## **Grammar Of Inalienability A Typological Perspective On Body Part Terms And The Partwhole Relation:**

*The Grammar of Inalienability* Hilary Chappell, William McGregor, 2011-08-25 Research on language universals and research on linguistic typology are not antagonistic but rather complementary approaches to the same fundamental problem the relationship between the amazing diversity of languages and the profound unity of language Only if the true extent of typological divergence is recognized can universal laws be formulated In recent years it has become more and more evident that a broad range of languages of radically different types must be carefully analyzed before general theories are possible Typological comparison of this kind is now at the centre of linguistic research The series empirical approaches to language typology presents a platform for contributions of all kinds to this rapidly developing field The distinctive feature of the series is its markedly empirical orientation All conclusions to be reached are the result of a deepened study of empirical data General problems are focused on from the perspective of individual languages language families language groups or language samples Special emphasis is given to the analysis of phenomena from little known languages which shed new light on long standing problems in general linguistics The series is open to contributions from different theoretical persuasions It thus reflects the methodological pluralism that characterizes the present situation Care is taken that all volumes be accessible to every linguist and moreover to every reader specializing in some domain related to human language A deeper understanding of human language in general based on a detailed analysis of typological diversity among individual languages is fundamental for many sciences not only for linguists Therefore this series has proven to be indispensable in every research library be it public or private which has a specialization in language and the language sciences To discuss your book idea or submit a proposal please contact Birgit Sievert

**The Grammar of Body-Part Expressions** Roberto Zariquiey, Pilar M. Valenzuela, 2022-06-06 This volume explores the grammatical properties of body part expressions across a range of languages and language families in the Americas including Arawakan Eastern Tukano Mataguanan Panoan and Takanan Expressions denoting parts of the body often exhibit specific grammatical properties that are intrinsically related to their semantics and frequently appear in dedicated constructions many of which are found exclusively in association with these expressions Following a detailed introduction and discussion of the foundations of body part grammar the chapters in the first part of the book investigate categorialization lexicalization and the semantic processes associated with body part expressions In the second part of the book contributors investigate specific grammatical properties of body part expressions such as inalienability incorporation possessive constructions prefixation topicality and word formation strategies The volume draws on data from lesser known languages that are often under represented in comparative work and makes a significant contribution not only to the linguistics of the Americas and the typology of body part expressions but also to typological studies more broadly and to historical comparative and anthropological linguistics

*Binominal Lexemes in Cross-Linguistic Perspective* Steve Pepper, Francesca Masini, Simone Mattioli, 2022-11-07 The typological contrastive and descriptive studies

in this volume investigate the strategies employed by the world's languages to create complex denotations by combining two noun-like elements together with the kinds of semantic relation they involve and their acquisition by children. The term binominal lexeme is employed to cover both noun-noun compounds and a range of other naming strategies including prepositional compounds, relational compounds, construct forms, genitival constructions and more. Overall, the volume suggests a new cross-linguistic approach to the study of complex lexeme formation that cuts across the traditional boundaries between syntax, morphology and lexicon.

***A Grammar of Shaowu*** Sing Sing Ngai, 2021-09-20. This is the first comprehensive grammar of Shaowu, a Min language spoken in Shaowu city and its environs in northwestern Fujian province, China. The book offers first-hand linguistic data collected over four years in the field, now placed at the disposal of researchers and students working in language documentation, comparative linguistics and Sinitic typology. It can serve as a reference grammar for those interested in learning the Shaowu language, thereby helping to preserve it. In addition, the book provides insights into Shaowu's classification, which has been widely debated, thus elucidating its genetic affiliation. The book first presents Shaowu's geography, demography and history. It then profiles the language's phonology and lexicon, before providing a detailed description of its syntax, notably on its nominal, predicate, clausal and complex sentence structures, which are the focus of the book. The typological profile of Shaowu is also treated, with the conclusion that the language has Gan, Hakka, Mandarin and even some Wu overlays on its Min base. The Shaowu language serves an excellent example to illustrate the degree of hybridity a language can attain due to intensive language contact over time.

