Governments, Citizens, and Genocide: a Comparative and Interdisciplinary Approach Alex Alvarez, 2001

Governments Citizens and Genocide A Comparative and Interdisciplinary Approach Alex Alvarez A comprehensive analysis demonstrating how whole societies come to support the practice of genocide Alex Alvarez has produced an exceptionally comprehensive and useful analysis of modern genocide It is perhaps the most important interdisciplinary account to appear since Zygmunt Bauman s classic work *Modernity and the Holocaust* Stephen Feinstein Director Center for Holocaust and Genocide Studies Alex Alvarez has written a first rate propaedeutic on the running sore of genocide The singular merit of the work is its capacity to integrate a diverse literature in a fair minded way and to take account of genocides in the post Holocaust environment ranging from Cambodia to Serbia The work reveals patterns of authoritarian continuities of repression and rule across cultures that merit serious and widespread public concern Irving Louis Horowitz Rutgers University More people have been killed in 20th century genocides than in all wars and revolutions in the same period Recent events in countries such as Rwanda and the former Yugoslavia have drawn attention to the fact that genocide is a pressing contemporary problem one that has involved the United States in varying negotiating and peace keeping roles Genocide is increasingly recognized as a threat to national and international security as well as a source of tremendous human suffering and social devastation

Governments Citizens and Genocide views the crime of genocide through the lens of social science It discusses the problem of defining genocide and then examines it from the levels of the state the organization and the individual Alex Alvarez offers both a skillful synthesis of the existing literature on genocide and important new insights developed from the study of criminal behavior He shows that governmental policies and institutions in genocidal states are designed to suppress the moral inhibitions of ordinary individuals By linking different levels of analysis and comparing a variety of cases the study provides a much more complex understanding of genocide than have prior studies Based on lessons drawn from his analysis Alvarez offers an important discussion of the ways in which genocide might be anticipated and prevented Alex Alvarez is Associate Professor in the Department of Criminal Justice at Northern Arizona University His primary research interests are minorities crime and criminal justice as well as collective and interpersonal violence He is author of articles in *Journal of Criminal Justice* *Social Science History* and *Sociological Imagination* and is currently writing a book on patterns of American murder

Genocide, Mass Atrocity, and War Crimes in Modern History James Larry Taulbee, 2017-02-06 Defining genocide as an international crime, this two volume set provides a comparative study of historical cases of genocide and mass atrocity, clearly identifying the factors that produced the attitudes and behaviors that led to them, discusses the reasons for rules in war and examines how the five principles laid out in the Geneva Conventions and other international agreements have functioned in modern warfare. Written by an expert on international politics and law, *Genocide, Mass Atrocity and War Crimes in Modern History: Blood and Conscience* is an easy to understand resource that explains why genocides and other atrocities occur, why humanity saw the need to create rules that apply during war and how culture, rules about war and the nature of war intersect. The first volume addresses the history and development of the normative regimes that define genocide and mass atrocity. Through a comparative study of historical cases that pay particular attention to the factors involved in producing the attitudes and

