Board of Regents,      **Philosophy and the Arts** Bert Olivier, 2009 This collection of philosophical essays addresses important issues in the arts encompassing painting sculpture photography film and architecture The author s point of departure is the conviction that art in all its manifestations is an extremely significant cultural practice because it embodies a creative reflective appropriation of social political economic religious historical and ecological developments and as such merits close philosophical scrutiny reflection and interpretation The question of whether painting is still a viable artistic practice in our technocratic society is considered here and it is no accident that both this issue and that of artificial intelligence are approached from the perspective of the phenomenological thought of Maurice Merleau Ponty among other thinkers Equally important is the consideration of the relationship between art and the ethical as highlighted by significant recent artistic events as well as discussion of the transformational influence of ecological art and the culturally symptomatic meaning of kitsch Other themes discussed include play and artistic tradition formulating a suitable model for art beyond Kierkegaard s aesthetic and ethical models the meaning of 9 11 for architecture and Lyotard s claim that today only an aesthetic of the sublime instead of the beautiful can help us make sense of art      Design Innovations for Contemporary Interiors and Civic Art Crespi, Luciano, 2016-09-08 In some post industrial areas re designing structural interiors in an attractive way is becoming increasingly important to community members as it helps promote local pride and a higher quality of life Design Innovations for Contemporary Interiors and Civic Art examines novel techniques in structural designs in various cultural and social scenarios Featuring innovative application methods emergent trends and research on tools being utilized in the field this publication is a pivotal reference source for designers researchers practitioners and professionals interested in interior design urban culture and structural aesthetics      **The Sourcebook of Architectural & Interior Art 20** ,2005      **Multiform** Owen Hopkins, Erin McKellar, 2021-02-23 Guest edited by Owen Hopkins and Erin McKellar Our current moment is one of profound political and economic change Historically these moments of transition have seen a parallel period of cultural and notably architectural flux In the late 1970s this was manifested in Postmodernism Today a number of architects are looking again at this movement and redeploying a range of its tactics and approaches using contemporary methods and techniques These include different modes of collage formal reference and

quotation stylistic eclecticism symbolism in form material and ornament and the bold expressive use of colour both natural and synthetic While the design that results from these multiform tactics and approaches has been seen as a kind of neo Postmodernism this issue argues that this is a simplistic and superficial reading Instead it posits this phenomenon as the architectural attempt both conscious and unconscious to reflect grapple with and make sense of the current political and economic transition and the backdrop of the climate emergency Rather than responding to this situation by attempting to marshal architecture around a single unifying narrative this issue makes the case for the transformative possibilities offered by an approach that is ad hoc eclectic and pluralist Contributors Mat Barnes Jennifer Bonner Graham Burn James Crawford and Alexander Turner Mario Carpo David Knight and Cristina Monteiro David Kohn Stephen Parnell Lera Samovich Geoff Shearcroft Dirk Somers Catrina Stewart and Hugh McEwen L a Catherine Szacka and Amin Taha Featured architects AOC Architecture Bovenbouw Architectuur CAN Groupwork David Kohn Architects DK CM Fala Atelier MALL Studio MUTT Office S M Walala Studio Yinka Ilori Studio

*The Constructed Other: Japanese Architecture in the Western Mind* Kevin Nute, 2021-09-30 The Constructed Other argues that the assumed otherness of Japanese architecture has made it both a testbed for Western architectural theories and a source of inspiration for Western designers The book traces three recurring themes in Western accounts of Japanese architecture from the reopening of Japan in the mid nineteenth century to the present day a wish to see Western architectural theories reflected in Japanese buildings efforts to integrate elements of Japanese architecture into Western buildings and a desire to connect contemporary Japanese architecture with Japanese tradition It is suggested that together these narratives have had the effect of creating what amounts to a mythical version of Japanese architecture often at odds with historical fact but which has exercised a powerful influence on the development of building design internationally

of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas
