Perspectives on Collecting East Asian Objects ,2023-08-21 Centring the Periphery New Perspectives on Collecting East Asian Objects edited by Nata a Vampelj Suhadolnik explores East Asian collections in peripheral areas of Europe and North America and their relationship with the East Asian collections in former imperial and colonial centres The authors not only present the stories of a number of less well known individual objects and collections but also discuss the evolution of fashions and tastes in East Asian objects in areas that were not centres of European colonial power and the socioeconomic conditions in which they were collected To date research on the collecting of East Asian objects in the Euro American region has focused primarily on larger collections and collectors The stories from the periphery however deserve to be told They point to important departures from the dominant discourses and practices of East Asian collecting thus raising questions about established taxonomies and knowledge systems With contributions by Tina Berdajs Chou Wei Chiang Gyrgyi Fajcskó Jin Han Sarah Laursen Beatrix Mecsi Motoh Helena Stacey Pierson Maria Sobotka Filip Suchomel Barbara Trnovec Nata a Vampelj Suhadolnik Brigid Vance Maja Veseli Nata a Visonik Gerel Bettina Zorn [The Power of Comics](#) Randy Duncan,Matthew J. Smith,2009-07-01 A comprehensive introduction to the comic arts From the introduction by Paul Levitz If ever there was a medium characterized by its unexamined self expression it's comics For decades after the medium's birth it was free of organized critical analysis its creators generally disinclined to self analysis or formal documentation The average reader didn't know who created the comics how or why and except for a uniquely destructive period during America's witch hunting of the 1950s didn't seem to care As the medium has matured however and the creativity of comics began to touch the mainstream of popular culture in many ways curiosity followed leading to journalism and eventually scholarship and so here we are The Power of Comics is the first introductory textbook for comic art studies courses Lending a broader understanding of the medium and its communication potential it provides students with a coherent and comprehensive explanation of comic books and graphic novels including coverage of their history and their communication techniques research into their meanings and effects and an overview of industry practices and fan culture Co authors Randy Duncan and Matthew J Smith draw on their own years of experience teaching comics studies courses and the scholarly literature across several disciplines to create a text with the following features Discussion questions for each chapter Activities to engage readers Recommended reading suggestions Over 150 illustrations Bibliography Glossary The Power of Comics deals exclusively with comic books and graphic novels One reason for this focus is that no one text can hope to do justice to both strips and books there is simply too much to cover Preference is given to comic books because in their longer form the graphic novel they have the greatest potential for depth and complexity of expression As comic strips shrink in size and become more inane in content comic