behaviors that led to the incidents of mass slaughter and mistreatment the author identifies the reasons that genocides and mass atrocities in the 20th century were largely ignored until the early 1990s and why even starting then responses were inconsistent The second book discusses why rules in war exist which factors may lead to the adoption of rules what defines a war crime and how the five fundamental principles laid out in the Geneva Conventions and other international agreements have actually functioned in modern warfare It also poses and answers the interesting question of why we should obey rules when our opponents do not The final chapter examines what actions could serve to identify future situations in which mass atrocities may occur and identifies the problems of timely humanitarian intervention in international affairs *Genocide Since 1945* Philip Spencer, 2012 Using autobiographical accounts from multiple sclerosis victims the author portrays the difficulties and frustrations caused by the disease **Genocidal Crimes** Alex Alvarez, 2009-12-04 Genocide has emerged as one of the leading problems of the twentieth century No corner of the world seems immune from this form of collective violence While many individuals are familiar with the term few people have a clear understanding of what genocide is and how it is carried out This book clearly discusses the concept of genocide and dispels the widely held misconceptions about how these crimes occur and the mechanisms necessary for its perpetration *Genocidal Crimes* differs from much of the writing on the subject in that it explicitly relies upon the criminological literature to explain the nature and functioning of genocide Criminology with its focus on various types of criminality and violence has much to offer in terms of explaining the origins dynamics and facilitators of this particular form of collective violence Through application of a number of criminological theories to various elements of genocide Alex Alvarez presents a comprehensive analysis of this particular crime These criminological perspectives are underpinned by a variety of psychological sociological and political science based insights in order to present a more complete discussion of the nature and functioning of genocide *Confronting Evil* James Waller, 2016-05-27 While it is true that genocide prevention is not what tends to land on the front pages of national newspapers today it is what prevents the worst headlines from ever being made Despite the post Holocaust consensus that Never Again would the world allow civilians to be victims of genocide the reality is closer to Again and Again As many as 170 million civilians across the world were victims of genocide and mass atrocity in the 20th century Now that we have entered the 21st century little light has been brought to that darkness as civilians still find themselves under brutal attack in South Sudan Burma Syria the Central African Republic Burundi Iraq and a score of other countries in the world beset by state fragility and extremist identity politics Drawing on over two decades of primary research and scholarship from a wide range of disciplinary perspectives *Confronting Evil* Engaging Our Responsibility to Prevent Genocide is grounded in the belief that preventing mass atrocity is an achievable goal but only if we have the collective will to do so This groundbreaking book from one of the foremost leaders in the field presents a fascinating continuum of research informed strategies to prevent genocide from ever taking place to prevent further atrocities once genocide is occurring and to prevent future atrocities once a society

has begun to rebuild after genocide With remarkable insight Dr James Waller challenges each of us to accept our responsibilities as global citizens in whichever role and place we find ourselves and to think critically about one of the world's most pressing human rights issues in which there are no sidelines only sides **Genocidal Conscription** Christopher Harrison,2023-07-03 Genocidal Conscription examines how some states have employed mandatory military service as a tool to capture and kill the victims of genocide by recruiting the perpetrators from other minorities and shifting blame away from the state The book highlights several unique intersections that connect military history Holocaust studies and genocide The study details an original framework that encompasses intentions and outcomes of wartime casualties Clausewitzian wastage and genocidal massacres Christopher Harrison traces and compares how two genocidal regimes at war the Ottoman Empire during World War One and Axis era Hungary in World War Two implemented certain policies of military service to capture and destroy their targets amidst the carnage of modern warfare Following this historical comparative study the author then summarizes relevant implications and ongoing concerns The conclusion includes insights into conscription by contemporary authoritarian regimes By examining these histories and crises the book suggests that several states are at risk of carrying out genocidal conscription today While difficult and unlikely due to political disincentives the implication of this analysis considers reforms which may prevent states from repeating similar policies and actions again **Dictionary of Genocide** Paul R. Bartrop,Samuel Totten,2007-11-30 Over 600 terms identify and explain the history and suffering of ethnic and religious groups experiencing genocide throughout the world The people places governments agencies documents legal terms and all other aspects of genocide are defined for new students and scholars alike **Advancing Genocide Studies** Samuel Totten,2017-07-05 Advancing Genocide Studies follows in the footsteps of the editor's earlier volume Pioneers of Genocide Studies Here a new generation of scholars presents personal essays that reveal their motivation to study genocide the passion that drives them to continue its study their primary scholarly interests and efforts and their perspective on the field as it currently stands The contributors come from diverse backgrounds numerous different nations and various disciplines Kjell Anderson The Netherlands criminology Yair Auron Israel history and education Taner Akcam Turkey and United States history and sociology Alexander Alvarez United States criminology Gerry Caplan Canada history Craig Etcheson United States international relations Maureen Hiebert Canada political science Adam Jones Canada political science Henry Theriault United States philosophy Samuel Totten United States history and political science and Ugor Ungor The Netherlands history and sociology All the contributors are well known in the field of genocide studies and all have made important contributions to this area Various they have done important theoretical work produced new findings vis a vis old cases of genocide and are pursuing new issues and topics within the field of genocide studies Many have worked on the ground and bring a sense of immediacy to various crises **Violence** Alex Alvarez,Ronnet Bachman,2008 Violence comprises a historical and contemporary discussion of the origins patterns and causes of violence in society Through the use of

contemporary and historical sources this book explore a variety of individual and collective types of violent crimes It incorporates a broad interdisciplinary approach to analyzing the patterns and correlates of violence using the most up to date research and theories and presents them in a style intended to be accessible to a wide audience of readers **Buried**