**Formal Ontology in Information Systems** S. Borgo, P. Hitzler, O. Kutz, 2018-09-28. FOIS is the flagship conference of the International Association for Ontology and its Applications (IAOA). Its interdisciplinary research focus lies at the intersection of philosophical ontology, linguistics, logic, cognitive science and computer science, as well as in the applications of ontological analysis to conceptual modeling, knowledge engineering, knowledge management, information systems development, library and information science, scientific research and semantic technologies in general. This volume presents the proceedings of FOIS 2018, held in Cape Town, South Africa, from 19-21 September. It was the 10th edition and 20th anniversary of the conference series. The volume contains 19 papers grouped into 4 sections: Foundations (7 papers), Agents and Properties (4 papers), Methods and Tools (4 papers) and Applications (4 papers). Regarding the applications of ontologies, a broad spectrum of areas is covered, including, in particular, biology and medicine, IoT, engineering and linguistics.

**Formal Ontology in Information Systems: Proceedings of the 10th International Conference FOIS 2018** will be of interest to researchers from all disciplines with an interest in formal ontology.

***A Grammar of Kuuk Thaayorre*** Alice R. Gaby, 2017-11-07. This grammar offers a comprehensive description of Kuuk Thaayorre, a Paman language spoken on the west coast of Cape York Peninsula, Australia. The Paman languages of Cape York have long been recognized for their exhibition of considerable phonological, semantic and morphosyntactic change (e.g. Hale 1964, Dixon 1980). Yet there has until now been no published full reference grammar of a

language from this area some excellent dictionaries theses and sketch grammars notwithstanding e g Hall 1972 Alpher 1973 1991 Crowley 1983 Kilham et al 1986 Sutton 1995 Smith Johnson 2000 On the basis of elicited data narrative and semi spontaneous conversation recorded between 2002 and 2008 as well as archival materials this grammar details the phonetics and phonology morphosyntax lexical and constructional semantics and pragmatics of one of the few indigenous Australian languages still used as a primary means of communication Kuuk Thaayorre possesses features of typological interest at each of these levels

**The Languages and Linguistics of Australia** Harold Koch, Rachel Nordlinger, 2014-08-19 The Languages and Linguistics of Australia A Comprehensive Guide is part of the multi volume reference work on the languages and linguistics of the continents of the world The volume provides a thorough overview of Australian languages including their linguistic structures their genetic relationships and issues of language maintenance and revitalisation Australian English Aboriginal English and other contact varieties are also discussed

*From NP to DP: The expression of possession in noun phrases* Martine Coene, Yves d' Hult, 2003-01-01 This is the first of a two volume selection of refereed and revised papers originally presented at the international conference From NP to DP at the University of Antwerp The papers address issues in the syntax and semantics of the noun phrase in particular the so called DP hypothesis which takes noun phrases to be headed by a functional head D terminator The major concerns can be grouped around 3 subthemes the internal syntax of noun phrases the syntax and semantics of bare nouns and indefinites and the expression of measurement in noun phrases The wealth of data coming from over 40 different languages combined with a thorough introduction to the current issues in the field of NPs DPs and some alternative syntactic and semantic analyses provide a comprehensive reference work from both a descriptive and a theoretical point of view The second volume is concerned exclusively with the expression of possession in noun phrases

**Dimensions of Possession** Irène Baron, Michael Herslund, Finn Sørensen, 2001-12-04 Few linguistic concepts are more elusive than possession The present collection of articles selected from an international workshop held in Copenhagen in May 1998 confronts the subject from several angles lexicon the semantics of possession and the verb HAVE the syntax of genitives and other possessive structures the interaction of verbal and nominal constructions the semantic and textual implications of the alienable inalienable distinction etc and approaches formal semantics functional semantics and syntax as diachronic and typological comparisons The languages covered include both European languages such as Danish French Russian Spanish Portuguese and Latin and several American Australian African and Asian languages This volume in which the contributing scholars have sought to examine as many dimensions as possible is of interest to all linguists in particular those working in the field of typology and functional approaches to language

**Split Possession** Thomas Stolz, Sonja Kettler, Cornelia Stroh, Aina Urdze, 2008-05-21 This book is a functional typological study of possession splits in European languages It shows that genetically and structurally diverse languages such as Icelandic Welsh and Maltese display possessive systems which are sensitive to semantically based distinctions reminiscent of the alienability

correlation These distinctions are grammatically relevant in many European languages because they require dedicated constructions What makes these split possessive systems interesting for the linguist is the interaction of semantic criteria with pragmatics and syntax Neutralisation of distinctions occurs under focus The same happens if one of the constituents of a possessive construction is syntactically heavy These effects can be observed in the majority of the 50 sample languages Possessive splits are strong in those languages which are outside the Standard Average European group The bulk of the European languages do not behave much differently from those non European languages for which possession splits are reported The book reveals interesting new facts about European languages and possession to typologists universals researchers and areal linguists

