies in both North and South Looking at this collective fancy in retrospect Gilbert Rist shows the underlying similarities of its various theories and strategies and their shared inability to transform the world He argues persuasively that development has always been a kind of collective delusion which in reality has simply promoted a widening of market relations despite the good intentions of its advocates

**The Struggle over Human Rights** Courtney Hercus, 2019-01-17 The Struggle over Human Rights The Non Aligned Movement Jimmy Carter and Neoliberalism traces the origins of the relationship between neoliberalism and the modern doctrine of human rights to the 1970s It uses empirical evidence to prove that the Carter administration transformed the U S and the traditional Western liberal approach to human rights in response in part to the actions of the Non Aligned Movement The New International Economic Order NIEO a high point in Non Aligned solidarity placed pressures on the power relations of the international system and sought to advance the social and economic rights of the Third World Carter s transformation promoted civil and political rights as the only acceptable human rights and relegated economic rights to a basic needs approach undercutting welfare state principles in the U S and in the newly emergent independent states in Africa Asia and the Pacific This doctrine as the book highlights through extensive archival research sharpened the definition of international human rights to serve the maintenance of the U S led world order Carter s diplomatic use of human rights obfuscated exploitative economic structures and paved the way for an aggressive neoliberal transformation through World Bank and IMF Structural Adjustment Programs under Reagan Historical studies of human rights have ignored these connections making this book a unique contribution to the scholarship of human rights

Frankman, 2004-03-31 Myron J Frankman provides an interrelated set of initiatives whose components are consistent with the logic of both the process of globalization and the emerging properties of our time Sustainability democratization equal opportunity diversity and peace He brings together the case for global public finance a single world currency and a planet wide citizen's income all within the context of democratic federalism extending from the local to the global      **Perspecta 47** James Andrachuk, Christos C. etymology lexicology and translation Barrow brings analytical coherence to the concept of the lumpenproletariat revealing it to be an inherent component of Marx and Engels analysis of the historical origins of capitalism However a proletariat that is destined to decay into an underclass may pose insurmountable obstacles to a theory of revolutionary agency in post industrial capitalism Barrow thus updates historical discussions of the lumpenproletariat in the context of contemporary American politics and suggests that all post industrial capitalist societies now confront the choice between communism and dystopia

*Global Economic Crisis as Social Hieroglyphic* Christos Memos, 2021-04-14 This book examines the 2008 global economic crisis as a complex social phenomenon or social hieroglyphic arguing that the crisis is not fundamentally economic despite presenting itself as such Instead it is considered to be a symptom of a long standing multifaceted and endemic crisis of capitalism which has effectively become permanent leading contemporary capitalist societies into a state of social regression manifest in new forms of barbarism The author offers a qualitative understanding of the economic crisis as the perversion or inversion of the capitalistically organized social relations The genesis of the current crisis is traced back to the unresolved world crisis surrounding the Great Depression in order to map the course and different inverted forms of the continuous global crisis of capitalism and to reveal their inner connections as derivative of the same social constitution From a historical and interdisciplinary perspective the book expounds critical social theory elaborating on the intersection between the early critical theory of the Frankfurt School mainly Adorno Horkheimer and Marcuse and the social form analysis of the Open Marxism school *Global Economic Crisis as Social Hieroglyphic* critically addresses the permanent character of the 1920s 1930s crisis and the crisis theory debates the political crisis in Eastern Europe 1953 1968 the crisis of Keynesianism the crisis of subversive reason the crisis negative anthropology and transformations of the bourgeois individual the state of social regression and the destructive tendencies after the rise of neoliberalism and finally the 2008 financial crisis and its ongoing aftermath
