

Farmers Last Frontier Economic Hist Volume 5

Willard W. Cochrane

Farmers Last Frontier Economic Hist Volume 5:

The Farmers' Game David Vaught, 2012-10-17 A journey through the national pastime's roots in America's small towns and wide open spaces An absorbing read The Tampa Tribune In the film *Field of Dreams* the lead character gives his struggling farming community a magical place where the smell of roasted peanuts gently wafts over the crowded grandstand on a warm summer evening just as the star pitcher takes the mound In *The Farmers Game* David Vaught examines the history and character of baseball through a series of essay vignettes presenting the sport as essentially rural reflecting the nature of farm and small town life Vaught does not deny or devalue the lively stickball games played in the streets of Brooklyn but he sees the history of the game and the rural United States as related and mutually revealing His subjects include nineteenth century Cooperstown the playing fields of Texas and Minnesota the rural communities of California the great farmer pitcher Bob Feller and the notorious Gaylord Perry Although contrary to legend Abner Doubleday did not invent baseball in a cow pasture in upstate New York many fans enjoy the game for its nostalgic qualities Vaught's deeply researched exploration of baseball's rural roots helps explain its enduring popularity *The Farmer's Last Frontier* Fred Albert Shannon, 1945 Part of a series of detailed reference manuals on American economic history this volume traces the development and expansion of agriculture across the USA during the last half of the 19th century **The Routledge**

History of Rural America Pamela Riney-Kehrberg, 2016-04-14 The Routledge History of Rural America charts the course of rural life in the United States raising questions about what makes a place rural and how rural places have shaped the history of the nation Bringing together leading scholars to analyze a wide array of themes in rural history and culture this text is a state of the art resource for students scholars and educators at all levels This Routledge History provides a regional context for understanding change in rural communities across America and examines a number of areas where the history of rural people has deviated from the American mainstream Readers will come away with an enhanced understanding of the interplay between urban and rural areas a knowledge of the regional differences within the rural United States and an awareness of the importance of agriculture and rural life to American society The book is divided into four main sections regions of rural America rural lives in context change and development and resources for scholars and teachers Examining the essays on the regions of rural America readers can discover what makes New England different from the South and why the Midwest and Mountain West are quite different places The chapters on rural lives provide an entrance into the social and cultural history of rural peoples women children and men as well as a description of some of the forces shaping rural communities such as immigration race and religious difference Chapters on change and development examine the forces molding the countryside such as rural urban tensions technological change and increasing globalization The final section will help scholars and educators integrate rural history into their research writing and classrooms By breaking the field of rural history into so many pieces this volume adds depth and complexity to the history of the United States shedding light on an understudied

aspect of the American mythology and beliefs about the American dream The Farmer's Last Frontier Fred A. Shannon, 2017-07-28 Part of a series of detailed reference manuals on American economic history this volume traces the development and expansion of agriculture across the USA during the last half of the 19th century **The Search for the Ultimate Sink** Joel Arthur Tarr, 1996 Whether it comes by air by land or by water pollution has long plagued the American city This work surveys what technology has done to and for the environment of the American city since 1850 *Nature's Metropolis: Chicago and the Great West* William Cronon, 2009-11-02 A Finalist for the Pulitzer Prize and Winner of the Bancroft Prize No one has written a better book about a city Nature's Metropolis is elegant testimony to the proposition that economic urban environmental and business history can be as graceful powerful and fascinating as a novel Kenneth T Jackson Boston Globe **Books in Series** , 1985 Vols for 1980 issued in three parts Series Authors and Titles *Age of Betrayal* Jack Beatty, 2008-04-08 Age of Betrayal is a brilliant reconsideration of America's first Gilded Age when war born dreams of freedom and democracy died of their impossibility Focusing on the alliance between government and railroads forged by bribes and campaign contributions Jack Beatty details the corruption of American political culture that in the words of Rutherford B Hayes transformed a government of the people by the people and for the people into a government by the corporations of the corporations and for the corporations A passionate gripping scandalous and sorrowing history of the triumph of wealth over commonwealth *Agricultural History* , 1979 *The Development of American Agriculture* Willard W. Cochrane, 1979 **An Economic History of the United States** Ronald Seavoy, 2013-10-18 An Economic History of the United States is an accessible and informative survey designed for undergraduate courses on American economic history The book spans from 1607 to the modern age and presents a documented history of how the American economy has propelled the nation into a position of world leadership Noted economic historian Ronald E Seavoy covers nearly 400 years of economic history beginning with the commercialization of agriculture in the pre colonial era through the development of banks and industrialization in the nineteenth century up to the globalization of the business economy in the present day **Agrarian Capitalism in Theory and Practice** Susan Archer Mann, 2017-10-10 Susan Mann focuses on a longstanding controversy in sociological theory why has agriculture been traditionally resistant to wage labor Capitalist development has been slower and more uneven in agriculture than in other spheres of production and major parts of the rural economy remain almost preindustrial in their reliance on family labor lack of separation between industry and household and failure to develop a highly specialized division of labor Emphasizing the agriculture of the American South Mann adopts an interdisciplinary approach drawing insights from history and economics as well as sociology Mann points out that most theories of agrarian capitalism both Marxist and non Marxist ignore the implications of agriculture as a production process centered in nature with natural features that cannot be synchronized easily into the tempos required by industrial production She argues that various natural and technical features of agricultural production such as the relatively lengthy production time of certain