**From Polysemy to Semantic Change** Martine Vanhove, 2008 This book is the result of a joint project on lexical and semantic typology which gathered together field linguists semanticists cognitivists typologists and an NLP specialist These cross linguistic studies concern semantic shifts at large both synchronic and diachronic the outcome of polysemy heterosemy or semantic change at the lexical level The first part presents a comprehensive state of the art of a domain typologists have long been reluctant to deal with Part two focuses on theoretical and methodological approaches cognition construction grammar graph theory semantic maps and data bases These studies deal with universals and variation across languages illustrated with numerous examples from different semantic domains and different languages Part three is dedicated to detailed empirical studies of a large sample of languages in a limited set of semantic fields It reveals possible universals of semantic association as well as areal and cultural tendencies

**The Oxford Guide to Australian Languages** Claire Bowern, 2023-06-19 The Oxford Guide to Australian Languages is a wide ranging reference work that explores the more than 550 traditional and new Indigenous languages of Australia Australian languages have long played an important role in diachronic and synchronic linguistics and are a vital testing ground for linguistic theory Until now however there has been no comprehensive and accessible guide to their vast linguistic diversity This volume fills that gap bringing together leading scholars and junior researchers to provide an up to date guide to all aspects of the languages of Australia The chapters in the book explore typology documentation and classification linguistic structures from phonology to pragmatics and discourse sociolinguistics and language variation and language in the community The final part offers grammatical sketches of a selection of languages sub groups and families At a time when the number of living Australian languages is significantly reduced even compared to twenty years ago this volume establishes priorities for future linguistic research and contributes to the language expansion and revitalization efforts that are underway

The Linguistics of Temperature Maria Koptjevskaja-Tamm, 2015-02-11 The volume is the first comprehensive typological study of the conceptualisation of temperature in languages as reflected in their systems of central temperature terms hot cold to freeze etc The key issues addressed here include questions such as how languages categorize the temperature domain and what other uses the temperature expressions may have e.g. when metaphorically referring to emotions warm words The volume contains studies

of more than 50 genetically areally and typologically diverse languages and is unique in considering cross linguistic patterns defined both by lexical and grammatical information The detailed descriptions of the linguistic and extra linguistic facts will serve as an important step in teasing apart the role of the different factors in how we speak about temperature neurophysiology cognition environment social cultural practices genetic relations among languages and linguistic contact The book is a significant contribution to semantic typology and will be of interest for linguists psychologists anthropologists and philosophers      *The Habitat of Australia's Aboriginal Languages* Gerhard Leitner, Ian G. Malcolm, 2008-08-22 The languages of Aboriginal Australians have attracted a considerable amount of interest among scholars from such diverse fields as linguistics political studies archaeology or social history As a result there is a large number of studies on a variety of issues to do with Aboriginal Australian languages and the social contexts in which they are used There is however no integrative reader that is easily accessible to the non specialist in any of the areas concerned The collection edited by Leitner and Malcolm fills this gap Looking at Aborigines and Torres Strait Islanders and their changing habitats from pre colonial times to the present the book covers languages from a structural and functional linguistic perspective moves on to the issue of cultural maintenance and then turns to language policy planning and the educational and legal dimensions Among the many themes discussed are the social and linguistic history of language contact after 1788 including the Macassans the demographic base of indigenous languages traditional indigenous languages results of language contact such as the modification of traditional languages and the rise of contact languages pidgins creoles esp Kriol Torres Strait Creole and Aboriginal English the impact of the Aboriginal languages on mainstream Australian English maintenance shift revival and documentation of indigenous and contact languages language planning language in education language in the media language in the law courts The contributors are leading experts in their fields The book can serve as a reader for university courses but also as a state of the art work and resource for specialists like applied linguists or educational planners

**Introducing Language Typology** Edith A. Moravcsik, 2013 This textbook provides an introduction to language typology which assumes minimal prior knowledge of linguistics      **Constituent Order in the Languages of Europe** Anna Siewierska, 2010-12-14      *Actancy* Gilbert Lazard, 2011-08-30 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics
