Government Spending and Income Distribution in Latin America Ricardo Hausmann, Roberto Rigobón, 1993

Income Distribution and High-quality Growth Vito Tanzi, Ke-young Chu, 1998 The contributors argue that there need not be a trade off between growth and equity in the long run However attempts by government to influence income distribution through large scale tax and transfer programs can have a negative impact on growth The contrast is vivid While the majority of people in the industrial world and some in the developing world enjoy unprecedented affluence a far greater number of people in the low income countries live in abject poverty Although several developing countries are achieving rapid economic growth and poverty reduction most formerly centrally planned countries are struggling to implement market oriented reforms in the midst of economic deterioration and rising poverty The paramount importance of reducing poverty worldwide is forcing economists and policymakers to look at how income distribution and economic growth interact The essays in this volume grew out of a 1995 conference sponsored by the International Monetary Fund The contributors are scholars and policymakers from academic institutions governments and international organizations The questions discussed include How does income distribution interact with economic growth in the short run and the long run To what extent can government use transfer programs to increase the incomes of the poor How can government use social programs to help the poor increase their income earning capacity Does distributional inequality create an obstacle to long term poverty reduction Alternatively is distributional inequality a necessary means of achieving economic growth Generally the contributors agree that there need not be a trade off between growth and equity in the long run However attempts by government to influence income distribution through large scale tax and transfer programs can have a negative impact on growth

empirical coverage it also addresses the current impact of economic globalization

Asawanuchit, Mr. Hamid Reza Davoodi, Mr. Erwin Tiongson, 2003-11-01 This paper provides a primer on benefit incidence analysis BIA for macroeconomists and a new data set on the benefit incidence of education and health spending covering 56 countries over 1960-2000 representing a significant improvement in quality and coverage over existing compilations The paper demonstrates the usefulness of BIA in two dimensions First the paper finds among other things that overall education and health spending are poorly targeted benefits from primary education and primary health care go disproportionately to the middle class particularly in sub-Saharan Africa HIPC countries and transition economies but targeting has improved in the 1990s Second simple measures of association show that countries with a more propoor incidence of education and health spending tend to have better education and health outcomes good governance high per capita income and wider accessibility to information The paper explores policy implications of these findings

What is Behind Latin America's Declining Income Inequality? Ms. Evridiki Tsounta, Anayochukwu Osueke, 2014-07-15

Income inequality in Latin America has declined during the last decade in contrast to the experience in many other emerging and developed regions. However, Latin America remains the most unequal region in the world. This study documents the declining trend in income inequality in Latin America and proposes various reasons behind this important development. Using a panel econometric analysis for a large group of emerging and developing countries, we find that the Kuznets curve holds. Notwithstanding the limitations in the dataset and of cross country regression analysis, more generally, our results suggest that almost two thirds of the recent decline in income inequality in Latin America is explained by policies and strong GDP growth, with policies alone explaining more than half of this total decline. Higher education spending is the most important driver, followed by stronger foreign direct investment and higher tax revenues. Results suggest that policies and to some extent positive growth dynamics could play an important role in lowering inequality further.

Income Distribution and Economic Development Jacques Lecaillon, 1984. Research into the relationship between income distribution, economic development and employment in developing countries examines factors of income inequality based on social status, regional disparity, etc. It makes a comparison of the impact of public expenditure on family budgets in developing and developed countries and examines economic implications of income redistribution, etc.

Cultural Diversity Versus Economic Solidarity Philippe Van Parijs, 2004-09-10. Du fait de l'immigration, la diversité culturelle et linguistique de nos sociétés a tendance à augmenter. Du fait d'interdépendances multiples, nous devons aussi de plus en plus fonctionner au niveau d'entités plurinationales comme l'Union européenne qui connaissent une diversité culturelle et linguistique sensiblement plus grande que chacune de leurs composantes. N'est-il pas d'autant plus difficile d'organiser durablement une solidarité générale au sein d'une population qu'elle est plus hétérogène culturellement et linguistiquement? Si c'est le cas, les politiques dites multiculturelles sont-elles de nature adoucir cette tension ou au contraire l'exacerber? C'est autour de ces questions que Philippe Van Parijs a rassemblé des chercheurs de divers horizons mondialement réputés pour deux jours de discussion intense. Ce livre reprend l'ensemble des communications et commentaires suivis de conclusions personnelles par Brian Barry, Will Kymlicka et Philippe Van Parijs.