crops and the irregular labor requirements imposed by seasonal production make some types of farming particularly risky avenues for capitalist investment To test this pioneering theory of natural obstacles to rural capitalist development Mann creatively combines diverse research methodologies Analyzing U S Agricultural Census data she shows the correlations between type of agricultural commodity or crop produced the natural and technical features of these rural commodities and the use of wage labor Using an historical comparative approach she investigates the persistence of nonwage labor in American cotton production after the Civil War She examines why sharecropping rather than wage labor replaced slavery in the older cotton producing regions of the southeastern United States She then discusses the domestic and international factors that finally led to the demise of sharecropping and the rise of wage labor in the decades following the Great Depression In this historical study of the rise and demise of sharecropping the interplay between nature gender race and class is highlighted By closely examining both natural and social obstacles to wage labor within the context of a global economy Mann presents not only an intriguing analysis of agrarian capitalist development but also an entirely new framework for examining the social history of the American South Originally published in 1990 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

The Making of a History

Gregory M. Tobin, 2014-09-10 Walter Prescott Webb became one of the best known interpreters of the American West following the publication of *The Great Plains* in 1931 That book remained one of the outstanding studies of the region for decades and attracted considerable attention over the years for its unusual emphasis on the impact of geographic factors on the process of settlement Using manuscript sources some of which had not previously been available Gregory M Tobin has traced the elements that went into the planning and writing of *The Great Plains* and that account for its distinctive approach to the writing of a regional history Tobin emphasizes two aspects of Webb s life that molded the historian s outlook his early family life and community connections in West Texas and his admiration for the ideas of scholar Lindley Miller Keasbey Webb reacted strongly against the assumption that the only cultural values of any real worth emanated from the urban and sophisticated East he was determined to write the history of his own people in a way that would reveal the scale of their anonymous contribution to American civilization By reverting to Keasbey s stress on the relationship between natural environment and social institutions Webb broadened his study to take in what he believed to be a distinct geographic environment The result was *The Great Plains* an assertion of individual and regional identity by a man with a personal stake in establishing the image of a distinctive Plains civilization Although *The Making of a History* is not a full biography of Walter Prescott Webb it is the first biographically oriented study of a man regarded as one of the twentieth century s major western historians It places his development within the framework of his intellectual and social setting and in a sense subjects his

career to the same type of scrutiny that he advocated as the basis of the study of evolving cultures **Late
Nineteenth-Century American Development** Jeffrey G. Williamson, 2008-10-30 An economist's attempt to interpret a critical period of US history from Civil War to World War I **Books on Science from the United States** United States. Department of State, 1948 Yearbook of Agriculture , 1962 **The Pennsylvania Magazine of History and Biography** , 1949 *After a Hundred Years* United States. Department of Agriculture, 1962 **Prairie Patrimony** Sonya Salamon, 2014-02-01 Drawing on a decade long ethnographic study of seven Illinois farming communities Salamon demonstrates how family land transfers serve as the mechanism for recreating the social relations fundamental to midwestern ethnic identities She shows how along with the land families pass on a cultural patrimony that shapes practices of farm management succession and inheritance and that ultimately determines how land tenure and the personality of rural communities evolve Rural Development Perspectives , 1989

Unveiling the Energy of Verbal Beauty: An Psychological Sojourn through **Farmers Last Frontier Economic Hist Volume 5**

In a global inundated with screens and the cacophony of fast connection, the profound energy and mental resonance of verbal beauty usually fade into obscurity, eclipsed by the constant assault of sound and distractions. However, situated within the lyrical pages of **Farmers Last Frontier Economic Hist Volume 5**, a captivating work of fictional brilliance that pulses with raw emotions, lies an unforgettable journey waiting to be embarked upon. Published with a virtuoso wordsmith, that interesting opus instructions visitors on an emotional odyssey, delicately exposing the latent potential and profound influence stuck within the intricate web of language. Within the heart-wrenching expanse with this evocative evaluation, we shall embark upon an introspective exploration of the book is central styles, dissect its captivating writing design, and immerse ourselves in the indelible impression it leaves upon the depths of readers souls.
