## **Governing Medicine:**

Governing Medicine: Theory And Practice Gray, Andrew, Harrison, Stephen, 2004-07-01 Gray and Harrison have assembled an impressive array of authors to analyse the changing role of the medical profession. The contributions range from historical analyses of the relationship between government and doctors to detailed examination of the implementation of clinical governance in the NHS. All offer important insights into an issue that lies at the heart of contemporary debates in health policy. Chris Ham, University of Birmingham. This book brings together the most pertinent discussion on clinical governance by some of the most eminent practitioners and researchers in the United Kingdom. Since New Labour's institution of clinical governance through its White Paper in 1997, there has been a good deal of debate about the history, theory and practice of Clinical Governance and the governance of clinical care. Divided into three parts, the book contains sections on Medicine, autonomy and governance, Evidence, science and medicine, Realizing clinical governance. Starting with the differing definitions of the term clinical governance, the contributors discuss the relationship of medicine and governance, the challenges that evidence-based medicine makes upon clinical practice and move on to suggest possible futures for clinical governance. Written by a team of experienced academics and practitioners, this book is aimed at reflective health professionals as well as students and academics in the fields of health policy, health services management, social policy and public policy. Contributors: Marian Barnes, Andy Bilson, David Byrne, Barbara Coyle, Pieter Degeling, Tracy Finch, Rob Flynn, Andrew Gray, Steve Harrison, Rick Iedema, John Kennedy, Fergus Macbeth, Frances Mair, Sharyn Maxwell, Carl May, Michael Moran, Maggie Mort, Nancy Redfern, Chandra Vanu, Som Jane Stewart, Barbara Telfer, Stephen Watkins, Sue White.

**Circulation and Governance of Asian Medicine** Céline Coderey, Laurent Pordié, 2019-08-29 This book unpacks the organized sets of practices that govern contemporary Asian medicine, from production of medications in the lab to their circulation within circuits and networks of all kinds, and examines the plurality of actors involved in such governance. Chapters analyze the process of industrialization and commercialization of Asian medicine and the ways in which the expansion of the market in Asian medicines has contributed to the inscription of products within a large system of governance greatly dominated by global actors and the biomedical hegemony. At the same time, the contributors argue that local actors continue to play a major role in reshaping the regulations and their implementation, thus complexifying the trajectory of the remedies and their natures. Examining in particular the plurality of actors involved in governance and circulation and the converging or conflicting logics actors follow in regard to negotiations and tensions that arise, the book brings a unique multi-layered contribution to the study of governance and circulation of Asian medicines, offering further proof of their fluidity and resilience. Filling a significant gap in the market by addressing circulation and governance of Asian medicines in Asian countries including Bangladesh, Myanmar and Singapore, this book will be of interest to students and scholars in the field of Asian studies, Asian culture and society, global health, Asian medicine and medical anthropology.
